
The Aim of the Game

SPEEDKING - the motorcycle racing game with thrilling high speed wheel-to-wheel action against 19 other determined riders. Work your way up to world class with the 3 skill levels on 10 world famous circuits. Put on your helmet and enjoy the exhilarating challenge of high performance bike racing at 250 mph!

- 10 world famous circuits
- 3 skill levels
- High performance bike with 6 gears
- 19 other riders
- Display of: best position, fastest time, lap record
- Joystick compatible

CONTROLS

	Joystick	Keyboard
Accelerate	Fire button	Space
Lean left	Left	N
Lean right	Right	M
Lower gear	Forward	A
Higher gear	Back	Z
ESC to play		

There are 6 gears, with selection made by forward/back movement of the joystick or keys A and Z. Each gear corresponds to a particular speed range. Accelerate or brake by pressing or releasing the Fire button (or space bar). Acceleration and braking are affected by the gear to speed relationship. A neutral position must occur between gear changes if using a joystick.

Colliding with other riders will result in a spill from your machine, and a subsequent time penalty to regain control. Leaving the road causes loss of speed and eventually loss of control.

At the start of the race, two timers will start:

Lap timer: Transferred to left side of the screen at end of each lap (lower readout). Upper readout = best lap time.

Race timer: Timing of current race.

If a new record is set for lap time, race time or finishing position the information will be announced on the grandstand display board.
