EARTH IN PERIL!

The year is AD 21XX ...

The galaxy is at peace after centuries of fighting the Reploid Wars ...

The moon is the center of a swarm of orbiting space colonies.

The largest, a massive colony named Eurasia, is undergoing extensive renovation to make it the most colossal and most advanced of all the orbiting outposts.

When an unknown evil force occupies Eurasia, the peace collapses! Eurasia's artificial gravity device is wrecked. The colony spins out of orbit, and is now headed on a collision course toward Earth!

The outpost will hit Earth in 24 hours. If they collide, Earth could be totally destroyed. It could even vanish!

The only way to shield Earth is to deploy Enigma, an ancient particle cannon left over from the Reploid Wars.

The future of the planet is entrusted to Mega Man X and Zero. Can they save the planet?

Collect the parts to restart Enigma and halt the hurtling space outpost Eurasia before it annihilates Earth!

NEW IN MEGA MAN X5!

- ▶ Mega Man X and Zero are both playable characters. You can choose either character at the beginning of every stage.
- ▶ Game events and endings vary depending on how fast you complete a stage.
- ▶ When you defeat a boss character, you get special parts that you can use and combine to create new weapons and parts.

HEROES

MEGA MAN X

Mega Man X is a Reploid leader of the 17th Unit. Although as a Hunter he is ranked Class B because he dislikes combat, he actually has ferocious fighting ability.

SIGNAS

When the previous general of the Hunters resigned to take command of the Reploids War, Signas was selected for the general's post. Although his fighting abilities have not yet reached their peak, he has the most precise CPU of all existing Reploids.

ZERO

Zero is the leader of Zero Unit and a Special Class A Hunter. He is always cool-headed and accomplishes his mission without the slightest hesitation.

ALIA

Alia started out as a researcher in Reploid engineering. She has mastered all programming languages and has extensive technical knowledge. She has been chosen as a navigator for the Hunters.

DOUGLAS

Douglas is a mechanic who makes and maintains everything for Hunters from weapons and vehicles to facilities. He makes power-up parts for Mega Man X and Zero.

DYNAMO

Dynamo is a mercenary hired by an unknown agency. Though he is a trouble-maker, his skills as a Hunter are higher than Special Class A. He hangs around with Mega Man X and Zero to bother them.

LIFESAVER

Lifesaver supports Hunters by doing maintenance on them and developing virus vaccines. He is suspicious of Zero's vaccine reaction.

You can create armor by acquiring data files found in Light Capsules hidden somewhere in each stage. There are 3 types of armor: FORCE, FALCON and GAIA. To create each armor you must collect its 4 data files: HEAD, BODY, ARM and FOOT. Zero can acquire data files but cannot equip armor. You can equip armor in the Player Setup screen (page 8). Once your character's armor is equipped, you cannot change it until you complete or exit the stage. Each armor has different characteristics. Certain places and items can only be reached by wearing the correct armor. Learn the proper armor to use depending on the stage and situation.

FORCE ARMOR

Normal armor good for using Special Weapons. You must start the game as Mega Man X in order to use Force Armor. While wearing Force Armor:

- ▶ You can hover by pressing the Jump button while jumping. You will automatically fall after awhile, or you can manually fall by pressing the Jump button again.
- ▶ You can charge a Special Weapon by holding the Special Weapon button.

FALCON ARMOR

Light, with excellent mobility. While wearing Falcon Armor:

- ▶ You can fly by pressing the Jump button while jumping, and using the Directional button. You can use a Body Crush attack while flying, and also reach otherwise inaccessible places.
- ▶ You cannot charge a Special Weapon.

GAIA ARMOR

A heavy armor with enhanced armor plate. While wearing Gaia Armor:

- ▶ You cannot charge a Special Weapon.
- ▶ You won't take damage from thorn traps.
- ▶ You can push a special block by dashing toward it. You can also destroy a special block with a charge shot.

ZERO'S SPECIAL ATTACKS

Zero can learn Special Attacks from DNA Programs obtained from boss characters. You can view the Special Attack commands in the Weapon Select screen (page 13).

NOTE: The final big slash of Zero's Special Combos and Special Moves cannot be canceled.

BOSS CHARACTERS

CRESCENT GRIZZLY

This opponent's greatest pleasure is fighting strong opponents. When he's not fighting, Crescent Grizzly keeps busy selling the weapons he has won. He can dig and move through the ground with his drill arm. This arm also fires the Crescent Shot, which shreds whatever it hits.

MEGA MAN X – CRESCENT SHOT
ZERO – MIKAZUKIZAN

A useful weapon which rapidly discharges bullets in 3 directions.

VOLT KRAKEN

Formerly a Replid Hunter, Volt Kraken resigned because he had doubts about his job. He then became a researcher and led a peaceful life far from fighting. His weapon Tri-Thunder, an enhanced version of his tentacles, is a super magnetic energy shot.

