

UNIVERSAL CHAOS™

© TELEGAMES INSTRUCTIONS

- (1) With the POWER switch off, plug your cartridge into your 2600 with the label side facing up.
- (2) Turn the POWER switch on.
- (3) Press the SELECT switch to choose the 1 Player option (left controller) or the 2 Player option (two players alternate turns with two joysticks).
- (4) Press the RESET switch to start the game. (Press the joystick firebutton to restart the game after you lose).

Use your joystick to pilot your battle coupe through the streets of Phenix. Your coupe will travel in the same direction as you have indicated with your joystick, i.e. up/down/right/left. Holding the joystick in one direction will increase the speed of your coupe in that direction.

Engage the invading Mortii spacecraft and fire your photon cannon by pressing the firebutton on your joystick. (WARNING: Your photon cannon cannot discharge again after firing until the prior shot has contacted an enemy or other obstacle, so wait for close range shots when you can). As the number of Mortii spacecraft decreases, the speed and homing ability of the survivors increase. Randomly, the Mortii Warlord will appear from his secret headquarters to assess the damage you have created. The sooner you blast the warlord, the more bonus points you earn.

You will receive bonus points after you destroy a complete wave of enemy spacecraft, and you will warp to another sector of the City in even greater need of your assistance. BUT BE WARNED: each new wave of assault is more skilled in war so you will need to resort to a good strategy as well as a quick trigger finger to survive.

GOOD LUCK, YOU ARE OUR ONLY HOPE!
