HERE'S HOW TO PLAY

It's no Cell-ibration!

Here's what you're up against: a typical cell arrangement in a typical maze. No two mazes are exactly alike! High-Tech Anxiety!

It doesn't matter how your Commando got here. What matters is that he must survive. First, there are those robots and skeletons to face. The minute they spot your Commando, they move in!

That fatal touch.

You're in luck! Your first opponents cannot fire at you. But watch out--don't let the mechanical and bony beasties get near your Commando. Their touch is deadly if you move into them. Keep your distance and take careful aim. But be careful--if you hit an enemy, its explosion is deadly to you, too!

An obstruction of justice.

Sometimes robots and skeletons move behind dot walls. No problem--just take aim and fire. Your first shot eliminates a dot. Your second shot eliminates your enemy! Bounce back--bounce right.

Be careful of those solid or dotty white walls. They don't absorb fired shots from you or your opponents. They reflect bullets, which can bounce right back at you! But wait you can use this ricochet effect to advantage. To get an enemy around a corner, use the reflecting wall to ricochet your bullet right on target!

Trapped!

If you find yourself blocked on all sides by dot walls and reflecting walls, you can fire your way out. A minimum of three consecutive dots must be removed before you can pass through up or down. A minimum of five dots must be removed to pass through right or left. But caution--your opponents can knock out dots with their laser bullets, too!

This Way Out.

If you can't take the pressure and want to get out, look for an exit door in one of the outer walls. Then step through. You can also eliminate the dots in any outer wall to create an exit in any direction.

Another maze.

You're not safe yet. Once you enter another cell arrangement, you face a whole new band of enemies, Notice the door through which you entered the new maze. It's now riveted shut and cannot be blasted--it absorbs shots. Nor can it be re-entered--you're trapped! Once you leave a maze behind, you can never return to take care of unfinished business. Our Feature Presentation.

Lucky you--some mazes contain a feature cell at their center. These featured mazes appear between nonfeatured mazes. How many nonfeatured mazes you have to pass through to get to the next featured maze depends on the skill level you're playing:

Skill 1 = one nonfeatured maze
Skill 2 = two nonfeatured mazes
Skill 3 = three nonfeatured mazes
Skill 4 = four nonfeatured mazes

Feature cells to watch for: Big Otto, Power Plant, Computer and Robot Factory.

Freezing the Feature.

You can earn extra points by disabling and freezing the feature at the center of the maze. First eliminate a dot or two blocking the path of your bullet. If your next shot hits the feature, you disable its operation and earn extra points!

Stay alert. Some features offer a surprise when disabled by your bullets. Be on the watch--forewarned is forearmed. Otto-matic Danger!

Evil Otto, the smiling, bouncing face, can enter the maze when you least expect him. He bounces toward your Commando, and nothing can stop him--not even walls or other aliens! Aim carefully and fire laser bullets. It takes three shots to crush Otto's smile and eliminate him. (In Skill 4 games, it takes four shots.) But surprise! Another Evil Otto takes his place and pursues you even faster! Better find a way out of the maze quickly.

No Exit.

There is no real exit from this alien trap. There is only an endless chain of mazes, an endless barrage of opponents, and an endless battle for survival. Final defeat comes only when you have lost all your Commandos.
