

The Officially Licenced Computer Game Version
of the Universal Pictures  Television Series

AIRWOLF™*

SCENARIO

As Stringfellow Hawke, a former Vietnam chopper pilot, and the only man in the free world trained to fly the billion dollar helicopter, 'AIRWOLF' you have been assigned a dangerous mission by the FIRM.

Five important U.S. scientists are being held hostage on a remote Pacific island, protected by a complex defensive shield. As Hawke you must guide AIRWOLF using full stealth capabilities, on a series of perilous missions and bring about the release of each scientist in turn. Only destruction of the defense control boxes located behind a protective shield inside the islands cliff face will allow AIRWOLF to descend to the nissen hut where the scientists are held.
