## Safety Information

### About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

**Other Important Health and Safety Information** The Xbox Instruction Manual contains important health and safety information that you should read and understand before using this software.

### Avoid Damage to Your Television

**Do not use with certain televisions.** Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

# USING THE XBOX VIDEO GAME SYSTEM

1. Set up your Xbox video game system from Microsoft by following the instructions in the Xbox Instruction Manual.
2. Press the power button and the status indicator light will light up.
3. Press the eject button and the disc tray will open.
4. Place the **Aggressive Inline** disc on the disc tray with the label facing up and close the disc tray.
5. Follow the on-screen instructions and refer to this manual for more information about playing **Aggressive Inline**.

The Xbox Video Game System's Audio feature lets you copy an audio CD to the Xbox hard disk and play tracks from that audio CD during game play in place of the audio tracks included with **Aggressive Inline**. To use this feature, you must load and copy the audio CD BEFORE loading the game disc and starting the game.

## Copying An Audio CD

1. Set up your Xbox video game system from Microsoft by following the instructions in the Xbox Video Game System Instruction Manual.
2. Press the power button and the status indicator will light up.
3. Press the eject button and the disc tray will open.
4. Place an audio CD on the disc tray with the label facing up and close the disc tray.
5. At the next screen, select the DASHBOARD option and press the **A** button.
6. Select the AUDIO option and press the **A** button.
7. Select COPY. You can then select which tracks you wish to copy to your Xbox hard disk, and name the tracks. The copied tracks are then available during game play by selecting TRACKS from the Options Music menu.

# Avoiding Damage to Discs or the Disc Drive

## To avoid damage to discs or the disc drive:

- Insert only Xbox-compatible discs into the disc drive.
- Never use oddly shaped discs, such as star-shaped or heart-shaped discs.
- Do not leave a disc in the Xbox console for extended periods when not in use.
- Do not move the Xbox console while the power is on and a disc is inserted.
- Do not apply labels, stickers, or other foreign objects to discs.

## Using the Xbox Controller

1. Connect the Xbox Controller to any controller port of the Xbox console. For multiplayer gaming, connect additional controllers to available controller ports.
2. Insert any expansion devices (for example, Xbox Memory Units) into controller expansion slots as appropriate.
3. Follow the on-screen instructions and refer to this game manual for more information about using the Xbox Controller to play **Aggressive Inline**.

**Note: Aggressive Inline is for up to 2 players.**

# INTRODUCTION

Welcome to *Aggressive Inline*, a showplace of skating, skill and speed. This is the place where daring moves and dizzying modes make the difference. In the Tutorial level, you'll have a chance to learn all the skating skills you need. Mastering them is another matter, and there are lots of tough levels that will test your abilities like never before. Once you get the hang of it, you'll be chaining insane tricks together for big scores like a pro before you know it. You can take on an entire career's worth of play, completing progressively more difficult levels until you beat them all. Creativity and fun come together when you create your own skate park levels to test your skills on. You can play through all kinds of tough tests against a friend in split-screen Multiplayer mode. So put on those skates and get rolling!

# GETTING STARTED

You will advance to the main menu. Press **←** or **→** on the **directional pad** or **left thumbstick** to highlight a choice and press the **A** button to select it or the **B** button to cancel.

**CAREER** Compete on a variety of levels completing challenges to advance. See page 22 for details.

**FREESKATE** Skate on any unlocked level with no juice meter to worry about. See page 22 for details.

**TIMED RUN** Compete against the clock for the best score. See page 22 for details.

**MULTIPLAYER** Compete against a friend for frantic split-screen skating action. See page 23 for details.

**PARK EDITOR** Create your own levels to skate on. See page 24 for details.

**OPTIONS** Adjust these option settings:

**SAVE/LOAD** Access your Xbox hard disk to save and load game data.

**SOUND** Adjust sound effects, music and speech volumes. Press **←** on the **directional pad** or **left thumbstick** to decrease volume or right to increase volume.

**CONTROLLER** View default controls and change control configurations. There are three pre-set control schemes to choose from.

