

INSTRUCTIONS

How to Load – Please refer to cassette tape label.

INTRODUCTION

Your name is Bond – James Bond, the world's top Secret Agent, and now embarking on one of the most important missions of your career. To fail is the worst thing that can happen to you.

Your objective is to discover what dastardly plot is being hatched by Max Zorin, an unscrupulous European electronics magnate, and prevent him from carrying it out. You learn that the information you need is in three main locations. Paris, where you must make contact with May Day to get a vital clue. The City Hall in San Francisco, where various secrets are hidden, and finally a Silver Mine under Silicon Valley where you piece together your information and finally foil Max Zorin – we all hope!

THE CODES

At the end of the first two games you'll be given a code which you must type in at the start of each new game. This simply tells the program how well you've done in the last game, and passes over various helpful pieces of information. You may play any game at any time, but to be totally successful in the final game you must have done as well as James Bond himself would have! This will become apparent as you play each game. Once you've got the codes, you can always use them again – the numbers are not randomly generated each time. However, you may wish to improve them each time.

THE REAL TIME ELEMENT

Each game is played in real time. You're against the clock – and good times are passed on via the code to give you more time in subsequent games.

YOUR PERFORMANCE

James Bond doesn't exactly die – but he can fail when you play him! He may irrevocably damage his car around Paris – or become engulfed in flames in City Hall. How the real James Bond gets out of these situations without your help (some might say interference!) is left to your imagination. Needless to say, he lives to fight another day, and you can try, try and try again.

LIST OF FEATURES

(different in various games)

Pause – Select this on your menu, and give yourself a break. Open a bottle of Bollinger Champagne, or light a Davidoff cigar. Sit back for thought, and time will stand still.

Abort – So things are a little tricky on this mission and you want a weekend in Acapulco. Select Abort on the menus, press 'fire' twice (not applicable in Paris – you're on holiday anyway) and pack your bags.

Music – You have a choice of "The James Bond Theme" by Monty Norman © 1962 United Partnership Ltd. Reproduced by permission, or the hit single "A View to a Kill" by Duran Duran and John Barry © 1985 Triton Music Ltd/CBS Songs Ltd. Reproduced by permission, at various points in the program.

Controls – All games may be joystick or keyboard operated.

Speech – You'll hear it at various times – listen out!

GAME 1: PARIS CHASE

The Scene is set:

Bond has been briefed by 'M' and has been instructed to find out what Max Zorin's plot is all about. He has lunch in the Eiffel Tower with a friendly Agent who is killed by May Day. Bond chases her up the Tower, but she hurls herself off the top and parachutes to a drop point on the outskirts of Paris. He leaps onto the top of the Tower lift and commandeers a taxi at the bottom. **From then on, you take over.** You can follow her movements with the aid of a radio tracker, which indicates her proximity and her altitude and her shadow will pass over your aerial view. You can see the building in front of you through the windscreens, and your speed, the time and your damage is indicated on the

dash-board. Your objective is to reach the correct drop point exactly at the same time as she does, but be careful. The winds constantly change, and her direction may alter at any time, landing her on any one of a number of possible drop points.

Along your route you will encounter various hazards. The street's one way system is indicated by little yellow arrows, and going against the system may cause the police cars to chase you. Watch out, they may take a pot shot at you! The drivers around Paris are fairly reckless, and the odd Porsche may career into you. There are barriers to avoid, and brushing into buildings will definitely take it out on your blue Renault. Because Bond never travels without a pistol, you can use one here to knock out unwelcome vehicles which may get into your path. Also, being an expert driver, handbrake turns are easy for you, and may get you out of tricky situations!

Controls – for details of joystick or keyboard controls see the title screen.

In the event that you fail to catch May Day the game will automatically start again. Maybe you'll have learnt something! If you do well your code will be important for use in later games. It relates your success to the other programs, in a way that you'll subsequently discover.

