## **SPACE CAVERN™**

You are in command of a Mark XIV intergalactic star-cruiser in an uncharted quadrant of outer space. You land on a mysterious planet riddled with a subterranean maze of tunnels and caverns inhabited by savage Electrosauri whose horns generate electro-molecular charges capable of disintegrating you and your crew. Your photon ray pistol is activated by the joystick and the fire button. The iridescent eyes of the Electrosauri light the cavern walls with eerie flashes as they stalk you, their horns crackling and sizzling. If even one blast of electro-molecular energy strikes you, your skeleton will glow inside your body as the bio-molecular compounds of your body disintegrate. **WARNING:** Beware the savage attack of the shaggy marsupods.

### **THE SET-UP**

Space Cavern™ is played with one or two players using the Joystick Controller. Be sure the power is off when you insert or remove the Space Cavern™ cartridge from your video game system.

### **THE DIFFICULTY SWITCH**

The difficulty switch controls the speed of the electro-molecular charges fired down at you by the Electrosauri. Placing the switch in the "B" position will slow down the fusillade fired at your spaceman, while the frenzied "A" mode will provide the greatest challenge for veteran players.

# THE JOYSTICK CONTROLLER

Hold your Joystick Controller so that the red "FIRE" button is in the upper left-hand corner. Use this button to fire your laser up at the Electrosauri above. Use your joystick to move your spaceman to the left and

right. Pulling back toward yourself causes him to fire his disrupter ray at the shaggy marsupods who rush

from the right, while pushing forward causes him to pivot and fire to the left. NOTE: You do not have

to depress the red firing button to fire left or right with your disrupter ray.

## CREW ROSTER

You land with a crew of four men, and can replace lost men every time you earn 20,000 points. But four men at any one time is your maximum force. Two-player games are played just like one-player games, with players alternating every time they lose a man.

## SCORING

Every large Electrosaurus you destroy earns you 115 points, while smaller ones are worth 165 points. Shaggy marsupods who rush at your spaceman from caves at his left and right will earn you 200 points if you can get them before they get you.
