INTRODUCTION OF THE OWNER'S MANUAL

SEGA ENTERPRISES, LTD., supported by its high electronic technology of LSIs, microprocessors, etc. and a wealth of experience, has for more than 30 years been supplying various innovative and popular game machines to the world market. This OWNER'S manual is intended to provide detailed comments together with all the necessary information covering the operation in general of electronic assemblies, electromechanicals servicing control, spare parts, etc. as regards the **SUPER MONACO GP** a new SEGA product. The manual is intended for those who have knowledge of electricity and technical expertise especially in ICs, CRTs, microprocessors, etc. Carefully read so as to acquire sufficient knowledge before working on the machine. Should there be a malfunction, non-technical personnel should under no circumstance touch the interior system.

I. HANDLING PRECAUTIONS

When installing or inspecting, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.

- o Be sure to turn the power off before turning on the machine.
- o To insert or pull out the plug quickly is dangerous.
- o It is necessary to make sure that the power cord or the grounding wire is not exposed on the road, etc. in a manner so as to be dangerous. Make sure that grounding connections are made safely at the position where specified.
- o Do not use any fuse that does not meet the specified rating.
- o Make complete connections for the IC board and other connectors. Insufficient insertion is very dangerous.

Also, for the IC board circuit inspections, only the logic tone is allowed. The use of a tester is not permitted, so be careful in this regard. After confirming that there are no irregularities, turn the power ON.

2. PREVENTION OF COUNTERFEITING AND CONVERSION

LABELLING

To prevent counterfeits and conversions, the following labels are put on all the SEGA products. When handling such goods, be sure to confirm the labels. They are used to prevent illegal acts such as the unauthorized copying of the products and the printed circuit boards thereof or carrying on business by manufacturing similar merchandise or by converting, selling or using such products or printed circuit boards.

The following seal is put on the machines manufactured by SEGA.

ORIGINAL SEAL

COPYRIGHT NOTICE

This SEGA product has the copyright notice as follows:

© SEGA 1989

This signifies that this work was disclosed in 1989 and is the property of SEGA ENTERPRISES, LTD.

