HUNCHBACK

THE
ADVENTURE

Ocean

Hunchback the Adventure

Somewhere on the outskirts of Paris that despicable cur the evil Cardinal, in collusion with the Bishop of Notre Dame, hold to ransom our hero's sweetheart, Esmerelda. These irreverant reprobates guffaw with the glee waiting for our helpless hero, Quasimodo, as he attempts to make a daring rescue, blinded by his passion and hampered by his hump but knowing if he doesn't make it she'll never 'phone him again!

You take the part of Quasimodo (Are you absolutely sure about this?) and there are three stages to your jolly little task.

First you must escape from Notre Dame itself, avoiding the many guards which the Cardinal and his spineless lackey the Bishop, have sent out to block your path.

Then if you manage to survive that little lot you will have to find your way under the city of Paris until you reach your goal the Cardinals mansion.

Finally you must find and challenge the Cardinal, and then escape with Esmerelda in tow.

GOOD LUCK!

The Game

Hunchback is a graphic text adventure with illustrations for some locations some "Events" and all objects. Experienced Adventurers may not wish to read the following explanation but for all others it will enhance the understanding and enjoyment of the game.

If you haven't played an adventure game before, don't be put off, its not difficult and will give hours of enjoyment. You are embarking on a voyage of discovery with problems to solve, obstacles to avoid, characters to meet and an ultimate goal. In most ways it isn't any different from other game types — only in the method of presentation and the way you interact with it.

The computer will describe to you, in words, your current location, the characters and any objects that are there. Once you have decided what to do

(in this game you take the role of the hero, Quasimodo) you instruct the computer by typing in your request in a limited form of English. The format of the words that the computer understands is explained later in "The Language", but it has been deliberately kept simple to allow more room for game data. If the computer can understand what you have typed it will perform the required action and describe the results to you.

The game is split into three parts (there is over 100k of code and data altogether) which must be played in order. (You cannot begin Part II until you have completed Part I and so on.) The three sections are divided up by storyline and any objects that you are carrying when you finish a part will be retained for possible use in the next one. (It is important to remember this if you come across an object, but can find no use for it in the current part). The use of graphics in this game is quite different to some adventure games. Firstly every object has a small illustration; up to six can be carried at one time and they will be displayed at the top right-hand of the screen. Larger illustrations for locations or depicting events

appear in the top left of the screen and approximately one third of these are of the "Event" type. It should be noted that none of the graphics are designed to replace the text but to enhance it!

BACKGROUND SCENE

OBJECTS YOU ARE CARRYING

MAIN TEXT AREA

The Language

You control Quasimodo by instructing the computer in a restricted form of plain English, however there are a few simple rules to bear in mind:-

- (i) Every instruction must have a verb. Some of the "verbs" that the computer understands are not strictly English verbs, so it is helpful if you regard a "verb" as a word which causes an action.

- (ii) Some “verbs” need a “noun” to operate on — e.g. GET NET “Get” is the verb and “Net” is the noun.
- (iii) The program will pick out the words it “understands” from a sentence and if it finds a word that isn’t in its vocabulary, the computer will tell you what it is.
- (iv) If you wish to type in more than one sentence at a time you can separate them with the word “and” e.g. Get the book “and” go East.
- (v) You need only type the first three letters of a word for it to be understood.

Here are the most commonly used words to get you started.

Look (or L)

To look around. This re-displays the description of the current location (it is done automatically if you move to a new location).

North (or N)

North East (or NE)

East (or E)

South East (or SE)

South (or S)

South West (or SW)

West (or W)

North West (or NW)

These are movement verbs that are used most often. You can type just the direction or place the word “Go” in front, (it makes no difference). Of course the program will only let you move in a specified direction if it is possible.

GET/DROP

INVENTORY

For picking up or dropping an object.

This instruction displays in text format a list of the objects that you are carrying. (You can also reference this on the objects illustration display).

Time

If you spend too long contemplating your next move (and the game is not on

pause) then "Time" will pass and anything typed in and "Left" will be interpreted.

General Advice

- (i) Draw a map — Unless you have an unusually good memory it will be enormously helpful to chart your progress.
- (ii) Everything you come across in the Adventure will have a use — you only have to find out what it is!

Getting Started

Insert the program disk into the drive with the A side facing upward. Type |DISK and press ENTER to make sure the machine can access the disk drive. Now type RUN" HUNCH" and press ENTER the game will now load automatically.

Saving/Loading a Game;

Insert the tape you wish to use into the tape unit and follow the onscreen instruction.

Acceptable Verbs

The following is a list of "Verbs" (Action Words) which the computer will understand.

GO	NORTH	NORTH EAST	EAST
SOUTH EAST	SOUTH	SOUTH WEST	WEST
NORTH WEST	UP	DOWN	DROP
ATTACK	LIGHT	ENTER	IN
INVENTORY	LOOK	GET	TAKE
OUT	EAT	SMASH	CLIMB
OPEN	READ	REMOVE	HIT
CLOSE	CUT	UNLOCK	STAB
LOCK	SAY	DRINK	

Special Verbs

WAIT — Use if you want to just let time pass.

PAUSE — To pause the game if you leave the game unattended without doing this (Time) will still continue.

QUIT — To end the game in progress.

SAVE — To save the current state of play.

LOAD — To restore a saved game.

We wish you many hours of enjoyment with "Hunchback The Adventure".
