HOW TO LOAD

Place the cassette in the tape recorder and make sure that the tape is fully rewound. Hold down the CTRL key and press the small ENTER key, release both keys and press the PLAY button on the tape recorder. The program loads and runs automatically.

PLAYING THE GAME

It is your task as Sir Lancelot to investigate the 24 rooms in the castle and to collect all the things of use to you as you go.

These items come in many forms, but you will be able to recognise them on the screen as they flash.

This task sounds simple, but to pass through each room you must collect all the items present in that room and then reach the exit. The other problems you will have to face are the 'animals' guarding the treasure, and the fact that you only have a limited time in each

fact that you only have a limited time in each room.

Fortunately, you are given three life restorers—these are your only hope of survival. Every 2000 points you gain earns another life restorer.

You may choose the order in which you search the rooms by selecting different magic items in the first room. These items

transport you to one of 23 other rooms, and when all the items have been collected from all these rooms you will be whisked away to the final room.

HOW TO CONTROL SIR LANCELOT

Either joystick port may be used to control Sir Lancelot, alternatively the following keys may be used:

Z — move left X — move right

\ — iump

ENTER — pause the game