3. PRECAUTIONS CONCERNING THE PLACE OF INSTALLATION

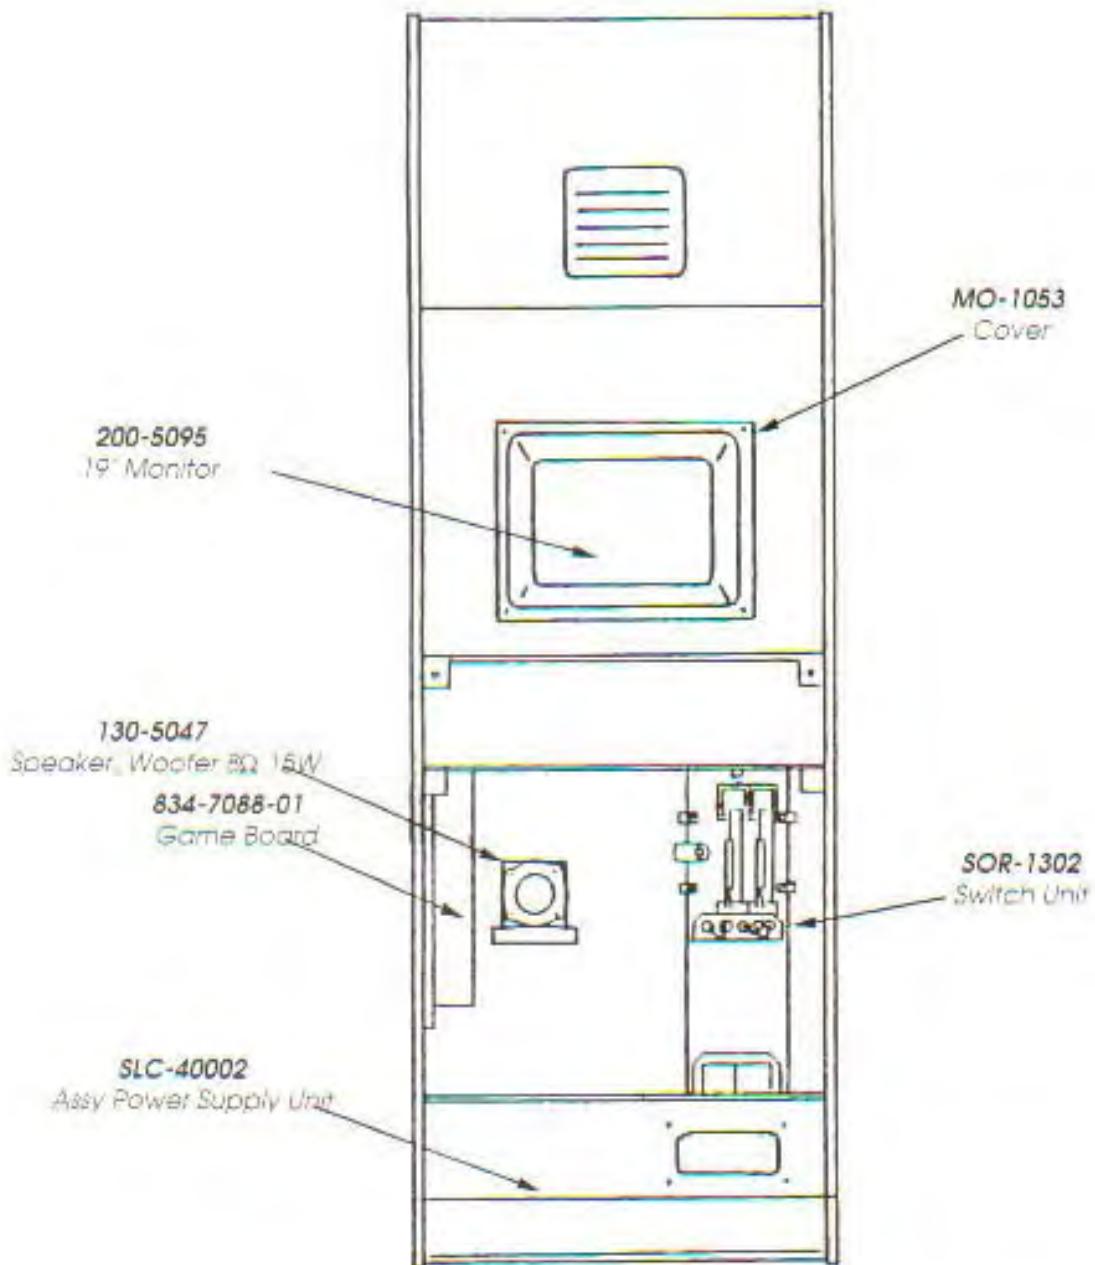

The **SUPER MONACO GP** is an indoor game machine. Absolutely do not install it outside. Even indoors, avoid installing in places mentioned below so as to ensure proper usage:

- o Places subject to rain or water leakage, or condensation due to humidity.
- o In the proximity of an indoor swimming pool and/or shower.
- o Places subject to direct sunlight.
- o Places subject to heat sources from heating units, etc., or hot air.
- o Vicinity of highly inflammable/volatile chemicals or hazardous matter.
- o Sloped surfaces.
- o Vicinity of anti-disaster facilities such us fire exits and fire extinguishers.
- o Places subject to any type of violent impact.
- o Dusty places.

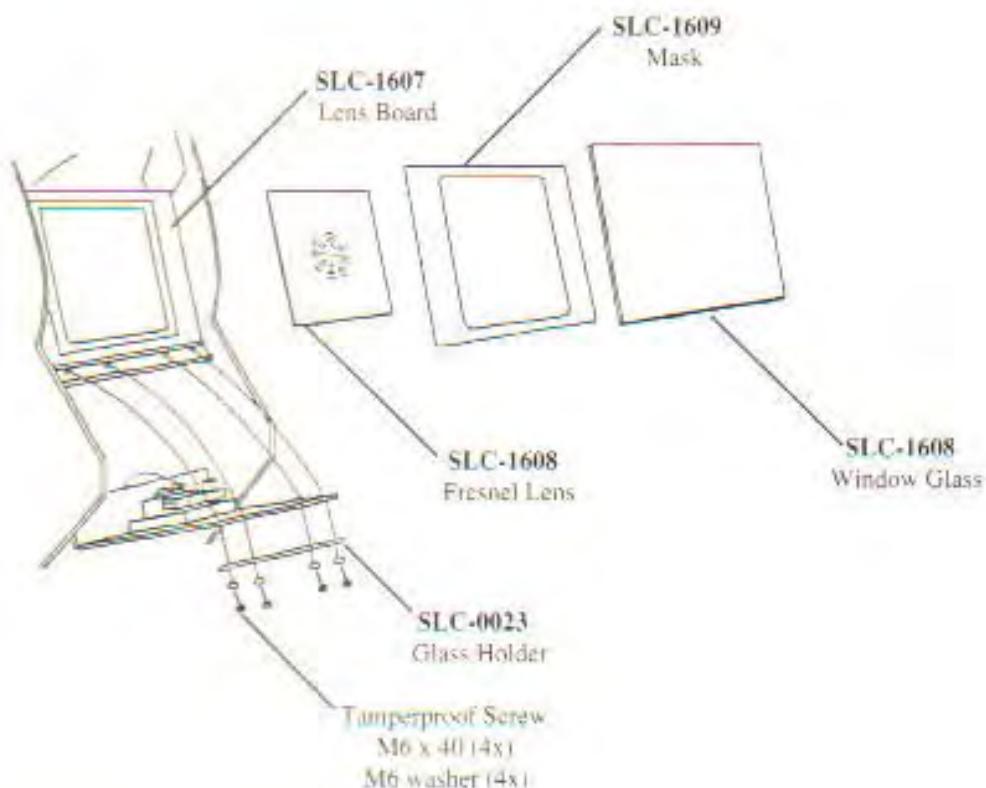

4. NAME OF PARTS - I

NAME OF PARTS - 2

5. HANDLING THE FRESNEL LENS

(1) REMOVING THE FRESNEL LENS

Remove the GLASS HOLDER (SLC-0023) by taking off the four M6 x 40 TAMPER PROOF SCREWS.

The WINDOW GLASS (SLC-1608), MASK (SLC-1609), and FRESNEL LENS (SLC-1068) can be removed by opening the CONTROL PANEL. The FRESNEL LENS is inserted in the LENS BOARD (SLC-1607). Pay careful attention so as not to cause damage to the lens mentioned above.

(2) FRESNEL LENS CLEANING, ETC.

When dust, etc. adheres to the FRESNEL LENS, remove them by lightly wiping it off, using a soft cloth such as gauze, etc. with chemical detergent or alcohol being applied, and then wring it out thoroughly (when a chemical detergent is used for wiping, lightly wipe it off again with a soft cloth after applying water to it and wringing it out completely). At this time, the adhered dust can easily be removed by wiping the FRESNEL LENS surface (convexed, concaved) along the arc.

(3) INSTALLING THE FRESNEL LENS

When installing the FRESNEL LENS, pay careful attention so that the surface (convexed, concaved) is positioned towards you, in the procedure opposite to that used when it was disassembled.

(4) FRESNEL LENS HANDING PRECAUTIONS

When the FRESNEL LENS is subject to extremely hot temperatures, it deforms due to its properties, therefore, you should keep it away from heating equipment such as heaters, etc.

This LENS warps when it is located at places where the temperature and humidity are extremely high, therefore, pay careful attention to this point.

