If you lose a Charlie before completing a stage, the timer/bonus setting is reduced to 5,000 points. If you successfully complete a stage without losing a Charlie, 2,000 bonus points are awarded. A bonus Charlie is awarded after every 20,000 points.

After successfully completing all 4 stunts, the game play begins again with the first stunt, only this time it's more difficult. After the game is over, you have 5 seconds to decide if you want to continue or not. You will continue from the place where you lost your last Charlie.
