

MINDROLL

QUEDEX★★—USA

THE QUEST FOR ULTIMATE DEXTERITY...

Relax. Take a deep breath and leave your body behind. You're now the Orb of Id, ready to bump, bash, roll and crash through ten different planes of an insane 3-D puzzle. Slide around shocking Electric Seas, bounce off invisible walls, and pick up Keys and Amulets to escape disturbingly infinite mazes. Move fast to finish each plane in time, but don't get careless — one step over the edge and you'll fall into the deep, dark Void of Freud!

Loading Instructions and gameplay — Amiga

Set up your system and plug a joystick into joystick port 2.

Insert disk into drive and turn on your system.

The program loads and the title screen and demo game appear. Press fire button to begin play. The Choose Plane Table appears. Highlight the plane you want to play by typing its number. Press fire button to begin. After you successfully complete a plane return to the Choose Plane Table to select the next plane.

Use the Designer Screen to set up planes in the order you want to play them.

From opening screens press F7 to display Designer Screen.

Type number of plane you want to play first. Number appears in highlighted box on far left and box moves to right. Now type numbers of other planes in chosen order of play. Enter a plane's number only once.

To change a number, push

joystick right or left to move highlighted box to number you want to change and type new number. Be sure a number appears only once on list.

When finished press fire button and opening screens appear. Press fire to see Choose Plane Table with your first choice highlighted. Press fire to play.

When you solve a plane, the Bonus Plane appears. Follow arrows to play. When Bonus Round ends press fire to continue. Completing each plane increases difficulty of as yet unsolved planes.

Loading instructions and gameplay — PC/Compatibles

Boot up your system. For joystick control, plug in your joystick before booting up.

Insert disk into drive A. At the A> prompt, type mindroll and press Enter. A graphics mode selection screen appears.

Select your graphics mode,

then press Enter. The title screen appears.

Press Spacebar or the fire button to begin. The Choose Plane table appears.

Highlight the plane you want to play by typing its number from keyboard or keypad. Press Spacebar or fire button. The selected plane appears and you begin.

During your game, follow on-screen prompts when to switch disks in drive.

When you solve a plane, the Bonus Plane appears. Follow arrows to play. When bonus round ends, press fire button or Spacebar. The Choose Plane table reappears to select the next plane. As the game progresses, the table shows only the numbers of planes you haven't yet solved. Solving each plane increases difficulty of unsolved planes.

Within a plane press Esc

Return to DOS At the Choose Plane Table press Esc

Survival!

Time is your worst enemy. The upper right corner of the screen shows time units left to complete the plane. As you roll through the planes, keep an eye out for the symbols below. Some are beneficial, some bothersome and some lethal. Touch the goal to complete the plane. You end a game and return to Choose Plane table if you bump into an Eliminator — or time runs out.

The Planes

Plane 1 Roll or bounce the length of the plank and drop through the Void into five subplanes. Two hints: In subplane 3 avoid the Electric Sea — it speeds up the clock! Return to the finish in subplane 5. If you leave plane 1 before solving all five subplanes, you can return to it later to complete them.

Plane 2 Roll over Keys (in right order) to open doors. Roll near Keys to make more Keys appear. Use Teleports to scout out the entire maze.

Plane 3 Stay out of the Electric Sea! Find four hidden Amulets to make the Goal appear.

Plane 4 Race down the track as fast as you can, using diagonal controls for left and right moves. Avoid time-draining blocks and use Lifts up and down, as you have a limited number of jumps.

Plane 5 Fit the puzzle with the tiled squares.

Plane 6 Grab the three sets of Surprises to make the Goal appear. If you roll over a Surprise in the wrong order, pneumatic tubes suck you up and deliver you to an Eliminator. Avoid the time-eating Electric Seal.

Plane 7 Pick up extra Time Boosters — you can use them on the other planes.

Plane 8 Roll over all four Keys in one of the four mazes before you run out of time!

Plane 9 Bash out all the cubes. Energisers temporarily boost your speed. Avoid flashing squares!

Another in an ongoing series to frustrate and enrage brought to you courtesy of THALAMUS and

Plane 10 Bounce from platform to platform, but tackle only one unit of height at a time to avoid a time penalty. Get to the Goal as fast as you can!

Scoring

You score points by rolling over these symbols:

Key	Amulet	Key
5 points	2 points	
		Surprise 2 points

When you successfully complete a plane, any time units remaining convert to points, i.e. 5 time units equal 5 points. Time left when you finish a plane also carries over to the next plane you play. Bonus Rounds are worth 20 points and sometimes extra time.

Amiga

Scores of the first five games are recorded in the Master Table. As you continue playing, higher subsequent scores replace these. At the Master Table, type your name next to your score. Press Return to enter your name in the table and save your name and score to disk.

PC/Compatibles

A high score wins you a place on the Master Table. When the table appears, type your name, then press Enter. Your name and score will be saved to disk.
