WARNING: READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation 2 console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation 2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

USE OF UNAUTHORIZED PRODUCT:

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

HANDLING YOUR PLAYSTATION 2 FORMAT DISC:

- This disc is intended for use only with PlayStation 2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

TABLE OF CONTENTS

GETTING STARTED

MEMORY CARD slot 2
MEMORY CARD slot 1
disc tray
RESET button
(OPEN) button
USB connector
S400 i LINK connector
controller port 1
controller port 2
Set up your PlayStation®2 computer entertainment system according to the instructions in its Instruction Manual. Make sure the MAIN POWER switch (located on the back of the console) is turned on. Press the RESET button. When the power indicator lights up, press the OPEN button and the disc tray will open. Place the **kill.switch™** disc on the disc tray with the label side facing up. Press the OPEN button again and the disc tray will close. Attach game controllers and other peripherals, as appropriate. Follow on-screen instructions and refer to this manual for information on using the software.

About Progressive Output
Higher video quality can be enjoyed if a component AV cable for PlayStation®2 (SCPH-10100U) and a progressive scan (480p) television set with component video input are used. If a television set without progressive scan (480p) capabilities or a connection other than with a component AV cable is being used, the picture may not display properly in progressive scan mode.
For instructions on how to use the component AV cable to connect the PlayStation®2 to a television set, please consult the instruction manual for the PlayStation®2 or the diagrams included with the component AV cable. Furthermore, please set the Component Video Out settings on the PlayStation®2 to Y Cb/Pb Cr/Pr under System Configuration. Some television sets with component video inputs may not be progressive scan (480p) enabled. Please consult the television set's instruction manual or contact the manufacturer to confirm.

Selecting Progressive Mode
Hold down the ⊗ button and the △ button while the game is booting, and the following prompt will appear: **"Change to Progressive Mode?"** Carefully read the warning on the screen. Select **"Yes"** with the directional buttons and confirm with the ⊗ button to switch to progressive mode. If the screen displays correctly, select **"Yes"** once again. If the screen is scrambled or otherwise displays incorrectly, please press the Reset button on the PlayStation 2 to reboot and enjoy the game in Normal Mode.

QUICK START

In **kill.switch**, you will use the **left** and **right analog stick** simultaneously for **movement** and **aiming**.
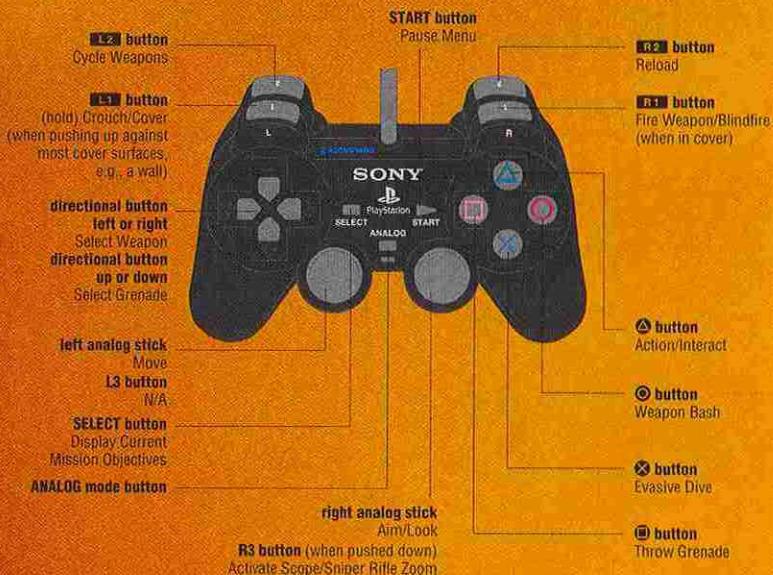

The **L1** and **R1** buttons are used for **taking cover** and **firing**.

The ⊗, ○, □, and △ buttons are used for **evasive diving**, **weapon bashing**, **grenade throwing**, and **interacting**.

The **L2** and **R2** buttons are used for **cycling weapons** and **reloading**.