**MEDIA VIEWER** This is where various videos can be viewed once opened in Career mode.

**CREDITS** View the team behind **Aggressive Inline**.

**CHEATS** Input any cheats you've unlocked. *Warning: By inputting a cheat your player will be branded a Cheater.*

# SKATING BASICS

## THE CONTROLS

To select menu options, use the **directional pad** or **left thumbsticks** to navigate the menus. Highlight the desired option and press the **A button** to accept and the **B button** to go back through the menu options.

## Gameplay Controls

- **JUMP** – Press and release the **A button** to JUMP
- **ACCELERATE/AUTO GAS**– Hold down the **A button** or **↑** on the **directional pad** or **left thumbstick** to accelerate.
- **FAKIE SKATE** – Tap the **Black button** or **White button** when skating to spin 180 degrees and skate fakie (backwards). Tap again to switch back to normal position.

- **TO CESS-SLIDE (REVERT)** – Press the **Black button** to perform a Cess Slide. Use this move to switch to and from Fakie or when landing on a Vert Ramp to continue your combo chain.
- **FREELook** – At any time, you have the ability to look around the surrounding areas by moving **↑**, **↓**, **←** and **→** on the **right thumbstick**.

## TRICKS

Tricks are the soul of **Aggressive Inline**. They are performed anywhere, but perhaps most impressively in the air. The Trick control allows you to modify tricks by pressing a different directional control while pressing the trick button. In addition, a series of button presses while a trick is in progress will allow you to flow from one trick into another and another. The idea is to combine a number of tricks consecutively into a spectacular chain that demonstrates both creativity and skating mastery (and earns you max points, too).

- **GRAB TRICKS** – While in the air, press the **directional pad** or **left thumbstick** in any direction, then tap the **X button**. Example: **↓** + **X button** = Rocket Grab.
- **FLIP/SPIN TRICKS** – While in the air, press the **directional button** or **left thumbstick** in two directions, then tap the **X button**. Example: **↓**, **↑** + **X button** = Bio Flip.
- **MODIFIED FLIP/SPIN TRICKS** - While in the air, press the **directional pad** or **left thumbstick** in three directions, then tap the **X button**. Example: **←**, **→**, **←** = Method Flatspin.
- **WALLRIDES** – While in the air, you can perform a Wall Ride by holding **↓** on the **directional pad** or **left thumbstick**, then pressing and holding the Jump button (**A button**). Wall Rides are active as long as the **A button** is held. Once you release the **A button**, you'll jump off of the wall.

- **MANUAL** – Tap **↑**-**↓** or **↓**-**↑** on the **directional pad** or **left thumbstick** when skating or landing to perform a single toe or single heel manual. The **↑** and **↓** **directional pad** must then be used to balance.
- **GRAB TRICK TWEAKS** – Holding the **X** **button** longer will tweak (stretch out) the Grab trick providing the skater with even more points.
- **SPECIAL TRICKS** – You can earn special tricks by finding a skater icon on each level.

## Action Button

Press the Action button (**B** **button**) to interact with elements in your environment, such as spinning on poles, talking to people, skitching behind vehicles and even bailing out of crashes. All these maneuvers can be executed with the use of one button press. The Action button is context sensitive and reacts differently to different situations. For example, if you are near a vertical pole and press the **B** **button** you will grab and spin around it, while if you are near a pedestrian and press the **B** **button** you will talk to the pedestrian and receive a challenge.

- **VAULTING** – Skaters have the ability to vault over rails (or any waist high edge) and out of vertical ramps by pressing the **B** **button**. This enables the skater to launch high in the air to start off a new trick string or just launch out of a vertical ramp with style.
- **POLE SPINS** – The skater also has the ability to grab and spin around horizontal and vertical poles placed throughout all the levels by pressing the **B** **button**. These poles are great for getting to hard and or secret areas otherwise unavailable through normal skating. When skating near a horizontal or vertical pole, press the **B** **button** (Action button). If it's a horizontal pole the skater will spin around up to three times then automatically release. Releasing the Action button

causes the skater to swing off the horizontal pole. The skater will jump off in various directions depending on which **directional pad** you are pressing when you release the **A** **button**. **↑** on the **directional pad** or **left thumbstick** will shoot you higher and pressing **←** or **→** on the **directional pad** or **left thumbstick** will launch you to the left or right.

