

SHORT'S FUSE

© DOLLARSOFT

THE GAME

When Boris set off the first detonator, an irreversible chain reaction was initiated, with each fuse lasting only nine seconds. If you can guide Sam Short to the detonator – before the bomb explodes – he will disable it.

Unfortunately you'll still be in a bit of a bind because Boris has ensured that another detonator in that same location will become live, leaving Sam with – you've guessed it – nine seconds to defuse it.

When Sam has defused all the detonators, he will – being a good-hearted chap – move on to another beleaguered spot. The rest is up to you . . .
