ABOUT PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: Lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by:

- sitting farther from the television screen,
- using a smaller television screen,
- playing in a well-lit room, and
- not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

AVOID DAMAGE TO YOUR TELEVISION

Do not use with certain televisions. Some televisions, especially front-or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played on your set.

OTHER IMPORTANT HEALTH AND SAFETY INFORMATION

The Xbox video game system documentation contains important safety and health information that you should read and understand before using this software.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

How to Play the Game: You control the car's steering, acceleration, braking and shifting of gears.

First, you must qualify for the main race by completing one lap with a fast lap time. If successful, you receive your starting position for the main race. If you take too long on the qualifying lap, you won't qualify for the main race.

When starting the main race, you begin from the position that you qualified. The race starts when the light turns green and you must successfully complete four laps to finish the race. As the race progresses, you should avoid crashing into other cars or obstacles on the sides of the racetrack. Also avoid driving over water puddles, since these slow you down.

You will receive additional race time for each lap that you complete by crossing the Start/Finish line. In the main race, if the time reaches zero before you cross the Start/Finish line, the game is over.

Hints:

- Shift into low gear, tap the brake or let off on the accelerator to slow down for sharp turns.

How to Play the Game: After starting a 1 Player game, press the Directional pad or Left thumbstick left/right to choose one of four different race tracks, then press the A button.

You control the car's steering, acceleration, braking and shifting of gears.

First, you must qualify for the main race (Grand Prix) by completing one lap with a fast lap time. If successful, when you cross the Start/Finish line after completing the lap, you will receive your starting position for the main race. If you take too long on the qualifying lap, you won't qualify for the main race.

When starting the main race, you will begin from the position that you qualified. You must successfully complete four laps to finish the race. As the race progresses, you should avoid crashing into other cars or obstacles on the sides of the racetrack. Also avoid driving over water puddles, since these slow you down.

You will receive additional race time for each lap that you complete by crossing the Start/Finish line. In the main race, if the time reaches zero before you cross the Start/Finish line, the game will be over.

Hint:

- If you drive over water puddles at 230 mph (370 km), you will have turbo charged power.

PAC-ATTACK

TM

Pac-Attack is a locked game. To unlock it, you have to score 25,000 points or more in Pac-Man. If you succeed, you'll be able to select Pac-Attack from the Main Menu.

How to Play the Game: Blocks fall from the top of the play screen. Twist and turn the blocks to line them up from left to right. When you fill up a line of blocks, they vanish. Oh, but nasty ghosts keep popping up to wreck the lines! You have to line them up too. Then your old friend Pac-Man pops in for some ghostly gobbling. Put him in the right place and he'll chomp ghosts 'til there aren't any more or he hits a block.

Normal Mode:

This mode features you, Pac-Man and an occasional Fairy against the ghosts and an endless flock of falling blocks. Choose between Easy, Normal, Hard and Hyper difficulty levels.

- **Sneak Preview:** This box lets you look ahead to see the upcoming cluster containing blocks, ghosts, Fairies and Pac-Man.

- **Fairy Meter:** Each time Pac-Man chomps a ghost, a bit of gold dust goes into the Fairy Meter. When it's filled, a Fairy appears in the Sneak Preview box. When difficulty is set to Easy, the Meter doesn't rise but the Fairy will appear once. When the Fairy appears, press the Directional pad or Left thumbstick to move the Fairy. When she stops, she throws a spell that knocks off all the Ghosts below it!

Score: Your score so far.

Level: Your current speed level.

Fairies: You have more help in this game than just a voracious Pac-Man.

Puzzle Mode:

Puzzle Mode is 100 stages of Pac-Attack madness. Complete a stage and you get a Password. The next time you play, the Password lets you continue from a previous game position so you don't have to start all over again. Choose **Password** on the Puzzle Prompt to input a password. In Puzzle Mode, you can turn Pac-Man left/right with the Left trigger and Right trigger.

- **Next:** Lets you look ahead to see the upcoming cluster of blocks, ghosts and Pac-Man.
- **Rest:** Keeps track of how many more times Pac-Man will appear in the stage.
- **Stage:** Shows the current Puzzle stage.
- **Password:** Shows the Password for the stage.

Appendix for Puzzle Mode: Appendix lets you play Puzzle Mode with Pac-Man appearing less often, but the clusters are consistent rather than random. To play Appendix, highlight **Puzzle Mode**, hold right on the Directional pad or Left thumbstick and press the A button. The Appendix graphic will appear.

Versus Mode/2 Player Mode:

It's a dueling Pac-Attack chomp-a-thon! Whoever survives the longest wins the round. The first player to win three rounds takes the Chomp Champ Title! If Pac-Man eats more than five ghosts, some of them run over to haunt the opponent's side. Each player can select a different speed level.

Rounds Won: The filled-in circles show the rounds won for each player.