- **SKITCHING** – The skater can grab onto any moving vehicle and be pulled through the world by pressing and holding the **B** **button** when skating closely behind a vehicle. This enables the skater to be pulled around faster than they would normally be able to traverse the world. Cars, trucks, buses and even planes can be skitched.
- **BAILING** – The skater has the ability to bail out of tricks off of a quarter pipe or vert ramp. When no longer over a quarter pipe, simply press the **B** **button**, which will reorient you to land. If you are too close to the ground you may not have enough time to execute the bail maneuver.
- **RECEIVING CHALLENGES FROM PEOPLE/OBJECTS** – Pressing the **B** **button** next to a specifically highlighted person or object will reveal many of the challenges the skater needs to finish the game. A spinning orb above the person or object will highlight these challenges.

# GRINDING

Grinding is a huge part of **Aggressive Inline**. You can grind on practically any edge. A grind is performed by jumping up onto an edge (press and release the **A** button to jump) or skating over an edge then holding the **Y** button + a direction control. Different grinds are performed depending on the direction pressed. For example, pressing the **Y** button + **↑** on the **directional pad** or **left thumbstick** is a Soul grind.

## MODIFYING GRINDS

Inputting another grind with the **directional pads** or **left thumbstick** when in an existing grind will modify the grind, allowing you to switch to any other non-special grind in the game.

## 180° ROTATION

Pressing the **↑** direction modifier adds a 180° rotation to the character before the grind occurs.

## SWITCH STANCE

Pressing the **↓** direction modifier switches the stance of the new grind. For example, if the player performs a normal Soul where his right foot is the lead, using the switch modifier mirrors the motion so that his left foot is the lead foot.

With the exception of Special Grinds (Double, Hand, Specials), all grinds fall into two categories: *Frontside* and *Soul*. *Frontside* oriented grinds are perpendicular to the rail.

## SWITCH

While on the rail it is possible to perform a “switch” version of any grind. For example, pressing **→** and **Y** will perform a

Miszou grind. To perform a “switch” version of a Miszou grind you will need to input **↓** before you input the Miszou grind. So a switch Miszou would be **↓, →, Y**. Keep in mind this must be done while already in a grind and can be done with ANY Grind. Even double direction grinds!

## ALLEY-OOP

While on the rail it is also possible to perform an “Alley-oop” version of any grind. For example, pressing **←** and **Y** will perform a Pornstar grind. To perform an “Alley-oop” version of a Pornstar grind you will need to input **↑** before you input the Pornstar grind. So a switch Miszou would be **↑, ←, Y**. Keep in mind this must be done while already in a grid and can be done with ANY Grind. Even double direction grinds!

## Grind Tricks

The skater has the ability to enter one or two **directional pad** inputs to execute a grind.

## SINGLE DIRECTION GRINDS

GRIND NAME	DIRECTIONAL CONTROLS	<b>Y</b> button
Frontside Grind	No Direction	+ <b>Y</b>
Soul Grind	<b>↑</b>	+ <b>Y</b>
Pornstar Grind	<b>←</b>	+ <b>Y</b>
Miszou Grind	<b>→</b>	+ <b>Y</b>
Royale Grind	<b>↓</b>	+ <b>Y</b>
Fastslide Grind	<b>↖</b>	+ <b>Y</b>
Backslide Grind	<b>↗</b>	+ <b>Y</b>
Fishbrain Grind	<b>↘</b>	+ <b>Y</b>
Makio Grind	<b>↙</b>	+ <b>Y</b>

## DOUBLE DIRECTION GRINDS

GRIND NAME	1 <sup>ST</sup> DIRECTIONAL CONTROL	2 <sup>ND</sup> DIRECTIONAL CONTROL	Y button
Torque Soul	←	↑	+ Y
Soyale	←	←	+ Y

Wonder Grind	→	↑	+ Y
Sweat Stance	→	↓	+ Y
Mistrial	→	→	+ Y
Unity	→	←	+ Y

## STARTING GAMES

The first thing to consider once you've selected your game mode is which skater you wish to control.

