- Do not use the AC adapter if it has damaged, split or broken cords or wires.
- Make sure that the AC adapter cord is fully inserted into the wall outlet or extension cord.
- Always carefully disconnect all plugs by pulling on the plug and not on the cord.
- Make sure the Nintendo GameCube power switch is turned OFF before removing the AC adapter cord from an outlet.

⚠️ CAUTION - Motion Sickness

Playing video games can cause motion sickness. If you or your child feel dizzy or nauseous when playing video games with this system, stop playing and rest. Do not drive or engage in other demanding activity until you feel better.

Caution - Use of controls or adjustments or procedures other than those specified herein may result in hazardous radiation exposure.

CONTROLLER NEUTRAL POSITION RESET

If the L or R Buttons are pressed or the Control Stick or C Stick are moved out of neutral position when the power is turned ON, those positions will be set as the neutral position, causing incorrect game control during game play.

To reset the controller, release all buttons and sticks to allow them to return to the correct neutral position, then hold down the X, Y and START/PAUSE Buttons simultaneously for 3 seconds.

SCORE

During gameplay, you score points based on a number of factors:
■ Bond Moves – Each mission has a certain number of Bond-like actions you can perform. Your score increases for each action.
■ Enemies Subdued – How many adversaries you subdued.

NOTE: You will increase ammo efficiency and accuracy if you can manage to subdue them by hand!

■ Ammo Efficiency – A good spy overcomes his opposition while expending little ammo.
■ Weapon Accuracy – Aim well, hit your targets, and you are rewarded.
■ Damage Taken – The best Agents come through the worst missions without injury.
■ Mission Duration – A quick mission is the hallmark of a good spy. Completing the assignment in less time improves your score.
■ 007 Bonus – Once you attain a Gold Medal for a mission, you can replay the mission in order to pick up 007 Bonus Tokens. The tokens are hidden and scattered throughout the location. If you pick up all of the tokens – and your score is high enough – you may earn a Platinum Medal and a special reward.
■ Difficulty Bonus – You will be kindly rewarded for completing a mission on harder difficulty levels.

Players who score well during play will receive a medal: bronze, silver, gold, or platinum. Gold and platinum medals unlock bonuses, such as new weapons or new multiplayer maps.
**MI6 MESSAGES**

- During the course of a mission, MI6 has the ability to relay useful information to you. Using an ultra-quiet radio system, MI6 can talk to you directly.

If you successfully complete the mission, you may advance to the next mission. If you fail to complete your objectives, you must replay the mission. Good luck, 007.

**BOND’S WEAPONRY**

During missions, you may encounter powerful foes and experience high-risk situations. To complete your assignments, you need to rely on your weapons and gadgets.

Some situations require the use of force, while others demand stealth tactics. As you collect weapons along the way, learn to choose the best one for each situation.

- In the descriptions below, it is noted if an item is only available in multiplayer or single player missions.

**PISTOLS**

**WOLFRAM P2K**

Designed to be the next generation of sidearm for the German police, this pistol sports a compact design and smooth single-action firing mechanism. The P2K fires special lightweight 9mm bullets - while not the most powerful rounds in Bond’s world, they allow for rapid and precise firing.

- Bond’s Wolfram P2K can be fitted with a silencer that screws into the barrel.
- To arm the silencer, use Alt. Fire.
WINDSOR VIPER
This large, stainless steel pistol delivers a .44 Magnum bullet with tremendous stopping power. The Windsor is limited by a heavy recoil which reduces its rate of fire.

IAC DEFENDER
Developed for the Israeli military, the IAC fires the powerful .44 Magnum round at a steady rate of fire, thanks to a gas-powered blowback system. It's a powerful weapon, but accuracy suffers.

DARTGUN
For special single-player missions, R provides this gas-powered pistol capable of firing non-lethal darts. Use this weapon to immobilize innocent guards.