The **directional buttons** are used for **selecting weapons** and **selecting grenade types**.

BASIC TRAINING

MOVEMENT:
Move the operative by moving the **left
analog stick** in the desired direction.

CROUCHING:
Crouch by pressing and holding the **L1
button**. Make sure that the operative is
not near or facing a cover surface. The
operative moves at a reduced speed while
crouching, but can still perform an
Evasive Dive.

EVASIVE DIVING:
Perform an Evasive Dive by pressing the
✕ button. The operative will dive in the
direction that he is moving.

AIMING AND LOOKING:
Aim and look around by moving the **right
analog stick** in the desired direction.

**WEAPON SCOPE/SNIPER
RIFLE ZOOM:**
Most weapons have a scope or zoom
function. Push the **R3 button** down to
activate it. For the MCRT 300 sniper
rifle, push the **R3 button** down again to
zoom in further.

FIRING:
Fire the operative's weapon by pressing
the **R1 button**. Press once for a single
shot. If the weapon supports it, press
and hold for a continuous burst.

RELOADING:
Press the **R2** button to reload the operative's currently equipped weapon.

WEAPON CYCLING:
Press the **L2** button to cycle through and change the operative's weapon.

WEAPONS SELECTION:
Press the **directional button** left or right to select and change the operative's weapon.

GRENADE THROWING:
Throw a grenade by pressing the ● **button**. Press lightly for a shorter throw. Press hard for a longer throw.

GRENADE TYPE SELECTION:
Press the **directional button** up or down to select and change the operative's grenade type.
OFFENSIVE COVER SYSTEM:
To take cover, move and face the operative near a cover surface such as a wall. Press and hold the **L1** button to make the operative use it for cover. To stop taking cover, release the **L1** button. The operative can also perform an Evasive Dive away from cover.

OFFENSIVE COVER SYSTEM MOVEMENT:
While taking cover, move the **left analog stick** left or right to move in that direction. Press down to crouch. You can continue to move while crouching, but at a reduced speed. Press up to stand if crouched.

To move around the outer edge of cover, move the **left analog stick** left or right to move in that direction until you reach the edge of cover. Continue holding the **left analog stick** in that direction, and press the ▲ **button** to move around to the other side.
OFFENSIVE COVER SYSTEM FIRING:
While taking cover, move the **left analog stick** left or right to move in that direction until you reach the edge of cover. Continue holding the **left analog stick** until the operative leans over. Press the **R1** button to fire. Move the **right analog stick** to aim and look.

If using crouch height cover, you can also move and hold the **left analog stick** up to make the operative rise from the crouch position and take aim. Press the **R1** button to fire. Move the **right analog stick** to aim and look.

You can use a weapon's scope or zoom feature while aiming from cover.

**OFFENSIVE COVER SYSTEM BLINDFIRE:**
While taking cover, move the **left analog stick** left or right to move in that direction until you reach the edge of cover. Do not make the operative lean over. Press the **R1** button to fire. Move the **right analog stick** to direct Blindfire in that general direction.

BASIC TRAINING

If using crouch height cover, press the **R1** button and the operative will remain crouched and fire his weapon above him. Move the **right analog stick** to direct Blindfire in that general direction.
WEAPON BASHING:
To perform a weapon bash on an enemy, press the ⊙ **button**. The operative must be standing close to an enemy for the hit to connect.

ACTION/INTERACT:
The ⊘ **button** makes the operative interact with certain objects in the environment. For example: a door or a gun emplacement.

Some actions require the ⊘ **button** to be held for a certain amount of time before the action can be completed. Press and hold the ⊘ **button** until the action is completed.

GAME PLAY TIPS

Practice moving and looking around until you get the hang of it and can perform both simultaneously. It might seem hard at first, but will soon become second nature after practice.

Almost anything in the environment can be used as cover! Experiment to see what works best in the given situation. All cover surfaces are either standing or crouch height.

Each weapon recoils upward when fired. Instead of pressing and holding down the **R1** button, try using short bursts to control the recoil. Releasing the **R1** button will "re-center" the weapon.

Remember to reload between firefights and **not** during one.