### PLAYER SELECTION

You can select any of the available skaters to control, including any secret skaters. Each skater's starting attributes appear on this screen, along with rankings and other in-game performance stats. Once you select a player in Career mode, you skate using that player through all the levels.

## ATTRIBUTE SYSTEM

Aggressive Inline incorporates a Dynamic Attribute system, which is a direct reflection of the skater's actions within the career mode of the game. When a player performs in the world they are awarded with experience points that build up the players 7 attribute categories. Experience points are not only offered for various skating performances, they're also awarded for completing challenges in the game.

Each attribute can be highlighted by pressing ↑/↓ on the **directional pad** or **left thumbstick**. The bottom of the attribute screen states how many points are needed to move up to the next attribute level i.e. 1500/10,000. The number to the right of the attribute states the attribute level Ex. LV2 for Level 2.

### SPIN:

The amount of rotations while in the air state builds this attribute.

### RESULT:

Provides faster spin.

### XP POINTS:

Each 360 degree spin earns the skater 7 points.

### GRIND:

The length of time of a grind determines this attribute.

### RESULT:

Provides better balance for grinds and stalls.

### XP POINTS:

Points increase the longer the grind time. Promotes transfers.

**MANUAL:** The length of time of a manual determines this attribute.

**RESULT:** Provides better balance.

**XP POINTS:** More points the longer the manual.

**JUMP:** The number of tricks performed in the air-state determines this attribute.

**RESULT:** Higher jumping ability.

**XP POINTS:** Depends on total trick points.

**SPEED:** The number of times player maximizes the juice meter determines this attribute.

**RESULT:** Faster speed.

**FAKIE:** The number of tricks you perform Fakie determines this attribute.

**RESULT:** Faster speed and higher jump while fakie.

**WALLRIDES:** The amount of times player Wallrides determines this attribute.

**RESULT:** Less gravity means longer Wallrides.

## LEVELS

After selecting your player, you will choose a level to skate. There are 7 huge levels to skate on, each more wicked than the last. Start out in the Tutorial level to get a good grasp on the basic controls and maneuvers. As you progress in the game, you will unlock extra levels.

## Tutorial

The Tutorial level teaches skaters the basics needed to get the job done. It's recommended that all newbies play through the Tutorial mode before entering the career mode.

## LEVEL 1: MOVIE LOT

Your 1st level in the Career mode takes you through the city streets and into the movie lot. A haunted house movie is in production on the set. Hang out outside and learn the basics and find all the huge lines, then take it inside the studio and get rid of all those ghosts.

## LEVEL 2: CIVIC CENTER

Things get a little more interesting as you skate around this huge indoor and outdoor city. A beautiful nighttime setting, good for a nice roll through the huge outdoor skate park. Light off a couple of fireworks while you're at it.

## LEVEL 3: INDUSTRIAL PLANT

Ever see how a car is made? Well now you have the chance to skate this massive indoor/outdoor auto manufacturing plant. Check out the robotic arms welding cars together, stop and build a skate park or watch some crash test dummies go for a ride. Don't forget to wear your seatbelt.

## LEVEL 4: BOARDWALK

Ahhhh! A nice sunny roll along the boardwalk! Watch out for that clown Mr. Bonkers. Take a ride on the ferris wheel or simply skitch a ride on the roller coaster. This level rocks! Bring a barf bag!

## LEVEL 5: TUNA CANNERY

Nothing like the smell of rotting fish in the morning breeze! Take a roll on a fishing boat or check out the workings of a fully functional cannery, smell and all. Don't forget to check the freezer for some Park Editor goodness.