THE GOLDEN GUN
This special pistol is given as a reward for exceptional service in your first mission. It has all of the advantages of the standard P2K, except that it's more powerful.

■ In Multiplayer, the Golden Gun is capable of taking an opponent down in one shot.

SUBMACHINE GUNS
KOFLER & STOCK KS7
Developed for German border patrols, the Kofler & Stock KS7 is an inexpensive lightweight machine gun found in great numbers throughout the world. Its low firepower, poor accuracy, and small clip size make it effective only at close range.

INGALLS TYPE 20
Originally designed for urban police use, the Ingalls Type 20 never achieved popularity because of its poor accuracy. It immediately caught on with the criminal underworld, where its lack of finesse was viewed as an advantage rather than a liability. Compared to the KS7, the Ingalls has a higher rate of fire and a larger clip.

CALYPSO P-750
The large-capacity cylindrical magazine gives the Calypso P-750 an unusual look, but it carries more rounds than any other submachine gun. An additional grip gives it greater accuracy than the Ingalls or KS7, and a high rate of fire makes it a formidable weapon.

MUNITIONS BELGIQUE PS100
Built for the Belgian military, the PS100 features a dorsal magazine that holds more rounds than the Ingalls or the KS7. Its superior rate of fire makes the PS100 the most lethal submachine gun in the world.

ASSAULT RIFLES
KAZAKOVICH KA-57
The most recognizable assault rifle in the world, the KA-57 was developed for the Soviet infantry during the Cold War. It's a sturdy rifle with low stopping power and a slow rate of fire — more accurate than a submachine gun, but lacking the punch of other assault rifles.

WINDSOR FSU-4
A version of the US Army's standard-issue assault rifle, the Windsor FSU-4 offers a decent rate of fire and accuracy with the added benefit of a grenade launcher.

■ To switch to the weapon's grenade launcher, select Alt. Fire.

MEYER-WESTLICHNER UGW
While other nations preferred steel and aluminum-alloy weapons, the Austrian Army realized the possibilities of designs based on plastics. The UGW features a good rate of fire and excellent accuracy, aided by a 3x scope.

KOFLER & STOCK D17
The revolutionary design from Kofler & Stock may change weapons forever. The D17 fires caseless ammunition which increases the weapon's accuracy. With a high rate of fire and a powerful 4x scope, the D17 ensures considerable firepower on a target with a high degree of accuracy.

OTHER
HAND ATTACK
Your hand-to-hand combat training allows you to deliver a devastating knock-out blow with your bare hands. In certain situations, a single strike can take down an opponent.

■ Only available in single-player.

FRINESI SPECIAL 12
Used by police forces around the world, this 12-gauge combat shotgun has limited range but tremendous firepower.

■ In Multiplayer, Alt. Fire turns the Frinesi into an automatic shotgun.

SWZ SSR4000
A bolt-action rifle, the SSR4000 can deliver powerful rounds accurately and at great distances. A single shot from the SSR4000 neutralizes almost any opponent. In addition, the SSR4000 has the power to penetrate armored helicopter gasheshields.

■ The SSR 4000 is equipped with a 6x telescopic sight. To access the scope, use either the Alt. Fire or Manual Zoom.
GRENADES (SINGLE PLAYER)
Grenades can be used to attack opponents while taking cover.
- To throw a grenade, press the R Button (the Fire Button in the default controller setup). To increase the range of your throw, hold down the Fire Button before releasing. The longer you hold down the button, the farther you'll throw the grenade.

MRL-22
This compact, shoulder-launched weapon fires unguided rockets that deliver tremendous firepower. Accuracy is not a premium with the MRL-22 since collateral damage ensures neutralization of any nearby opponents.
- In Multiplayer, Alt. Fire allows the MRL-22 to fire guided rockets. The rocket tracks your targeting cursor until it hits a solid object.