GAME 2: CITY HALL

James Bond has travelled to San Francisco in his search for Max Zorin. Armed with the information from May Day he finds him in the City Hall, but Zorin turns the tables. At gun point, Bond and his companion, Stacey, are pushed into the lift, and trapped between floors. In an effort to finish them off in an "accident", Zorin sets fire to the top floor of the City Hall, and leaves. Bond pulls himself out of the lift, and must now get Stacey and himself out of the burning building. **You take over at this point.** Using the "duck shoot" menu system, you can either move Bond from room to room, or take action, such as searching, using, dropping or issuing commands to Stacey. You can also select the top menu, to collect objects which will be useful later on. There is however a limit to what you can carry, so be selective. Your objective is to find some way of getting Stacey out of the lift, and fight your way to safety.

You will notice that the fire has started on your view of the City Hall. This will spread across with time, and although the odd fire bucket will slow it down, you've got to move fast. Unfortunately, if you get too close to the fire, you become hot and find it difficult to breathe. This has the effect of slowing your actions. If the fire catches up with you or you get into a burning room, you will be totally overcome, and have to start again. Stacey won't love you much if you fail her.

To help you in your task, a light will shine on the plan view of the City Hall to indicate your position. Once a room has been visited, it will be marked in colour to show your achievement. Use door passes correctly, and consider what items might be helpful in getting Stacey out of the lift shaft. Once you've got her, don't forget to hurry to find a way out. It's not as easy as it seems!

Important. To get out, you're going to need a set of numbers, which fit into the code holder you start off with. When filled, this holder must be set to break the security-locked door at the bottom right of the City Hall – and that's a long way!

HOW THE "DUCK SHOOT" WORKS

When you press the fire button, control will be passed from Bond to the upper part of the duck shoot menu. Moving left or right will scroll the objects you are carrying past the selection point. When you have selected the object, press the fire button and control will be passed to the lower menu. If you want to go straight to the lower menu, select the downward arrow. In the lower menu you have a number of actions which can be selected.

These are:

RETURN – Returns control to Bond.

SEARCH – Searches the room you are in. Any object which is in the room will be displayed on the upper duck shoot. Select the objects you want to pick up by scrolling the menu and pressing the fire button.

DROP – Drops the object selected in the upper menu.

USE – Uses the object selected in the upper menu.

GIVE – Enables you to give an object to the girl if she is with you.

STAY – If the girl is with you, then selecting the picture of her head and this command will instruct her to stay in the room.

FOLLOW – When selected in conjunction with the girls head, will instruct her to follow you.

PAUSE – Allows you to Pause the game.

ABORT – If you select this, the lower menu will flash. If you really want to abort then press the fire button again. This will return you to the start of the game.

USEFUL OBJECTS:

GUN AND BULLETS: You will find a gun and some bullets in the City Hall. Using the gun you can shoot open the interconnecting doors. To do this, select the gun and then select the USE option. It takes two uses of the gun to shoot open a door. Take care, you will only find a small number of bullets, so don't get too trigger happy.

DOOR KEYS: These keys are colour coded for specific doors. They can only be used in the door for which they are intended.

SECURITY CARDS: These are colour coded for the doors for which they are intended. N.B. The yellow card is outlined in black.

CUPBOARD KEYS: Colour coded and can be used to open locked cupboards.

MINEPASS and GEIGER COUNTER: Get these and they will aid you in the mine.

You will find many other objects, but you will have to work out how they can help you or hinder you.

GAME 3: THE MINE – SILICON VALLEY

At last, Max Zorin's plan is revealed. As Bond suspected all along, the evil mastermind of the electronics empire is intent on capturing the silicon chip market. What better way to achieve this than blowing up the disused mine under Silicon Valley and set off the geological faults to send the whole area into the Pacific? Bond enters the old mine to discover the nuclear detonator has been set and time is ticking away. The bomb is in an underground cavern, and the only way to get it out is to be winched down. He needs help – and May Day is the only person strong enough to help him. She may be Zorin's henchperson, but surely she must realise the insanity of it all? He must find her and persuade her to aid him in his effort to save countless lives and the computer world! **This is where you take over.** You're in the mine, and must use the objects you find and the help you need to defuse the bomb before it is too late!