## LEVEL 6: AIRFIELD

Didn't mommy ever tell you that skating, thunder, lightning and a bit of rain don't mix? Sometimes you just have to do what's wrong. Pull some awesome tricks, get a little wet, skitch behind a plane, find some insane grind lines and blow up a couple of balloons. Who could ask for more than that!

## LEVEL 7: MUSEUM

Did someone say marble floors, dinosaurs, multi level, planetarium, warehouse, tar pits, flying pterodactyls, burglars, insane transfers, and, and, and! This level will take all your skills to master!

## CHALLENGES

JUICE METER

CURRENT SCORE  
CHALLENGE SCORE

CHALLENGE

Each level has several challenges (tasks), each of which must be accomplished in order to beat the current level. Every level has between 20 and 35 challenges to complete. Not all will need to be beaten to move onto the next level, but your life won't be complete unless you beat them all and open up the vast secrets in the game. Each challenge has a point value attached to it. The challenge screen will tell you how many points are needed to unlock specific goals and unlock the next level.

Some challenges are open when you enter the level and others are assigned by people (challenge assigners). Challenge assigners are indicated by a glowing "bubble" displayed above them. Pressing the Action button when you encounter a challenge assigner will display the challenge.

You can view the challenges for a level by pressing the **START** button to pause the game and selecting Challenges from the menu. Highlighting a challenge by pressing **↑** or **↓** on the **directional pad** or **left thumbstick** allows even more options. Press the **A** button when any challenge is highlighted to get more detail on that challenge. **Aggressive Inline** provides fly-throughs of some challenges. The fly-throughs can be accessed from the main challenge menu or the detailed challenge menu by pressing the **B** button. Challenges with fly-throughs are marked with a little camera icon next to the challenge text. Pressing the **right trigger** button will bring up a challenge summary menu which gives you an overview of how many challenge points you've earned, secrets you've opened and how many challenge points you need to reach the next level. Only basic challenges will be readily available to the skater on the menu. All blank challenges will only appear after talking to an objective giver.

**Note:** Pressing the **BACK** button during gameplay quickly brings up the challenge menu.

## ICONS

Good bye level timer! Skate as long as you like on a level as long as you can keep your Juice meter up. Juice is the amount of energy you have to exert. You can increase your juice by skating well, collecting juice box powerups, and finding Juice Meter extend powerups.

There's 3 different Juice box pickup types on each level, Green, Purple and Yellow.

The **Green Juice Box** powerup gives the skater 50% juice

The **Purple Juice Box** powerup gives the skater 100% juice

The **Yellow Juice Box** powerup gives the skater a juice extend which extends the length of the juice meter. This means the player has more On fire time to pull secret tricks, longer extra speed and crash more often if need be.

**Key** – Unlocks a hidden area on another level.

**Attribute up** – There are seven attribute icons (Jump icon is shown). Each improves a particular skill by one level. See pages 13-14 for details. There is one hidden attribute icon in every level.

**Special Trick** – Each level has one hidden special trick icon in the form of a particular skater's head. Collecting this will let you perform that skater's secret trick.

## Juice Meter

The juice meter appears in the upper left of the screen. When your juice meter is full, you're on fire and flames will fly from your skates. When you're fully juiced all your secret tricks are accessible, and you will also have access to extra speed. When your juice meter is empty, you're out of energy and the game is over. You can continue by losing up to 100,000 points.

## SCORING

Your score consists of points for challenges met and points for tricks performed. Points are multiplied according to difficulty, and the number and kind of tricks chained together. The longer the chain, the higher your score. Note that points awarded vary with difficulty setting.

## GAME DISPLAY

1. CURRENT SCORE THIS RUN
2. CHALLENGE SCORE
3. BALANCE METER
4. TRICK NAME
5. SCORE MULTIPLIER
6. TRICK SCORE
7. TIMER

8. JUICE METER- The juice meter starts out half way full (we're optimists), and the level rises or falls depending on your performance. You can also raise the level by collecting juice powerups. When the meter is empty, the game is over.