Diving away from grenades is preferable to running away from them. You'll distance yourself away from the blast radius further with a dive.

Most enemies will go down after being hit by a weapon bash. However, getting close to the enemy is another matter entirely!

Action/Interact (e.g., control a gun emplacement, open a door, plant a charge, etc.). **Note:** Some actions may require you to hold the △ **button** for a certain amount of time before the action can be completed.

OTHER

SELECT button
Display Current Mission Objectives

START button
Pause Menu

TITLE SCREEN

Press the **START** button at the Title Screen to access the Main Menu.

MAIN MENU

In the Main Menu, use the **left analog stick** or **directional buttons** to highlight an item. Press the ✕ **button** to select it.

NEW GAME

Begin a brand new game. Before starting, you will be asked to select between the **Normal** or **Hard** difficulty levels. The **Hard** difficulty setting is recommended for players seeking a greater challenge.

Note: The **Reticle Highlight** feature is disabled when playing on the **Hard** difficulty setting.

LOAD GAME

Load a previously saved game, if available.

MISSION SELECT

Start from the beginning of a previously completed mission.

Note: This option will not be available until a mission has been completed once.

OPTIONS MENU

Set and adjust a variety of game settings, all of which are listed below.

Note: Default game settings are in **bold type**.

CONTROLLER SETTINGS

VIBRATION	OFF	**ON**
Set the controller's vibration feature.		
INVERT VERTICAL AXIS	**OFF**	ON
Invert vertical axis of the Aim/Look controls.		
INVERT HORIZONTAL AXIS	**OFF**	ON
Invert horizontal axis of the Aim/Look controls.		
AIM/LOOK SENSITIVITY		
Adjust the speed of the Aim/Look controls.		
RETICLE HIGHLIGHT	OFF	**ON**

If enabled, the Targeting Reticle will turn red when it is aimed directly at an enemy.

Note: The **Reticle Highlight** feature is disabled when playing on the **Hard** difficulty setting.

OPTIONS MENU

Return to the Options Menu

VIDEO OPTIONS

BRIGHTNESS

Adjust the image brightness.

SCREEN RATIO	16:9	**4:3**

Adjust screen ratio to 16:9 (widescreen) or 4:3 (standard).

OPTIONS MENU

Return to the Options Menu.

AUDIO OPTIONS

SOUND EFFECTS VOLUME

Adjust the volume of sound effects and movies.

MUSIC VOLUME

Adjust the volume of the in-game music soundtrack.

OPTIONS MENU

Return to the Options Menu.

CREDITS

Find out who the people behind the game are.

MAIN MENU

Return to the Main Menu.

PAUSE MENU INTERFACE

PAUSE MENU

Press the **START button** to suspend the game and display the Pause Menu. Press the **START button** again or highlight and select Resume to return to the game.

In the Pause Menu, you can set and adjust a variety of game settings as you would from the Options Menu.

Use the **left analog stick** or **directional buttons** to highlight an item. Press the ⊗ **button** to select it.

RESUME
Return to the game.

CONTROLLER SETTINGS
Set and adjust a variety of game settings as you would from the Options Menu.

VIDEO OPTIONS
Set and adjust a variety of game settings as you would from the Options Menu.

AUDIO OPTIONS
Set and adjust a variety of game settings as you would from the Options Menu.

ABORT MISSION
Confirm this option again to quit the mission.

LOADING AND SAVING GAMES
After completing a level during a mission, you will be given the option to save your game.

If you choose to save your game and then decide to stop playing, you can continue from where you left off by using the **LOAD GAME** option in the Main Menu.

Press left or right on the **directional buttons** to select from your available saved games. Press the ⊗ **button** to load the saved game. You will resume play from that point in the game.

HUD Elements

The HUD is your window into an operative's world. The HUD is essential in monitoring the status of an operative and his or her mission. You should take the time to familiarize yourself with the basic function of each HUD Element.

Health Indicator

The blue Health Indicator displays the operative's current health. An operative's health status is at 100% when the blue bar is full.

If an operative takes damage in the field, the blue bar depletes and the Health Indicator becomes smaller.