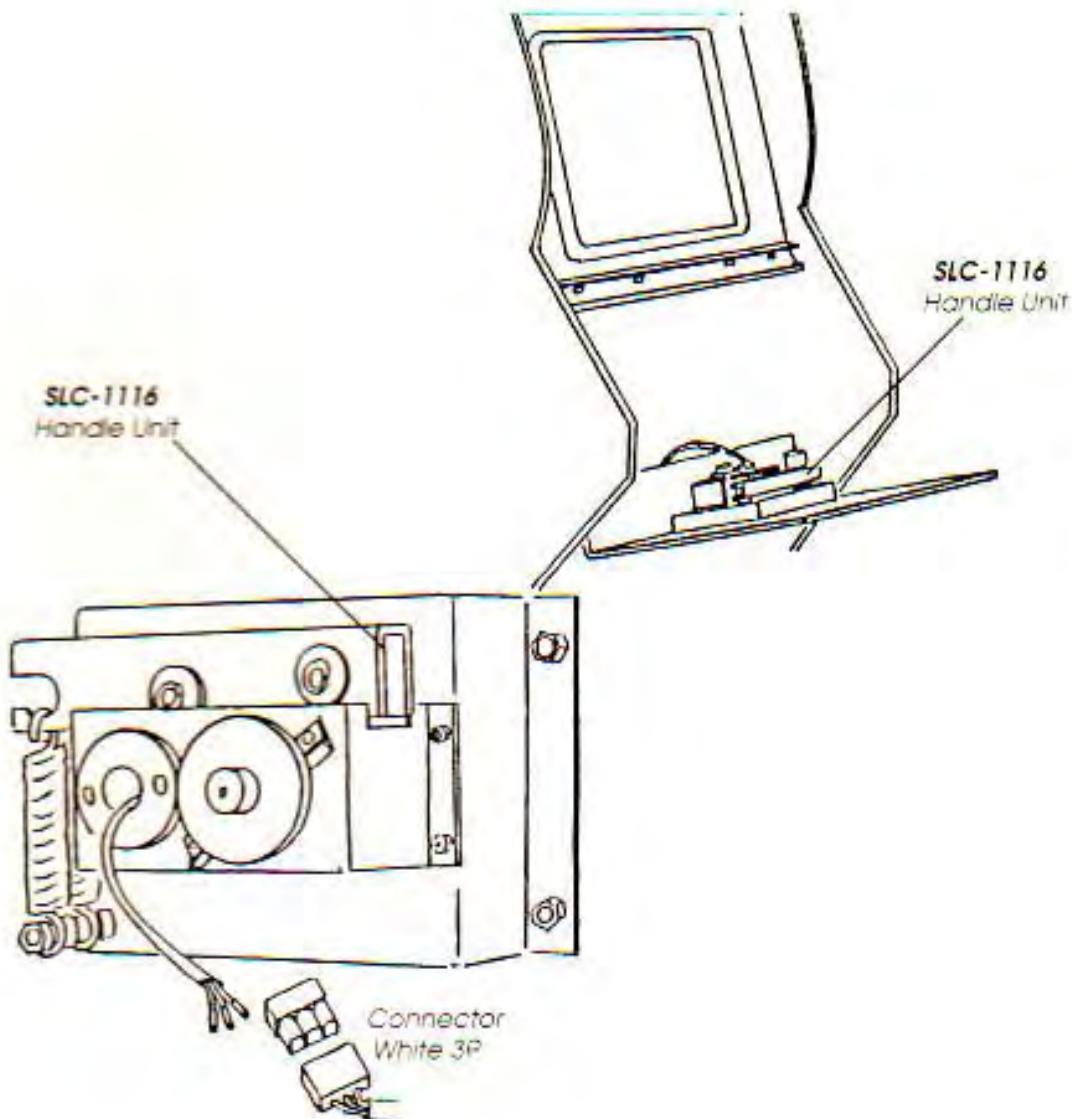

Since the LENS surface can easily be damaged, do not rub it with hard items such as a brush, etc.

Do not wipe the LENS with a cloth containing volatile matter such as thinner, gasoline, insecticide, etc. (using said matter may cause the LENS to be cracked even in a location that has a regular room temperature).