## PAUSE MENU

You can pause the game at any time during play by pressing the **START button**. You will see these choices:

- |                      |   |
|----------------------|---|
| <b>RESUME GAME</b>   | Return to play where you paused the game.   |
| <b>CHALLENGES</b>    | View the current challenges for the level, and see which ones you've completed and which remain to do.  |
| <b>ATTRIBUTES</b>    | View your current skater's attribute levels.  |
| <b>SAVE</b>          | Save your current progress to the Xbox hard disk.   |
| <b>VIEW LOOT</b>     | View the various juice powerups you've collected so far.  |
| <b>TRICK LIST</b>    | View a list of various trick controls.  |
| <b>EXIT GAME</b>     | Quit the current run and return to the Main Menu.   |
| <b>SOUND OPTIONS</b> | Allows you to raise/lower SFX, Music and Speech Volume. You can also press the <b>right trigger</b> within the sound options menu to bring up the music playlist. This allows you to choose any track you wish to hear. You can also disable any tracks you don't wish to hear. |

# GAME MODES

## CAREER

### Tutorial

Start out by mastering the basics in the Tutorial mode. There are over 20 lessons. Once you've completed all of them you'll be ready to take on all the challenges of a full career. If you want to review a particular tutorial topic or challenge, press the **START button** to pause the game and bring up the tutorial menu. You can then scroll to the desired topic and press the **A button** to resume the mode on that topic.

## FREESKATE

In Freeskate mode, you practice your stuff on any available level, without the distraction of timed runs. You're free to roam, wander and wreck with abandon. You don't have to worry about the juice meter in this mode, it will not run out and you can still fill it up. You can also still get extra speed and open your secret tricks when it's filled! You can not build your attributes in Freeskate mode.

## TIMED RUN

A Timed Run gives you a chance to test your skills against the clock. Not that others aren't timed. Just that this one is even more timed. Ok, that's not true. There's a lot of tension in timed events. In some players a timed run brings out their best, grace under pressure and increased performance. In others, it causes hives and anxiety, if not outright panic. This can happen to the same player! Shock the world by showing you have the patience and skill to master the Timed Run!

## MULTIPLAYER

Join up with a pal for intense head-to-head skating action. In Multiplayer games, a split screen display is used, with player 1 on the left and player 2 on the right. Only certain unlocked levels are available for play.

### MULTIPLAYER MENU

- |                      |  |
|----------------------|--|
| <b>Most Points</b>   | The winner is the player with the highest score at the end of a run.   |
| <b>Best Trick</b>    | Best trick here means which skater can perform the most amazing skating stunt. It's a battle for top trick score.  |
| <b>Egg Hunt</b>      | Someone somehow has planted a number of secret items in the game! Your task here is to skate around and find the different items hidden on various levels. Be resourceful and search thoroughly!               |
| <b>Twenty One</b>    | Find the cards on the levels. Closest player to twenty-one without going over at the end of the timer wins. Knock the other guy over and he loses his cards.   |
| <b>Animal Rescue</b> | Like a brave fireman, you have a chance to rescue animals and bring them to justice. Or safety. Anyway, it's a pretty nice thing to do, and the more critters you rescue, the more your opponent will whimper. |

(You can also access Options, High Score, Level Select and Exit Game from this menu.)

## GAMEPLAY TIPS

- Perform tricks while Fakie (backwards) for higher trick scores.
- Tweak (hold) Grab tricks for bigger trick scores.
- Vault out of vertical ramps to start your trick chain earlier.
- Try to trick into and out of every grind.
- Use Special tricks for bigger scores.
- Make sure to add spins to your tricks for extra score multipliers.
- Every trick in a combo adds to your multiplier.
- Use manuals to keep your combo going across flat ground sections.
- Use Cess-slides to keep your combo going from big air tricks off ramps.
- Fill your juice meter to gain extra speed and allow access to your secret tricks.
- Look for Secret keys in each level that unlock hidden areas on other levels.
- Look for Secret hidden attribute icons on each level to help boost your skills.

## PARK EDITOR

The Park Editor allows you to create your own awesome areas to compete in.

