F14 TOMCAT

In the later part of the 20th century Grumman's F14 TOMCAT represented the US Navys most potent fighter. F14 TOMCAT from players places you in the cockpit of a specially adapted version of this devastating fighter plane.

The standard F14+2d (PLAYERS AIR FORCE ISSUE), is equipped with a single forward mounted high-power machine gun. By flying very low over specially constructed weapon bases the F14+2d can be fitted with custom built magno-weapons. These are bolted to the fighter in mid flight.

THE MISSION

In the first half of the 21st Century, it became possible through advances in material technology to construct permanent artificial islands very cheaply. Due to the spiralling cost of real-estate many of these islands were built. It is one of these artificial islands that is presently cause for concern.

The island, locally known as ARTROCK 6, is a local defence installation and is completely automated. A freak storm, damaged the controlling software and as a result, the island has turned rogue.

Despite the substantial dollar value attached to the installation, a few regrettable incidents involving local shipping have forced us to destroy the island.

This task has fallen to you, the best low level pilot in the free world. Using a specially adapted F14 TOMCAT fighter with advanced terrain following radar and a special complement of weaponry, you must destroy the island. Extra weaponry may be requisitioned.