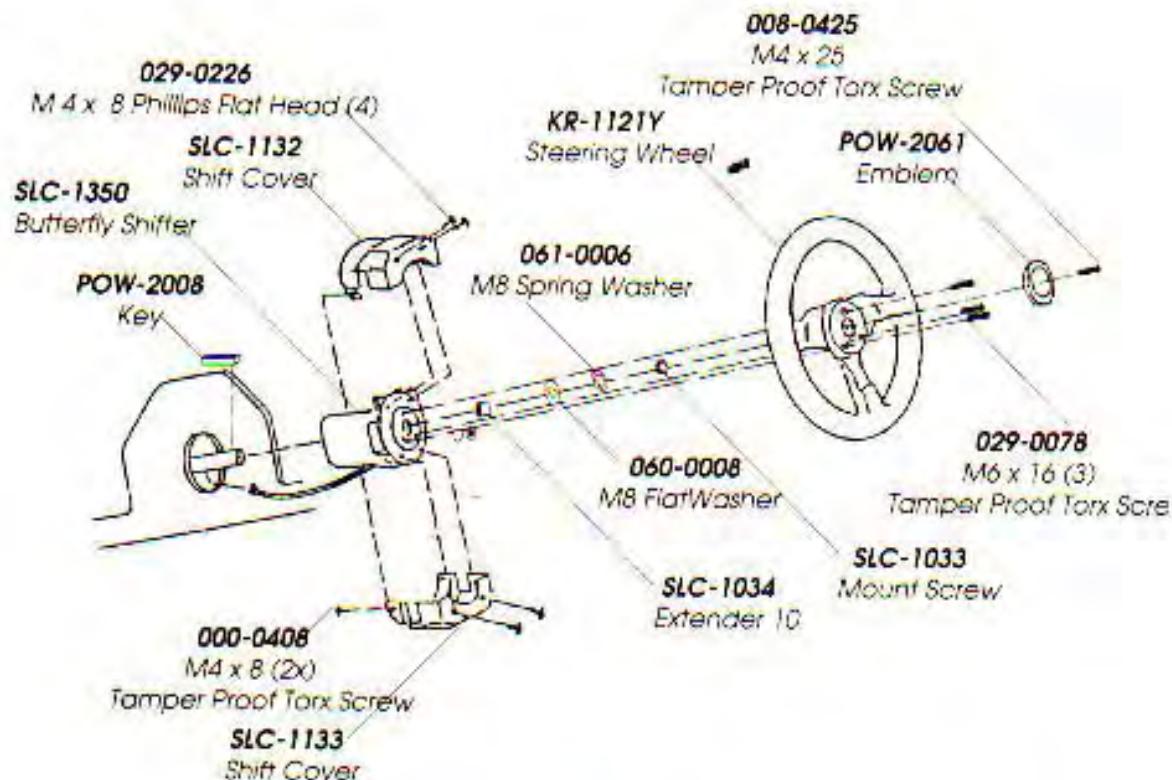

6. REMOVING THE SHIFT LEVER UNIT AND REPLACING THE SWITCH

REMOVING THE SHIFT UNIT

- (1) Open the CONTROL PANEL (refer to 5. HANDLING THE FRESNEL LENS).
- (2) Disconnect the CONNECTOR (white 3P) of the wire (gray) which comes out of the HANDLE UNIT (SLC-1116) and also disconnect the CONNECTOR PINS, in the manner as shown.

- (3) Take off the EMBLEM (POW-2061) by taking out the M4 TAMPER PROOF SCREW.
- (4) Remove the STEERING HANDLE (KR-1121Y) by taking off the three M6 CAP SCREWS.
- (5) Remove the two SHIFT COVERS (SLC-1132, SLC-1133) by taking off the two M4 TAMPER PROOF SCREWS, and the four M4 FLAT SCREWS.
- (6) Remove the MOUNT SCREW (SLC-1033) and take out the SHIFT LEVER UNIT (SLC-1350).

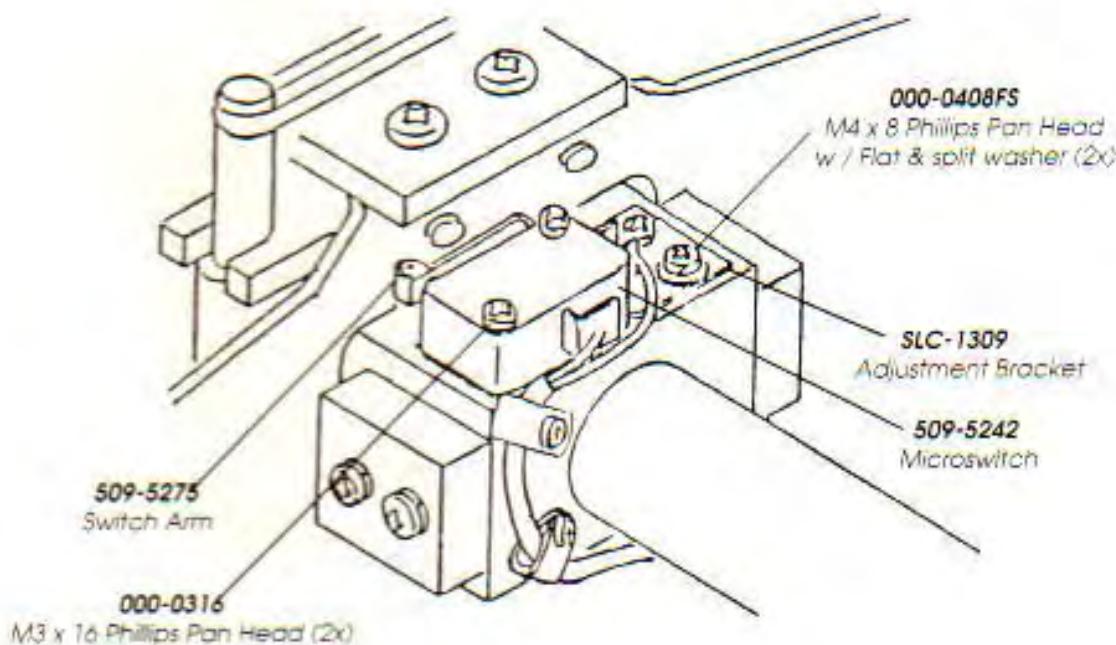

- CAUTION -

The STEERING HANDLE portion tends to be subject to great shock, causing the screws to be come loose, therefore, be sure to securely tighten them.

Also, when fastening the HEX SKT H CAP SCREWS, apply a 180 kgf. cm torque.

