Safety Information

About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information The Xbox Instruction Manual contains important health and safety information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

PROLOGUE

It was two years ago that Henry Townshend moved into Room 302 of South Ashfield Heights, an apartment building in the medium-sized city of Ashfield. Henry was happy and enjoying his new life.

But five days ago, something strange began to happen. A recurring dream began to haunt him. And there was one other thing...

CHARACTERS

HENRY TOWNSHEND

Henry is a calm, young man who never lets his feelings show.

By the time the story begins, he has been locked in his room for five straight days. Suddenly, a large hole appears in his bathroom wall with no reason or warning, and he is dragged into the depths of terror.

EILEEN GALVIN

Eileen is Henry's next-door neighbor, the young resident of Room 303. She has a kind personality, although she has the tendency to depend too heavily on others at times. The relationship between Eileen and Henry is nothing more than simple recognition of one another, but they are both dragged into a strange set of events that will change everything.