As you know, each operative has been the recipient of the latest advances in medical nanotechnology. Wounds and damage taken in the field will heal to a certain degree thanks to the nanotech in the operative's system. The black portion underneath the blue bar shows the amount of health that can be recovered through nanotech.

To restore or recover additional health in the field, the operative should seek out aid until proper treatment can be obtained.

Despite their accelerated healing abilities, you should remember that operatives are **not** superhuman. Successive trauma to an operative's system will negate or overload the nanotech, causing the body to go into shock and shut down.

Current Mission Objective

Mission Objectives are displayed underneath the Health Indicator.

Your Commanding Officer (CO) or Base will relay Mission Objectives to the operative through the Neural Interface/Link via a secure and encrypted Datastream transmission. Only the CO, yourself, and the operative will know the contents of the transmission.

Weapon Indicator and Ammo Bar/Counter Grenade Type and Number

You can review an operative's weapon loadout with these indicators.

The operative's currently equipped weapon, its remaining ammunition, the current type of grenade being used, along with their remaining number, are all displayed simultaneously here.

The weapon's ammo bar depletes as rounds are spent. The counter next to it indicates the total number of rounds left. The number of grenades will decrease for that particular type as they are used.

Of course, if the operative obtains additional weapons, ammunition, or grenades, the indicators will reflect those changes instantaneously.

As a safeguard, the Weapon Indicator will begin to blink as a reminder for the operative to reload a weapon.

The blinking will become more frequent and flash red as a weapon's clip comes closer to being emptied.

To conserve HUD space, the indicators will "close up" after a few moments. The indicators will "open up" again if a different weapon or grenade type is selected.

Targeting Reticle

The targeting reticle is used for aiming an operative's weapon.

The shape of the targeting reticle will change depending on the weapon currently being used.

The targeting reticle can also change in size. The larger the reticle, the more inaccurate the shot an operative will take if he fires his weapon at that time.

By default, the targeting reticle will turn red to indicate that it is being aimed directly at a hostile threat.

If you disable the highlight function of the targeting reticle, it will not turn red.

Threat Indicator

Indicators may pop up if a threat to the operative happens "off-screen" in relation to the HUD viewing area. Threat Indicators are mostly for your reference, to aid the operative in assessing and determining the location of threats such as hostile fire.

Pickup Message

Non-mission objective or miscellaneous types of messages may show here from time to time. (e.g., items an operative acquires during a mission will be displayed here as they are taken into his inventory)

Timer (not always available)

Certain missions may have a time-related element to them. The timer will display the amount of time remaining to complete a certain objective or mission.

Scope/Sniper Rifle Zoom View

The operative has access to weapons that may utilize a scope or zoom view, such as a sniper rifle. This type of close-up view is useful when attempting to make more precise and accurate shots in the field.

TRAINING SIMULATOR DATASTREAM ADDENDUM

Before going out into the field, remember to update BABEL translation software to the latest version. As of this writing, Version 1.21 of BABEL now recognizes close to 6,500 known languages, allowing you to comprehend each of them in your native tongue. In most of your cases, you will **hear** English.

Per her request, here are some closing words from the Engine Project lead, Lynn Takamura. You'll recognize her as the voice behind **NADA**, the **N**eural Interface/Link **A**vatar/**D**atastream **A**gent Construct.

Boys and girls...

This is not a game.

Operatives are still human.

They might be equipped with the latest in 'top-secret' military gear.
They might have abilities you and I don't possess.
They might just be considered 'special'.

But they are not superhuman.

The 'tech', as it's been called, should be handled with care. Should a situation arise in which manual operations are necessary, it is highly recommended that the operatives not be used to "run and gun" out there in the field.

Use your head.

Your primary responsibility is support.

Make sure that the mission gets done, and the operative comes home.

Do your job, and do it well. That's what you're here for.

One more thing, something any op will tell you:

If the situation hits the fan, and you find yourself out there on your own, alone and outnumbered with no support... Remember this:

Cover is your only ally.

The environment can be used to your advantage.

Utilize the terrain.

Take cover.
Take aim.
Take over.