REPLACING THE MICROSWITCH

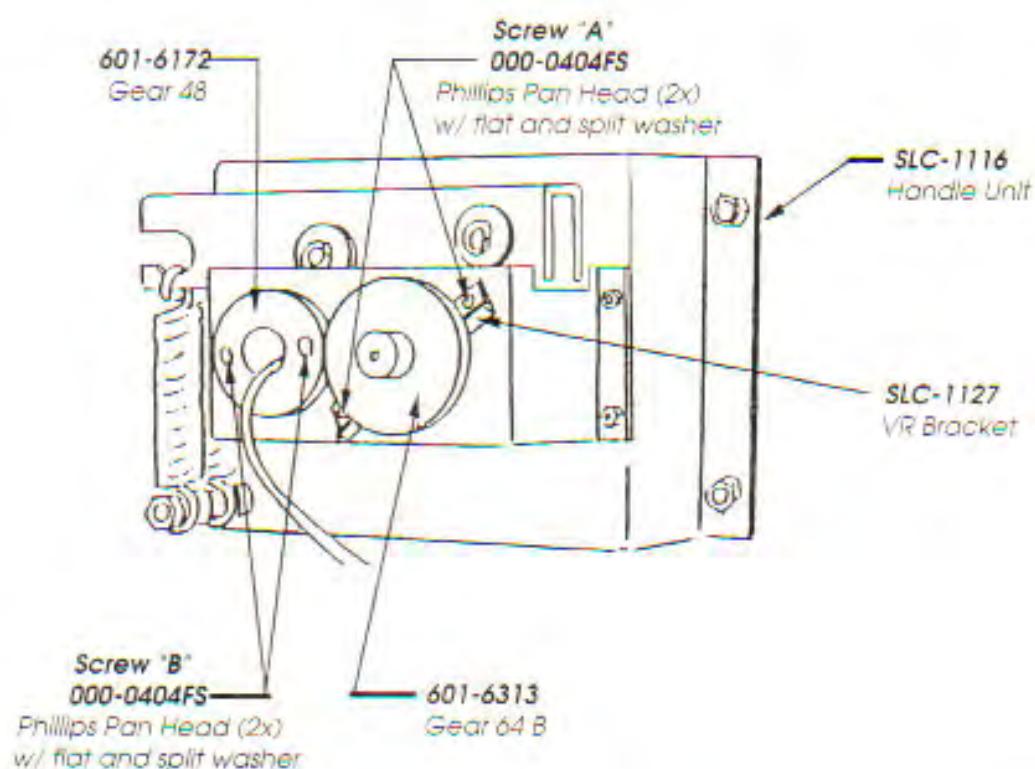

- (1) Remove the SHIFT COVER (SLC-1132, SLC-1133) in the same manner as when taking out the SHIFT LEVER UNIT.
- (2) The MICROSWITCHes can be taken out by removing the wire's soldering and taking off the two M3 SCREWS from each MICROSWITCH.
- (3) The MICROSWITCHes fine adjustments can be made by loosening the two M4 SCREWS and moving the ADJUSTMENT BRACKET (SLC-1309).

7. STEERING HANDLE VR ADJUSTMENTS

VR adjustments will be made in the TEST MODE'S INPUT TEST screen.

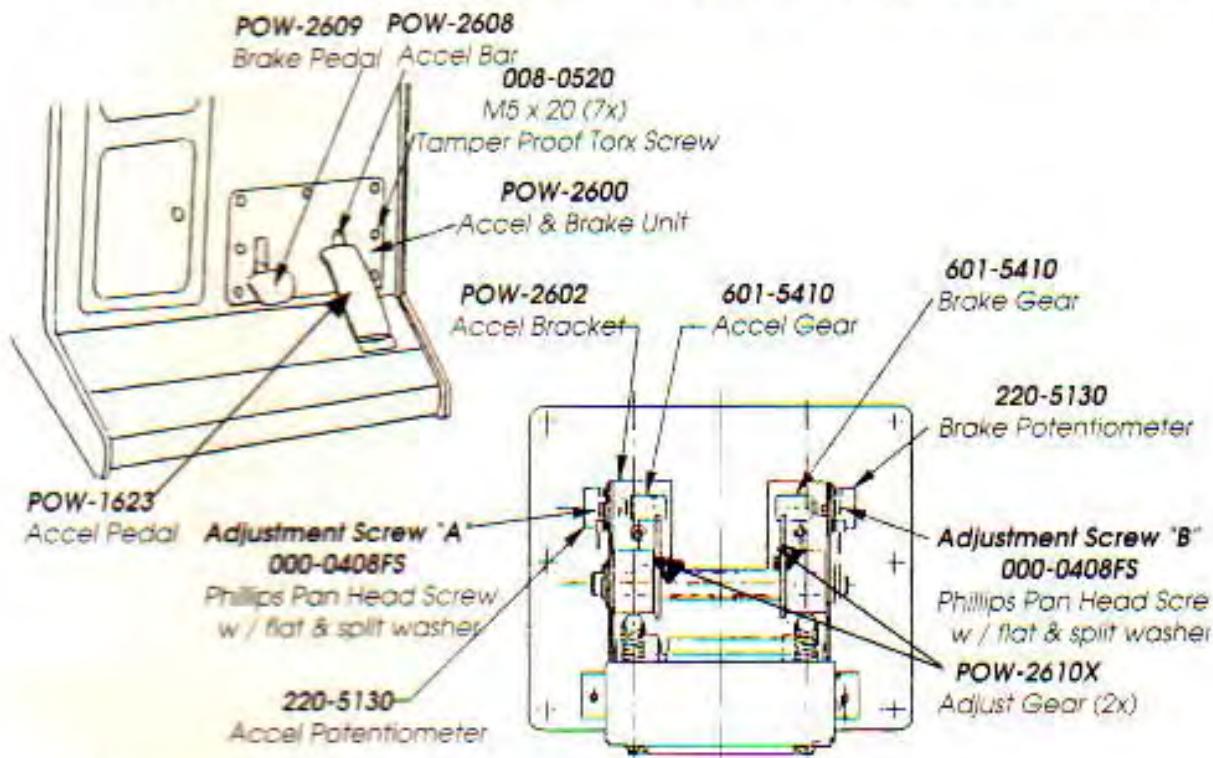

- (1) Loosen the two SCREWS "A" (M4 X 8) of the VR BRACKET (SLC-1127), turn GEAR "A", and make sure that the on-screen numerical value becomes approximately 80H. When loosening the screws, adjust the gear backlash.
- (2) Next, loosen the NUT (M6) and two SCREWS "B" (M4 X 8) which secure GEAR "B", turn GEAR "B" and make fine adjustments to 80H \pm 1.

Reference Values		
Minimum Value		Maximum Value
Lower than 20H	7FH 80H 81H	Higher than E0H
Allowable Adjustment Range		

8. REMOVING THE ACCELERATOR / BRAKE UNIT AND ADJUSTING THE VR

To remove the accelerator/brake unit, take off the seven M5 TAMPER PROOF SCREWS.

