

# KINDER COMP™

## FROM THE AUTHOR

KINDERCOMP was written for our daughter Amy. I wrote it because I wanted her to have fun with the computer. But I wanted her to learn something as well. Your children will have fun with this - and learn something too.

Some of the things are obvious. SEQUENCE helps little ones learn to count. LETTERS teaches them the alphabet and upper and lower case versions of letters. MATCH develops pattern recognition skills, an important part of reading readiness.

Some of the other things are less obvious but no less important. SCRIBBLE is fun to watch (Judy and I enjoy it as much as Amy). But it encourages little fingers to become familiar with the keyboard. It gives an immediate response. NAMES is a continuation of this. But it's fun to see your own name in lights. And that simple little RETURN key is important, too.

And then there's DRAW. This is our "pride and joy". It's easy but it's loads of fun. DRAW offers children a new outlet for their creativity.

Enjoy your children - and KINDERCOMP.
