CONTROLLING YOUR FIGHTER CONT.

CLOSE ATTACKS

Close attacks are special techniques which can only be used when two fighters are right next to each other. These techniques fall into two basic categories: THROWS and HOLDS.

THROWS allow you to grab an opponent and toss them across the room. Some fighters can even do throws in mid-air.

For Example: It is possible for Ryu to grab Ken and throw him over his shoulder. To do the Shoulder Throw, Ryu must push forward against Ken and then you must push the Hard Punch (Fierce) button on your control pad.

HOLDS allow you to grab an opponent and then hit or bite them again and again.

For Example: It is possible for Blanka to bite Guile on the head. To do the Head Bite, Blanka must push forward against Guile and then you must push the Hard Punch (Fierce) button on your control pad.

Practice with your favorite character to discover which throws or holds he or she has.

SPECIAL MOVES

Each character has developed his or her own special moves for use in combat. All the special moves for each character are listed in *The World Warriors* section of this manual. There are also descriptions telling you how to do these special moves.

Below is an example of the diagram for Chun Li's Fireball. The arrows in the diagram indicate the necessary movements on the control pad. Please refer to the movement diagram on page if you are unsure of what the arrows mean.

Example: Chun Li's Fireball

Using the control pad, press ◀▶▶▶▶▶ in one continuous motion and press any punch button.

(Using the control pad, press (back defense), (defensive crouch) (crouch), (offensive crouch), (forward) in one continuous motion and press any punch button.)

Special moves are **very** difficult to learn, so keep practicing them until you get it right.

THE TOURNAMENT BEGINS

Twelve fighters from across the globe have come together to face one another to see which of them has the strength, skill and courage to be crowned champion. Each fighter has mastered different skills and special moves, but it will take more than brute strength to defeat the others and earn the title of Grand Master.

Choose **GAME START** on the title screen and you will be able to select your champion for the tournament. As the tournament begins, your fighter will travel the globe to meet one of the twelve other challengers.

(If a friend wishes to challenge you during the tournament, he can press the **START** button on his controller to interrupt your game.)

When the match begins, you must use your punches, kicks and special moves to knock your opponent flat on his back. Each time you hit him, his energy meter will decrease. Once your opponents energy meter is totally red, he'll be down for the count. Win two out of three rounds and you will be declared the winner and earn the right to face the next challenger.

USING THE V.S. BATTLE MODE

The V.S. Battle allows two players to have a STREET FIGHTER II competition. When the title screen appears, push the control pad UP or DOWN to move the pointer next to V.S. BATTLE and press the **START** button. When the next screen appears, each player chooses the character they wish to use and presses any button to continue to the next screen.

On the next screen, there are two options; HANDICAP and STAGE SELECT. Player One can press the **SELECT** button to highlight either the HANDICAP or STAGE SELECT option.

HANDICAP

When the HANDICAP option is highlighted, both players can press left or right on the control pad to increase or decrease the amount of stars. The number of stars showing determines the amount of damage a player's punches and kicks will do. The higher the number of stars, the greater the amount of damage the punches and kicks will do.

This option allows two players of different skill levels to have an even match.

STAGE SELECT

When the STAGE SELECT option is highlighted, Player One can select the location of the match by pressing the control pad in any direction. This option allows you to select the location of your fight.

After all the choices have been made, Player One can begin the match by pressing the **START** button.

USING THE OPTION MODE

The Option Mode allows you to change certain aspects of the game. When the title screen appears, push the control pad UP or DOWN to move the marker next to **OPTION** and press the **START** button. When the next screen appears, push the control pad UP or DOWN to highlight the option you wish to change.

DIFFICULTY

This option changes the difficulty of the computer opponent. Push the control pad left or right to highlight the number of stars. The more stars you highlight, the more difficult the opponents will be to defeat.