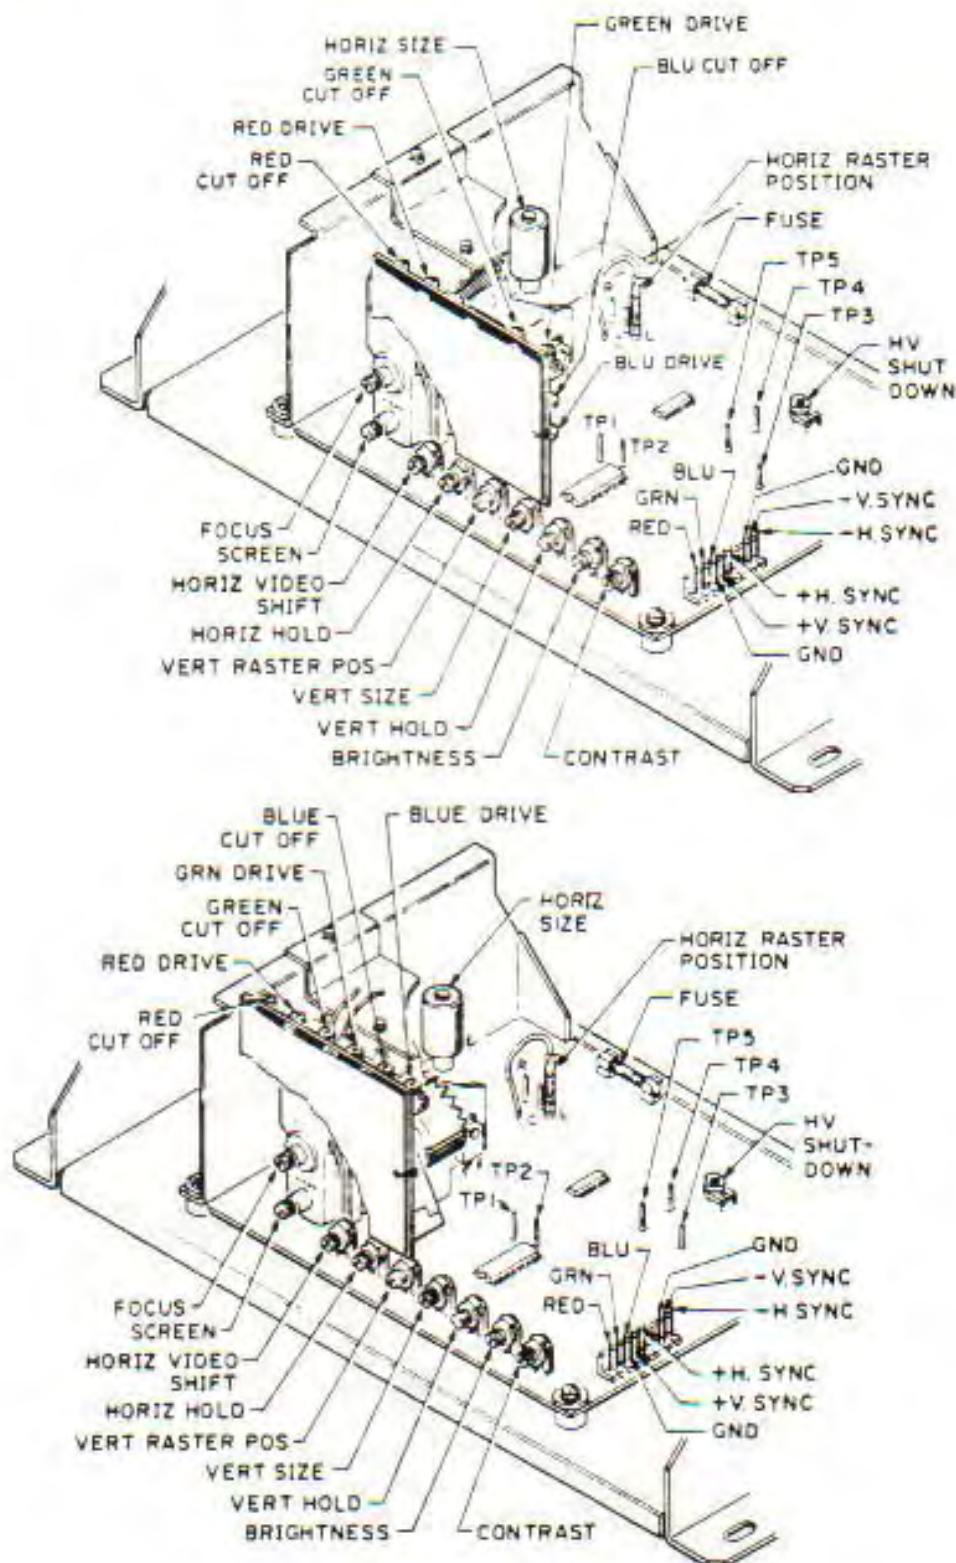

ADJUSTING THE ACCELERATOR/BRAKE

Make adjustments of the accelerator/brake by using the following procedure: Perform the V.R. numerical adjustments in the test mode's INPUT TEST screen.

- (1) Loosen SCREW "A" of the VR BRACKET, turn GEAR "A" and make sure that the on-screen numerical value becomes approximately 20H. When fastening the screw, adjust the gear backlash.
- (2) Then, loosen SCREW "B", turn GEAR "B" and make time adjustments to 20H \pm 4.