As you run through the mine, use the lift to reach different levels, or climb ropes to get the various items which will be useful. Sometimes you may have to tumble into oblivion, but you can look before you jump. Watch out for the nasty pits – have you got your grappling hook? Will the dynamite blow up the section of rock you want to go through? Have you got what you need to light it? Will time run out, will the Pacific's fish meet Silicon Valley's chips? All this and more awaits you!

Important: When you've found May Day, she will set off on another route; meet her at the winching point later on, but make sure you've freed her before you leave. Your reward for succeeding is a fitting end for such an accomplished super Secret Agent!

MINE DUCK SHOOT

The Mine Duck Shoot works in the same way as the duck shoot in City Hall. There are some different commands, these are as follows:

GET LIFT: If you are standing next to the lift shaft then this command will cause the lift to move to your level.

WINCH DOWN: If you have successfully assembled all the winch mechanisms and have rescued MAY DAY then using this command will cause May Day to winch you down to the detonator.

WINCH UP: This will cause May Day to winch you up.

USEFUL OBJECTS

GRAPNEL GUN: using the gun will allow you to shoot a rope up from your position to whatever is above. You will then be able to jump onto the rope and climb it as normal. When you jump off, the rope will rewind. Take care, you only have a limited number of charges.

DYNAMITE & LIGHTER: Both of these objects can be used in conjunction to blow up certain rocks.

GEIGER COUNTER: If you found this in the City Hall, it will then be displayed on screen and will show how close to the bomb you are.

CODE NUMBERS: You will find numbers throughout the mine. Five of these numbers, used in the correct order, will defuse the detonator. It is possible to find out which are the correct numbers and sequence. But that is a problem worthy of the best Secret Agent!

A VIEW TO A KILL (cassetteversie)

Laadinstructies:

Plaats het cassettebandje in de recorder en spoel hem eventueel terug. Druk tegelijk op de <SHIFT> en de "RUN/STOP" toets. Druk op <PLAY> van de recorder. Doe dit bij elk van de vier van de programma's op het bandje.

Introductie:

Uw naam is James Bond, wereld's beste geheimagent. U heeft nu de belangrijkste opdracht van uw leven aangenomen. De opdracht is er achter zien te komen wat Max Zorin voor gemene plannen heeft en proberen deze te verijdelen. In Parijs moet u contact maken met May Day om de nodige informatie te verkrijgen. In het stadhuis van San Francisco moet u verschillende geheimen ontrafelen en uw assistent bevrijden. Uiteindelijk kunt u het raadsel oplossen in de zilvermijn en Max Zorin tegemoet treden.

De Codes:

Aan het einde van de eerste twee spellen krijgt u een code die u bij elk nieuw spel moet intypen. Dit helpt de computer inschatten hoe goed u bent. U kunt elk spel afzonderlijk spelen. Maar om het spel helemaal uit te spelen moet u alle spellen achter elkaar spelen. In elk spel zit een tijdselement.

Lijst van commando's:

Pauze - kies dit in uw menu en u kunt tijdens het spel even pauzeren.
Abort - als het te gevaarlijk wordt kunt u ontsnappen en op vakantie gaan door twee keer op de vuurknop te drukken. Dit kunt u niet in Parijs gebruiken.
Music - u kunt kiezen uit: "The James Bond Theme" en "A View to a Kill".
Controls - u kunt kiezen uit toetsenbord- of joystickbesturing.
Speech - met dit commando krijgt u allerlei dingen te horen.

Game 1: De achtervolging door Parijs

In Parijs moet u achter May Day aan die met een parachute van de Eiffeltoren is gesprongen om aan u te ontsnappen. May Day heeft de keuze uit acht landingsplaatsen. Met uw radarinstallatie kunt u haar volgen.

