PROLOGUE

After a reconstruction effort that progressed at nothing short of a miraculous pace, the wounds of war are slowly healing over and a sense of normality is finally returning. Then, in the middle of a documentary about global refuse problems, for the briefest of moments, someone looking very much like a Morden soldier crosses the shot. An elite infiltration squad of six is put together charged with target confirmation and annihilation.

Marco, Tarma, Eri and Fio are joined by their old comrades-in-arms, Ralf and Clark. Under a veil of silence, an operation to land on the refuse island that's believed to be Morden's hideout gets underway...

THE CREW

MARCO ROSSI

Though generally good-natured, Marco becomes enraged at the mere mention of General Morden, who has been responsible for the loss of many of his friends and colleagues. He is a skilled member of the Special Forces squad and an elite hacker.

ERI KASAMOTO

Eri was an orphan, found abandoned in front of a church. One of her earliest memories is escaping from the church and becoming the leader of a street gang. Her leadership skills were discovered by the Government Forces Intelligence Agency, who gave her special training as a spy.

TARMA ROVING

In private, Tarma often makes fun of the over-serious Marco. He builds custom motorcycles as a hobby with a knack that rivals the professionals.

FIO GERMI

While still in two minds herself, Fio was made to join the Government Forces by her father. She was raised by loving parents and possesses a quiet demeanour. She is thinking of becoming a sports doctor in the future.

RALF JONES

Ralf and Clark are brothers-in-arms, and they always go into battle together. Off the record, Ralf is known to participate in tournament fighting, and his close-quarters combat ability far outstrips that of the average fighter.

CLARK STILL

Clark showed up in the mercenary squad some years ago, but nothing else is known about his past. Enemies unfortunate enough to run into him find themselves instantly flung into the air to land face down in the dirt.

GETTING STARTED

With the Nintendo DS power OFF, insert the Metal Slug 7 Game Card into the Game Card slot, and push it until it clicks into place.

FIRING UP THE GAME

After turning the power ON, you'll see a screen like the one pictured on the right. Make sure you understand the information displayed, and then touch the Touch Screen.

Touch the Metal Slug 7 panel on the DS Menu Screen, and the game's title screen will be displayed.

* If your DS is set to Auto Mode, this step will be skipped. For more information, please refer to your Instruction Booklet.

SAVING YOUR GAME

This game features an auto-save function. If you get a high score or all-clear time in the top ten ranking, you'll be given the opportunity to enter a nickname and save the details (see pages 13 & 17). You can clear this information by selecting "Reset Save Data" in "Options" (see page 9).

CONTROLS

Most of Metal Slug 7 can be played using only the DS's buttons. Please see pages 6 and 7 for a detailed breakdown of all the controls.

* The controls depicted below are the default controls when you first start the game. By selecting "Change Controls" in "Options" (see page 9) you can configure them as you wish.

* Pressing the L Button and the R Button at the same time as START and SELECT will reset the game and take you back to the start.

* Closing the DS during play will put it into Sleep Mode to conserve battery power. Simply open the DS again to resume the game.

* For information about playing on the Nintendo DS (NTR-001), please consult the Instruction Booklet.

BASIC COMBAT

PRIMARY FIRE

Y

Fire a shot from one of the intro weapons (like the handgun or heavy machine gun), or from an acquired item of weaponry (see page 15). At close quarters with the enemy, this executes a knife attack instead.

* The heavy machine gun is the intro weapon in beginner mode.

SECONDARY FIRE

A

Toss a hand grenade. You have a limited number of grenades, but acquiring an ammo item (see page 15) can increase your stock.

SPECIAL MELEE

L + Y

In contrast to a regular knife attack, you can unleash a special melee attack without being in close range of the enemy, or from a crouching position. However, it won't work on tanks or other forms of the enemy that blade attacks have no effect on. Ralf is an exception to this rule, though.

CHANGE WEAPON

R

Exchange the weapon you're currently equipped with for a reserve weapon (see page 14).

THROW WEAPON

L + A

Chuck the weapon you're currently using. You can't do this with intro weapons, however.

SPECIAL ACTIONS

Some characters have special abilities that can be activated by pressing UP on the +Control Pad + the L Button + the Y Button.

Marco

Salvo. Fire a volley of shots from a fixed position. (He can't move while performing this action.)

Tarma

Slug kick (see page 18). If "RECOVER" is displayed, endurance recovers by 1/3. If "DAMAGE" is displayed, endurance dwindles by 1/3.

