THE STORY

Take on the role of Brad, post-apocalyptic truck driver and all-round hard guy. Evil mutants have stolen the only thing you really care about. The muties stole your truck, and now you're well hacked off. You can not rest until you have reclaimed your property.

Battle your way through the zombie infested forest, then through the parched wasteland before reaching your ultimate objective, the Mutant Fortress itself.

THE GAME

C64 owners control Brad using a joystick connected in port 2. Amstrad and Spectrum users can either use a joystick or redefinable keys.

You must make your way to the far right of each level where you will go up against an evil end of level guardian, at the end of level 3 you must fight the evil knife wielding head mutie Quintin Smythe who was responsible for hijacking your truck.

Contact with a mutie, zombie or lizard-man will drain your strength, only in level 3 will the muties actually fire back at you.

Scattered around each level you will find extra weapons, ammunition, first-aid kits, body armour and other useful objects. Avoid nuclear waste drums, mines and man traps, these will deplete your energy. The display scrolls in both directions so you can go back to collect any objects you may have missed.

Information is displayed at the bottom of the screen, this relates to your current weapon, strength, radiation level and ammunition.
