© Created by DAVE HARPER 1987

THE GAME

At the edge of the federation star boundary lies the colonial planet system 'Flavius V', vital for its raw material mines.

The colonists of Flavius V have been forced to flee their planets in the face of an invasion by the forces of the evil emperor, Zircon. As Commander-in-Chief of the Federation Liberation Forces, your task is to clear all sectors of Flavius V of Zircon craft and so allow the colonists to return.

The presence of Zircon Forces is detected and measured by the amount of energy they generate. Beware though, a Sector must be totally clear of enemy energy to be considered safe, as the Zircon's have the ability to reproduce themselves from the smallest amount of detectable energy.
