Mission Profile

Rebel forces have invaded your country. Their plan is to overthrow the government and replace it with their cruel and corrupt dictator . . . who will stop at nothing to get what he wants!

The rebels have won battle after battle, rolling over your country's troops with superior forces of tanks, helicopters, and huge mobile bases that act as nerve centers from which they crush your country's defenses. In only a matter of days, the invaders will be knocking at your capitol's doorstep. But there is one last ray of hope. You.

You are the finest helicopter pilot alive, a battle-scarred veteran of countless skirmishes; the one they call the Gunship Gladiator. Your mission: pilot "Thunder Blade," an advanced attack helicopter . . . in a you - against them battle to rid your homeland of the invading hoards.

You must single-handedly blast your way through the enemy's defenses. To rid your country of the rebel menace once and for all, find and destroy their secret mobile strongholds.

Object

Thunder Blade consists of four stages:

Stage 1: Urban Combat

Stage 2: Mountain/Desert

Stage 3: River Delta

Stage 4. Refinery

In each stage, you will do battle with both ground and air forces.

Scenes are presented in two fashions: vertically and horizontally.

At the end of each stage you will engage in combat with one of the enemy's super fortresses.

Thunder Blade starts out with three helicopters. The game is over when all three are destroyed, or when the enemy's last stronghold is defeated. After the first 500,000 points are scored, you will be awarded an extra helicopter, plus one extra helicopter for every million points scored after that.

Taking Control

Thunder Blade is a one-person game. Press Button 1 on the Control Pad to start the action.

D-Button:

- Moves Thunder Blade in 8 directions.

Button 1:

- Fires the Chain Cannon.

Button 2:

- Fires Straight Line air-to-ground missiles.

Your Gunship

Thunder Blade's Chain Cannon is a rapid-fire 30 mm automatic weapon of frightening destructive power. It can demolish an enemy helicopter or airplane with one quick burst.

Thunder Blade is also supplied with unlimited Straight Line air-to-ground missiles. To strike a target at land or at sea, position yourself in a direct line with the enemy's vehicle and press Button 2. Missiles aren't well suited for rapid fire, so timing is of the essence. Missiles cannot shoot at enemy aircraft . . . only ground craft.

The most effective method of destroying the enemy is to use the Chain Cannon on flying

objects and Straight Line missiles on the enemies on land or sea.