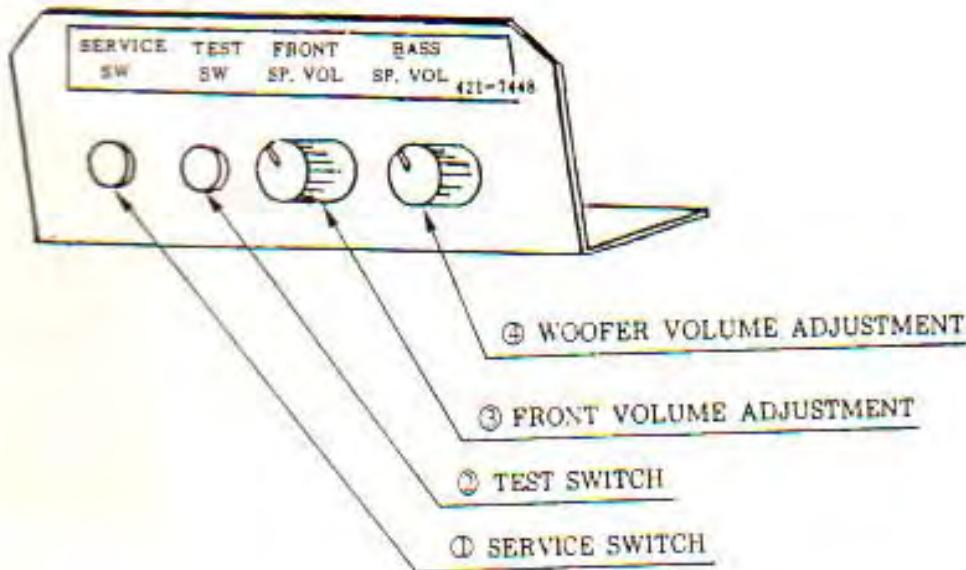

Reference Values											
ACCELERATOR		(OVERCOH)									
BRAKE		ICH	IDH	IEH	IFH	20H	21H	22H	23H	24H	Maximum (OVERC0H)
Allowable adjustment range											

9. DESCRIPTION OF 19 INCH MONITOR

10. SERVICE SWITCHES

Open the COIN CHUTE DOOR, and the following SERVICE SWITCHES' layout will appear:

- (1) SERVICE SWITCH.....Used for the purpose of servicing and increasing the credits without registering on the meter (this allows you to check the game).
- (2) TEST SWITCH.....For the operation of this switch, see SELF-TEST.
- (3) VOLUME ADJUSTMENT.....Used for adjusting the volume of the speaker.
- (4) WOOFER VOLUME
ADJUSTMENT,Used for adjusting the volume of the WOOFER SPEAKER.

11. DIP SWITCH SETTING

12. TEST MODE

This test mainly checks the operation of game PCB's, discovers defects if any, and also checks monitor colors and audio quality. In addition, this test mode includes the item in which game setting changes are made.

A. SELECTION OF TEST ITEM

1. Push the TEST SW button to display the test menu.

2. Press the SERVICE SW or START SW to move the ">" mark downward. Bring the arrow to the desired test item and push the TEST SW again.
3. To end the test, bring the ">" to EXIT and push the TEST SW.

B. EXPLANATION OF EACH TEST

1. OPERATOR SCREENS (BOOKKEEPING)

This allows for BOOKKEEPING of the number of game plays, game time, etc. Push the START SW to proceed to the next page. This page refers to the BOOKKEEPING of the number of coins and credits.

BOOKKEEPING			PAGE 1
COIN CHUTE 1	①	1238	
COIN CHUTE 2	②	10	
COIN CREDITS	③	620	
SERVICE CREDITS	④	1916	
TOTAL CREDITS	⑤	2536	
TOTAL TIME	⑥	7D10H06M14S	

- ① Number of coins put in COIN CHUTE 1.
- ② Number of coins put in COIN CHUTE 2.
- ③ Number of credits based on the number of coins put in.
- ④ Credits registered through the use of the SERVICE SW.
- ⑤ Total of ③ and ④.
- ⑥ Total time during which the machine was energized.

This page refers to BOOKKEEPING of the number of games, and scores.

BOOKKEEPING			PAGE 2

4. GAME OPTION SETTING

Performs the setting of the game contents.

① PLAY MODE ----- SINGLE PLAY

Signifies that the machine functions independently.

② GAME DIFFICULTY

The game's overall difficulty level can be set to any one of the following:
EASY/NORMAL/HARD/VERY HARD.

③ QUALIFICATION LIMIT

The Preliminary race's qualification time can be set (the time can be set to 40 ~ 55 seconds).

④ IF OVER LIMIT

Either GAME OVER or RESTART from the 16th position can be preset in the case where the player exceeds the Preliminary Qualification time.

⑤ AWARD SUPER LICENSE

This is for the purpose of future expansion.

⑥ PLAYER'S PATH CORRECTION

The car's steering adjustment can be set to VERY LIGHT/LIGHT/MEDIUM/STRONG.

⑦ ADVERTISE SOUND

ON/OFF of the sound effects emitted during the time in which the game is not played, can be set. However, even if this setting is off, the title music only will continue to play.

GAME OPTION SETTING

PLAY MODE	-----	SINGLE PLAY
GAME DIFFICULTY		NORMAL
QUALIFICATION LIMIT		45 SECONDS
IF OVER LIMIT		16TH START
AWARD SUPER LICENSE		YES
PLAYER'S PATH CORRECTION		MEDIUM
ADVERTISE SOUND		ON

5. INPUT TEST

Indicates the status of each switch and potentiometer.