## Player Select

First, choose a player to test your level by skating on it with the selected skater.

## Apron Select

Choose the basic apron style for your level. The apron is the area surrounding the main skate floor, the setting for your future glories. You can choose aprons that reflect the themes from the various unlocked levels.

## CREATING A LEVEL

The object is to create a park that is fun and challenging over multiple runs. You may have different ideas, of course. You may enjoy creating impossible parks, or pathetically easy ones. Whatever you're in the mood for is what you can make.

There are many, many park pieces to choose from. We stopped counting them after 10, but if it's raining today you may wish to take up where we left off. Or not. The important thing is that you can place and manipulate these many pieces to your exacting standards until you've created a park that is second to none. Or only to a few. Our crew is pretty good.

## EDITOR CONTROLS

<b>A</b> button	Place piece
<b>X</b> button	Rotate piece 360 degrees
<b>Y</b> button	Delete piece
<b>B</b> button	Not used
directional pad	Move piece
left thumbstick	Move camera
↑/↓ right thumbstick	Zoom in/out
left trigger/right trigger	Toggle category
white button/black button	Cycle through pieces in category

### To delete a piece

Pressing the **Y** button when a park piece is highlighted will delete that piece from your park.

## Terrain Tool

You can raise or lower the height of the terrain via pressing the **A** button when in Terrain Tool Mode and moving the **directional pad** **↑** or **↓**. To get into the Terrain Tool mode pull the **left trigger** at any time or scroll the categories section by pulling the **left trigger** and **right trigger** until you get to the Terrain Tool. You can release terrain grabbed by pressing the **X** button.

## Testing A Park Level

You can test your creation before you save it. **Select** Test Run and press the **A** button to test play the currently loaded park. To test a saved park, you can select any saved park and press the **A** button.

## Saving A Park Level

You can save as many parks as you can fit on your Xbox hard disk.

## Editor Pause Menu

Pressing the **START** button while in the Park Editor will bring up a menu with these choices:

**Continue** – Return to the editor and continue creating your park.

**Test Run** – Drop the skater into the park and test out what you've created.

**Save Park** – Save current park to the hard disk.

**Load Park** – Load a previously saved park from a hard disk.

**Clear Park** – Delete ALL the ramps placed in the current park.

**Sound Options** – Adjust available sound options.

**Exit Editor** – Quit the level editor and return to the Main Menu.

## **ACCLAIM® LIMITED WARRANTY**

ACCLAIM warrants to the original purchaser only of this ACCLAIM software product that the medium on which this software program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This ACCLAIM software program is sold "as is," without express or implied warranty of any kind, and ACCLAIM is not liable for any losses or damages of any kind resulting from use of this program. ACCLAIM agrees for a period of ninety (90) days to either repair or replace, at its option, free of charge, any ACCLAIM software product, postage paid, with proof of date of purchase, at its Factory Service Center. Replacement of the software product, free of charge to the original purchaser (except for the cost of returning the software product) is the full extent of our liability.

This warranty is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the ACCLAIM software product has arisen through abuse, unreasonable use, mistreatment or neglect. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES AND NO OTHER REPRESENTATIONS OR CLAIMS OF ANY NATURE SHALL BE BINDING ON OR OBLIGATE ACCLAIM. ANY IMPLIED WARRANTIES APPLICABLE TO THIS SOFTWARE PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE NINETY (90) DAY PERIOD DESCRIBED ABOVE. IN NO EVENT WILL ACCLAIM BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM POSSESSION, USE OR MALFUNCTION OF THIS ACCLAIM SOFTWARE PRODUCT.

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages so the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

This warranty shall not be applicable to the extent that any provision of this warranty is prohibited by any federal, state or municipal law which cannot be pre-empted.

**Repairs/Service after Expiration of Warranty**—If your software product requires repair after expiration of the 90-day Limited Warranty Period, you may contact the Consumer Service Department at the number listed below. You will be advised of the estimated cost of repair and the shipping instructions.

**Acclaim Hotline/Consumer Service Department (516) 759-7800**