Ralf

Vulcan punch. Ralf unleashes a fast series of punches while still able to move around. At close quarters with the enemy, this can even destroy tanks.

Clark

Super Argentine Back Breaker. Clark can throw the enemy. If you manage to throw a series of enemies with no more than 1.5 seconds between each throw, you get 1000 points for 1, 2000 points for 2, 4000 points for 3, 8000 points for 4 and 16000 points for 5 enemies thrown.

SLUG ACTIONS

BOARD / LEAVE SLUG

Pressing the B Button when you're near a slug that shows the "IN" marker, allows you to climb on board. Press DOWN on the +Control Pad + the B Button when you want to get off again.

FRONTAL ATTACK

Pressing the L Button will cause the slug to slam into the enemy and self-destruct, inflicting massive damage.

* Your character will automatically eject from the slug.

LEVEL SELECTION SCREEN

There are three levels of difficulty to choose from. Pick a level pressing UP and DOWN on the +Control Pad and confirm your selection by pressing the A Button.

Currently selected level.

Beginner	Low difficulty for uncomplicated fun. This is the best level to choose if you just want to play the game for a short period of time.
Normal	Medium difficulty. Progress carefully, and aim to complete all of the mission objectives.
Hard	Maximum difficulty. Experienced action gamers will want to challenge themselves to this level!

CREW SELECTION SCREEN

You can choose from the six main characters in the game. The Touch Screen shows a profile of the currently selected crew member. Use the Nintendo DS stylus to slide the scroll bar up and down to see all of the information. Pick someone using the +Control Pad and confirm your selection by pressing the A Button.

CREW PERFORMANCE PROFILES

Each character in the game has his or her strengths and weaknesses.

Marco	Marco is twice as effective with a handgun as the average crew member. When playing at beginner level, the heavy machine gun he uses is also doubly powerful. He can also carry out <i>salvo</i> attacks (see page 7).
Eri	Eri has a doubly large stock of hand grenades and grenade ammo. By using the +Control Pad, she can be made to chuck grenades freely in any direction.
Tarma	Tarma makes slug endurance and ammo double the normal amount. Vulcan cannon power also increases by 50%, and it can be used in fixed mode (holding down the primary fire button will unleash a volley of shots and fix the gun's aim).
Fio	Fio possesses a heavy machine gun as her intro weapon. She has 50% more ammunition and weaponry supplies than average.
Ralf	Ralf can attack at double speed in combat at close quarters. However, his ammunition and weaponry supplies are half the average amount. When first hit, he suffers no damage, but subsequent hits slow his movement.
Clark	Clark can throw enemies with his unique Super Argentine Back Breaker move (see page 7).

MISSION SELECTION SCREEN

Pick a mission by pressing UP and DOWN on the +Control Pad and confirm your selection by pressing the A Button.

* When you first play the game, you won't be able to select a mission. Once you've completed a mission, however, you'll be presented with a choice of missions.

SCREEN DISPLAY

You control the crew member on the Top Screen. The Touch Screen shows a map of the current level. Slide the stylus on the map to see what's coming up ahead of your current position. (You can also go back to the place where you started the level.)

CONTINUE SCREEN

If your entire crew falls in battle, you'll see a screen like the one shown on the right. If you'd like to carry on playing the game from where you were, press START before the countdown timer reaches zero. After you've picked a crew member, you'll be able to continue on your mission.

* Once you have run out of credits, you'll no longer have the option of continuing.

* Note that you can't save the progress that you've made through the current level.

WEAPON STOCK SYSTEM

You can hold on to a maximum of two items of weaponry that you acquire, not including the intro weapons (handgun and heavy machine gun). And any weaponry that you pick up during the course of a mission can only be used on that mission. Once you complete the mission, or if you are killed, you'll go back to being equipped with the intro weapons.

* The heavy machine gun is the intro weapon in beginner mode.

RUSH BLASTER SYSTEM

By carrying out repeated attacks within a set period of time, you can push up the rush blaster meter and increase your scoring potential. At first you double it, then quadruple it, and so on, up to a sixteen-fold increase. When the meter hits the maximum, it will start to flash white. From that moment until the meter falls back to zero again, you will score sixteen-times points! When the meter reaches zero, your points multiplier goes back to normal and you'll need to start pushing up the meter again.

Double points.

Quadruple points.

Eight-times points.

RESCUE POWS!

You can cut through the ropes binding POWs with a knife or a bullet. As soon as you touch a freed POW, that POW is considered successfully rescued! A rescued POW will give you items of weaponry or other special items as recompense.
