### GAME PLAY

The object of this game is to memorize which seven of the 12 houses the ladies of the night go to; get some money from the instant teller; locate and enter the Cathouses one at a time and **SCORE**. Going into a non-Cathouse, or returning to a previously entered cathouse or not having the \$20. it takes to turn the trick will

cause the policemen to chase you. Always be sure you have enough money — you can go to the instant teller as often as you like and withdraw funds in \$55 increments. When you have found all seven houses and **SCORED**, the girls will seek out 7 different houses. If you get busted, you lose all of your money when you go to jail. So after you get out of jail you must go to the instant teller and get some more money. After you enter a Cathouse the screen image changes to a bed with a couple on it. You **SCORE** by moving the joystick up and down. The number of points you get varies; you can have a premature climax (3 points) or get 15 points or more for each trick. When your score totals more than 300 points, everytime you leave a cathouse the siren will sound and you will be chased by the cops until you reach 1000 points. This will again be repeated at 1300 to 2000 points, 2300 to 3000, and so on.

## GAME HINTS

At the start of the game there are twelve houses displayed. At the lower left is an instant teller with a man which you control standing beside it and two cops walking around. In the lower right is the jail. In the upper left of the screen are three **SYMBOLS** indicating the number of turns remaining. You lose one turn each time you are busted. Your score is displayed in the top center of the screen.

The first thing that happens, upon starting the game, is that seven girls, one at a time will leave the jail and go to one of the 12 houses until all seven have each found a house. The mugger is in the jail pacing back and forth.

Now the game can begin. The first thing you must do is get some money. You steer the man over to the teller and each time you touch the teller with the man you get \$55. You can have up to \$220 on you at one time; however if you have more than \$100 the mugger will come out of the jail and start looking for you. Each time

you enter a Cathouse you are charged \$20 so you have to remember how much money you have. When you get below \$100 the mugger will go back to the jail until you once again have more than \$100 on you. The amount of money you have is displayed in place of the score in a green field at the top of the screen anytime the man is in front of the instant teller.

If you enter a non-Cathouse your man will be thrown out immediately and will sit in front of that house for a time trying to decide what to do. This is a time when the man has the best chance of getting busted by the cops because the siren will sound and the cops will chase him every time. So be careful.

You can have the man run by pressing the red button. This is very useful for getting away from the police or the mugger. However, after about two seconds the police will start to chase the man again for about four seconds.

When the mugger starts to look for the man he will come out of the jail and search for

about eight seconds. Then he will go back toward the jail and in a second or two, if you still have more than \$100, start looking for the man again.

When you are being chased by the police or the mugger you can try to hide the man behind a house and they will get confused which will cause them to stop chasing the man and the mugger will give up and start to go back toward the jail.

You can get busted four times and the fourth time the game ends. If you are mugged just once the game ends.
