NOTICE

VILLA CRESPO DOES NOT PROMOTE OR CONDONE USING CASINO CRAPS FOR GAMBLING PURPOSES AND IS NOT LIABLE FOR DIRECT INDIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF CASINO CRAPS.

CASINO CRAPS was designed to be fun and instructional. Many features are available, providing a stimulating environment for both advanced and novice players. Realistic graphics, sound, and complete wager control make this game a must for anyone interested in the exciting game of CRAPS!

☛ For those players with no prior knowledge of Craps, we highly recommend you purchase one of the many books available on the subject. They will add to your enjoyment and expertise.

CASINO CRAPS

2

INSTALLING CASINO CRAPS

You can play CASINO CRAPS right out of the box, copy it onto another floppy and keep the original safe, or copy it onto your hard drive. Just use the DOS copy command.

- ☞ This game is distributed on a *High Density* 5 1/4" disk and a normal density 3 1/2" disk. To use a 5 1/4" drive, it *must be* a High Density drive capable of formatting 1.2 Meg HD diskettes. Any 3 1/2" drive will work.

STARTING CRAPS

This game can be played right from the diskettes you received. If you prefer, for your safety, please make a copy of the disk and use the copy, putting the original in a safe place.

NOTE: If you are a WINDOWS™ user, please *do not run* this game from within Windows. Run it directly from a DOS prompt. Running CASINO CRAPS from Windows may create unexpected results.

To play the game from a diskette:

- ◆ Boot up your computer normally using your DOS.
- ◆ Insert the diskette in drive A: or B: as appropriate.
- ◆ Change the current DOS prompt to the desired drive.
- ◆ Type **CRAPS** to begin playing.

CASINO CRAPS

3

To play the game from the hard disk:

- ◆ Create a directory called CRAPS on the desired hard disk.
- ◆ Copy the entire contents of the diskette to this new directory.
- ◆ Be sure the DOS prompt points to the hard disk and the CRAPS directory.
- ◆ Type **CRAPS** to begin playing.

PLAYING CASINO CRAPS

When you start CASINO CRAPS, you are prompted to enter your name and your initial bankroll. If the name you enter is *the same as a previously saved session*, you will be asked to choose whether to resume the saved session or start a new one.

Once in the game, your position is at the bottom of the table--see your hands?

The drop down Main Menu appears showing the various options, which can be selected using either the **mouse pointer** or the **keyboard arrow keys**.

- ☞ Most of the choices have **on-line help**. To access this additional information, press the [H] key.

The following choices appear on the Main Menu:

PASS/COME BET - Use this option to enter a bet on the pass line, or on the come line if a point is already established. The BET AMOUNT Window appears where you choose the exact amount of your bet.

ODDS/PLACE/BUY - After a point is established, you may use this option to take free odds, place or buy a number. The HOUSE ADVANTAGE Window is displayed after each wager is placed showing exactly the casino advantage for that given wager.

To take free odds, place the pointer on the green highlighted number (the established point). The odds bet entered is based on the number of odds wagers allowed by your parameter (see OPTIONS Menu).

Place and buy bets are entered by selecting any of the other points desired.

FIELD BET - Use this option to place a wager on the FIELD. With this wager you bet that a field number (2, 3, 4, 9, 10, 11, or 12) will be thrown on the *next* roll. Field bets on the 3, 4, 9, 10, and 11 are even money wagers, for the 2 and 12, field bets are paid at double odds. This wager is *good for a single roll only*.

HARD NUMBERS BET - Hard numbers refer to "pair" rolls (1 & 1, 2 & 2, 3 & 3, 4 & 4, 5 & 5, and 6 & 6). These bets win when the "hardway" number (pair) comes up *before* an "easy" combination of the number (any non-pair combination), or a "7" is thrown. Hardway bets can be placed at any time by selecting this option, and then the desired number(s) from the subsequent window. The bet is active for each roll until the number comes up the "hard" way (you win), the "easy" way (you lose), or a "7" is thrown (you lose).

CENTER TABLE BETS - These are *one roll* bets. The bet is paid immediately when the wagered point is made, or lost when any other number is rolled. Choose this option, then select the desired number(s) from the subsequent window.

OPTIONS MENU - This option allows you to change several features of the game, as desired. They are:

- Message Delay
- Sound
- Bet Options
- Wrong Way Bets
- Roll Techniques
- ODDS

Each of these is documented as you highlight it, right on the screen. Feel free to review each of these, anytime, as you navigate through the game.

CASINO CRAPS

6

GAME DETAILS - Choose this option for a quick explanation of the keys controlling the game. In particular, please note the use of [F1], [F2] and [F3] keys, which are *not mouse accessible*. These keys are available *after* the first roll.

[F1] - This key displays a statistics table of the bets made, won and lost on the *last roll* of the dice.

[F2] - This key will show a statistics table of the total number of bets, wins and loses during the entire session. The statistics are also shown in percentages of wins and loses. Pressing the [SPACE BAR] allows you to see the rest of the types of wagers tracked.

[F3] - This key will show a statistics table similar to that shown by the [F2] key, except that the numbers will be based on dollar amounts, rather than number of rolls.

QUIT - This option ends your session, saving your bankroll and statistics under the name you initially entered at the beginning of the game.

ROLL DICE - After selecting one or more wagers, press this option to roll the dice. Pressing the [SPACE BAR] also rolls the dice.