INPUT TEST			
TEST	①	SW items	
SERVICE			
START			
SHIFT DOWN	ON	②	
SHIFT UP			
COIN CHUTE 1			
COIN CHUTE 2			
③			
HANDLE			
ACCELE	80	④	FF
BRAKE	20	00	FF
	20	00	FF

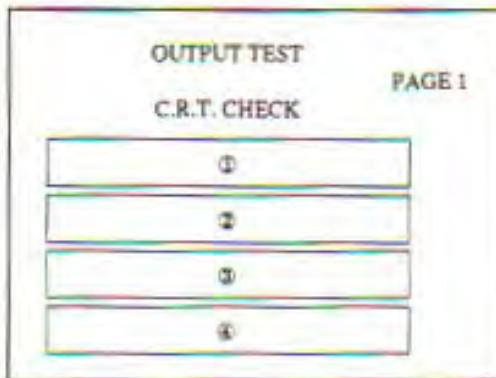

- ① SW items
- ② Status (ON/OFF)
- ③ Potentiometer items
- ④ Present value (hexadecimal)

6. OUTPUT TEST

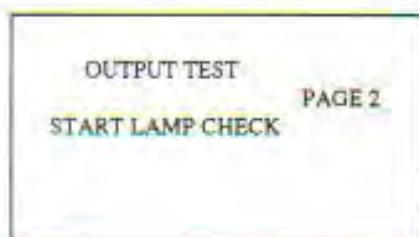

Checks the operation of the START LAMP, monitor adjustments, and audio quality.
When this test item is selected, the following will first be displayed on the screen:

- ① RED Brightens starting from the left towards the right.
- ② GREEN
- ③ BLUE
- ④ WHITE

To proceed to the next page, press the START SW.

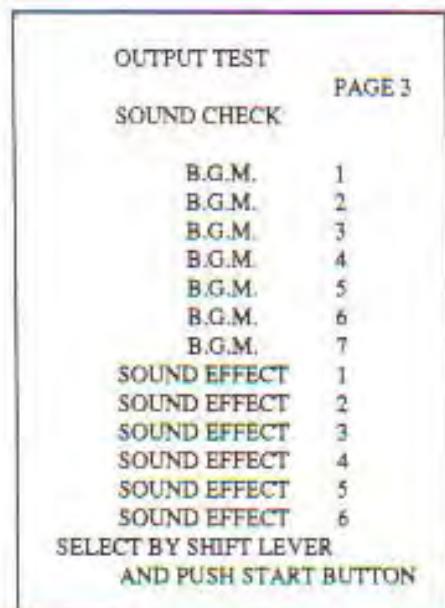

In this page, the START SW lamp goes ON and OFF.

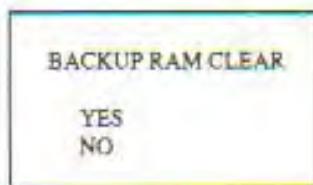

To display the next page, press the START SW.

In this page, the sound check can be performed. By using the SHIFT SW, bring the ">" mark to the desired test item and push the START SW. There are 8 items of B.G.M., 11 SOUND EFFECTs, 22 VOICEs, and 6 SOUND CONTROLS.

7. BACKUP RAM CLEAR

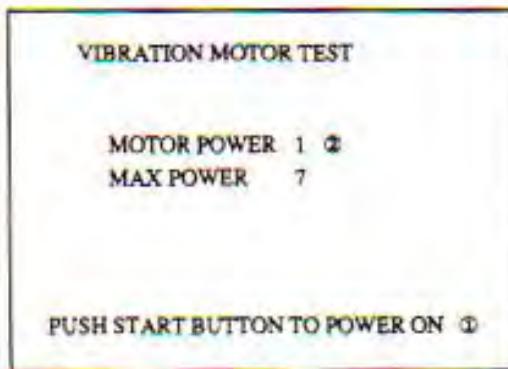

BOOKKEEPING DATA can be cleared by pushing the START SW, bringing ">" to YES (when not clearing, to "NO") and pushing the TEST SW.

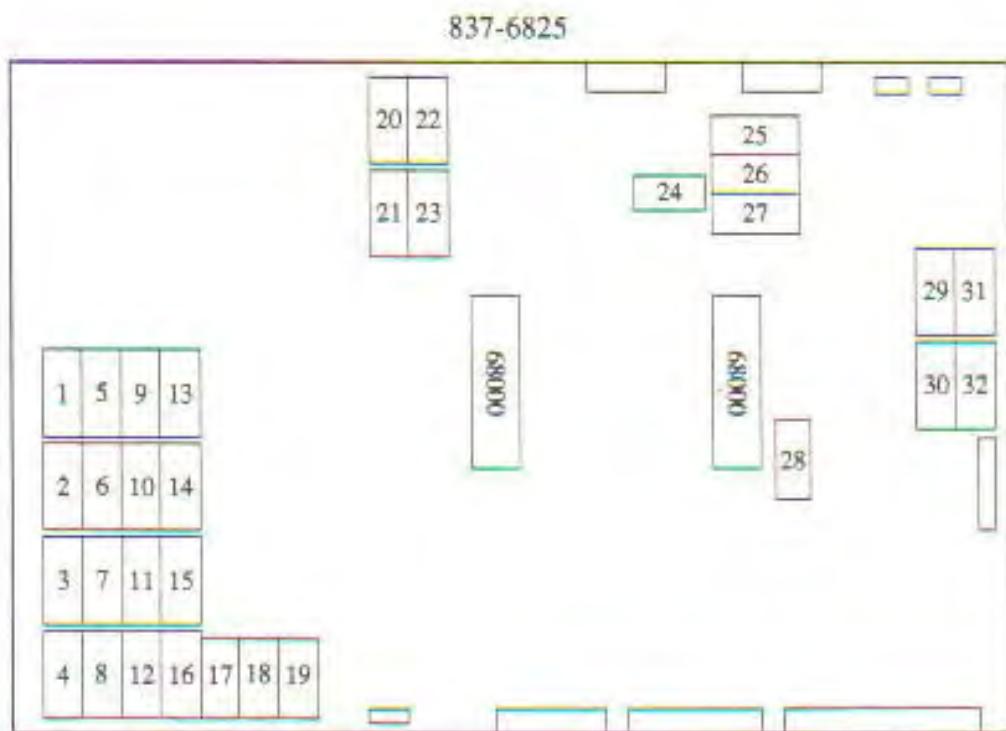

8. AIR DRIVE MOVEMENT CHECK

The VIBRATION MOTOR function can be checked.

- ① By pushing the START SW, the MOTOR power can be turned ON and OFF.
- ② By using the SHIFT LEVER, the MOTOR revolutions can be changed to 7 speeds (steps).