MEGA MAN X – TRI-THUNDER
ZERO – DENJIN

This weapon discharges an electrical shock in three directions, which transforms into an energy ball on contact.

SHINING HOTARUNICUS

He is an authority in laser engineering. However, he is so afraid of his inventions being used as weapons that his experimental results hardly ever see the light of day. His weapon Will Laser is a firefly-shaped unit which can be remote-controlled to cover Hotarunicus' low mobility.

MEGA MAN X – WILL LASER
ZERO – MESSENKO

Remote-control this firefly-shaped unit to attack. While using the unit, your character cannot move.

TIDAL MAKKOEEN

Tidal Makkoeen is the chief of the oceanographic museum and captain of the maritime security force. He can be reckless, and he's never free from quarrels with the Repli-Sea Force. His main weapon Gel Shaver slides on the ground as if shaving off slices of Earth.

MEGA MAN X – GEL SHAVER
ZERO – HISUISHO

As this weapon moves along the ground, it destroys enemies below.

SPIRAL PEGACION

He is a young leader of the Repli-Air Force with a strong sense of justice. He sometimes makes mistakes due to his energetic fighting spirit. He respects the memory of Carnel, his chief who was killed in action. Wing Spiral, his main weapon, causes a strong tornado that instantly churns everything up into the air.

MEGA MAN X – WING SPIRAL ZERO – SHIPUU

Discharges a tornado that defeats enemies above.

SPIKE ROSERED

Spike was born as a result of a rare mutation of a unit that controls nature in a jungle, a reloid and sigma virus. The process of the mutation has not been discovered, and the chance exists that his mysterious evolution will create a threat even more frightening than the sigma virus. Spike Rope is a powerful weapon that inflicts successive damage on opponents.

MEGA MAN X – SPIKE ROPE ZERO – SOGENMU

Though its range is short, its successive damage is effective against enemies with high endurance.

DARK NECROBAT

Dark Necrobat was created by Sigma three years ago, but he escaped from Sigma's control and has been in hiding since that time. Sigma thought Necrobat wouldn't be a serious fighting power and forgot about him. Dark Necrobat can use Dark Hold to stop time for a short while.

MEGA MAN X – DARK HOLD ZERO – DARK HOLD

Though able to halt enemies' movements for awhile, this weapon doesn't work against powerful enemies such as boss characters.

BURN DINOEX

A former member of the disaster countermeasure team, Burn Dinorex was in charge of Sanhouse Mountain, where he had a secret cache to hide weapons he created with magma energy. Grand Fire discharges incandescent flames that continue burning after reaching the ground.

MEGA MAN X – GRAND FIRE ZERO – DANCHIEN

Upon hitting the floor, this weapon explodes and continues burning for awhile. Use it as a trap.

RIDE ARMOR/RIDE CHASER

In certain stages, your character can move on a Ride Armor or Ride Chaser.

RIDE ARMOR: RAIDEN

Move close to the Ride Armor to get on it. To dismount, press the Directional button (↑) + the Jump button (X button default).

While on the Ride Armor, press the Attack button (■ button default) to punch. By repeatedly pressing the Attack button with the correct timing, you can perform a combo. Hold the Attack button briefly and then release it to perform a more powerful attack. While your character is on the Ride Armor, it takes damage instead of your character. After taking a certain amount of damage, the Ride Armor breaks.

RIDE CHASER

While on a Ride Chaser, you can move with the Directional button (←/→), jump with the Jump button (X button default), shoot with the Attack button (■ button default) and perform a wheelie attack with the Dash button (● button default). Your character can take damage while on Ride Chaser.

STRATEGY TIPS

USE PROPER CHARACTER AND ARMOR!

You can change characters and armor for each stage. It is important to use the proper character and armor according to the stage. Life Up items increase your character's max life. Make sure to get them with both Mega Man X and Zero.

FIND OUT ENEMIES' WEAKNESS!

Each enemy is vulnerable to a certain Special Weapon. You will have a tough time, especially when fighting a boss character, if you don't use the correct Special Weapon. It is recommended that you defeat the boss characters who are hardest for you while their level is low.

CUSTOMIZE WITH POWER-UP PARTS!

When you defeat a high-level boss character, you earn a power-up part. These power-up parts need to be equipped in the Player Setup screen (page 8) to take effect. You can equip multiple power-up parts, so try various combinations depending on the situation.

CAN'T BEAT THE GAME!? TRY THIS.

- ▶ Set the GAME LEVEL to EASY and the GAME SPEED to SLOW in Option mode to make your game easier.
- ▶ Are you using a sub-tank? Make sure to have it full before fighting a boss character.
- ▶ Don't hesitate to use Giga Attack in a pinch.
- ▶ Use auto-charge + rapid fire to make Mega Man X's control easier.