Als u niet tegelijk met haar op een landingsplaats aankomt begint het spel opnieuw. Kunt u haar achterhalen dan krijgt u een toegangscode voor de volgende spellen. Onderweg naar de landingsplaats moet u allerlei gevaren ontwijken. Natuurlijk kunt u met uw pistool lastige obstakels opruimen.

Game 2: Stadhuis

In het stadhuis ontmoet u Max Zorin die u gevangen neemt en in de lift opsluit. Daarna steekt Zorin het gebouw in brand en vertrekt.

Het vuur breidt zich snel uit, met de blusegger kunt u het vuur enigszins vertragen.

Als u te dicht bij het vuur geweest bent worden uw bewegingen vertraagd. U moet de kamers afzoeken naar spullen om Stacey uit de lift te halen (zie plaatjes Engelse handleiding). Ook moet u nummers verzamelen met de "code holder" (zie plaatje Engelse handleiding). Met deze nummers die een code vormen kunt u uit het stadhuis ontsnappen. Met de "code holder" kunt u het slot openen.

Om u te helpen brandt er een lichtje op de kaart van het stadhuis om aan te geven waar u bent. Wanneer u in een van de 75 kamers van het stadhuis bent geweest, verkleurt deze.

Duck Shoot:

Boven in beeld zijn twee kadertjes. U komt in het bovenste menu door op de vuurknop te drukken. Daar kunt u

voorwerpen oppakken door de joystick naar links of rechts te bewegen en op de vuurknop te drukken. U komt dan in het onderste kadertje waarin u van de verschillende commando's gebruik kunt maken.

Om direct in het onderste kadertje te komen moet u bij de voorwerpen in het bovenste kadertje het pijltje naar beneden kiezen.

Commando's:

Return - dit geeft de controle over Bond terug.

Search - laat elk voorwerp dat in een kamer staat zien. U kunt de voorwerpen oppakken door ze in het bovenste kadertje op te zoeken en op de vuurknop te drukken.

Drop - hiermee gooit u een voorwerp weg dat u uitkiest in het bovenste kadertje.

Use - zo maakt u gebruik van een voorwerp.

Give - met dit commando kunt u uw assistent een voorwerp geven.

Stay - hiermee kunt u uw assistent bevelen om in een kamer te blijven.

Follow - zo komt uw assistent met u mee.

Pause - zo kunt u het spel even stoppen.

Abort - als u na het gebruik van dit commando op de vuurknop drukt begint u opnieuw met het spel.

Handige dingen:

Gun and Bullets - hiermee kunt u lastige deuren open schieten.

Door Keys - deze sleutels passen alleen op sommige deuren.

Security Cards - hiermee kunt u weer andere deuren open maken.

Cupboard Keys - met deze sleutels kunt u kasten open maken.

Minepass en Geiger Counter - neem deze mee want u heeft ze in de mijn nodig.

Game 3: The Mine - Silicon Valley

In de mijn moet u May Day bevrijden omdat zij u later moet helpen om de bom onschadelijk te maken.

U moet de mijn afzoeken naar spullen die u kunt gebruiken om de atoombom onschadelijk te maken.

Pas op voor allerlei putten!

De Duck Shoot in de mijn

De Duck Shoot in de mijn werkt hetzelfde als in het stadhuis. Maar er zijn alleen andere commando's en voorwerpen (zie plaatjes Engelse handleiding).

Commando's:

Get Lift - zo kunt u de lift besturen.

Winch Down - met dit commando takelt May Day u naar beneden naar de detonator (alleen als u de takelinstallatie goed in elkaar hebt gezet).

Winch Up - dan takelt May Day u weer op.

Handige voorwerpen:

Grapple Gun - met dit geweer schiet u een touw omhoog waarlangs u omhoog kunt klimmen. U kunt het geweer maar een paar keer gebruiken.

Dynamite en Lighter - hiermee kunt u rotsen oplazen.

Geiger Counter - hiermee kunt u de atoombom opsporen.

Code Numbers - deze moet u verzamelen om de bom onschadelijk te maken.