FIXED GUNS (SINGLE PLAYER)
You will encounter various fixed guns mounted on pedestals. These can be used against enemy vehicles and helicopters.
- To use a fixed gun, move to the weapon's handles and press the A Button (The Action Button in the default controller setup). Press the A Button a second time to walk away from the fixed gun.

GRENADE LAUNCHER (MULTIPLAYER)
The grenade launcher shoots grenades farther and faster. It's an effective weapon for eliminating snipers and players camping in hard to reach areas.
- Alt. Fire turns a grenade into a Cluster Grenade. The Cluster Grenade dispenses a series of sub-munitions that spread out over a wide area before exploding. Each sub-munition does less damage, but the overall area of effect is greater.

MINES (MULTIPLAYER)
Multiplayer features an array of interesting mines. These devices can be placed on almost any surface. Trip Mines display laser beams in your team color. Walking through the beam damages you or your enemy. Proximity Mines explode when any player enters the mines’ detection area. Detonator Mines are the most destructive of all mines and also require the most skill to use. Once mines are placed, you can detonate them using the Q-Remote gadget.

PHOTON CANNON (MULTIPLAYER)
The Photon Cannon is an experimental MI6 Training Center weapon. It shoots two different types of projectiles. These projectiles are highly destructive energy balls. The primary firing mode shoots a homing projectile that targets players as they move.
- The Photon Cannon Alt. Fire mode shoots a volley of up to 5 energy balls. When this mode is fully charged the results can be devastating.

GADGETS

Q-DECRYPTOR
The Q-Decryptor function on your cell phone can come in handy. A sophisticated computer de-scrambles encrypted codes in doors and mainframes. Point and activate this tool to open locked doors and systems.

Q-CLAW
Hidden in your cell phone is the Q-Claw, a double-coiled filament that can be used to climb up to ledges and balconies. If the filament strikes a suitable surface, it grabs and holds, pulling the holder of the Q-Claw towards that point. Very useful in securing entrance to above-ground areas.

- In Multiplayer, players can use the Q-Claw and fire weapons simultaneously.
- In Multiplayer, almost any surface can be clawed.

Q-LASER
When activated, the Q-Laser emits a short-range laser with tremendous cutting power. This tool is very useful for breaking locks.

Q-SPECS
These x-ray glasses can reveal hidden doors, hatches or panels. Dress for success, 007.

Q-CAMERA
This compact tool of the spy trade should come in handy. Select the camera and point it so that the subject is in the center of the screen. Press the B Button to take a snapshot (the Use Gadget control in the default controller setup).
Q-REMOTE
The Q-Remote downloads wireless transmitter programs and activates their corresponding devices. When you come across a device that emits or receives a green-colored pulse, point the Q-Remote at the device and press the B Button. The device is then activated.
If the device is receiving red pulses, you must first locate the program emitter and download its program before you can activate it with your Q-Remote.

Q-CARD
Point and activate the Q-Card at any electronic lock. In a few seconds, the Q-Card can resolve the locking mechanism and deactivate it.

Q-JET
The Q-Jet can lift an agent into the air to reach elevated platforms or stations. It is a short-burst mechanism, requiring frequent recharges.
- To operate the Q-Jet, use normal movement controls.
- To recharge your Q-Jet, look for nearby Refueling Stations and press the A Button (default Action Button) to refuel.
- In Multiplayer, Q-Jet continuously regenerates.

ITEMS
In addition to your variety of gadgets, there are also a number of useful items to be found in each mission. When collected, items are automatically applied to your inventory.

ARMOR
Armor partially restores your health when you’ve been injured.

WEAPONS
Enemies may drop weapons that you can use.

KEYCARDS
To gain access to secure areas, you may have to acquire a keycard from enemy personnel.

AMMO CLIP
Adds ammunition to a specific weapon.

BOND BEHIND THE WHEEL
When you’re driving, you are responsible for all domestic laws of the road—except when circumstances make that, well, difficult. Each vehicle is equipped with weapons and an integrated navigation system to help you to locate and track items and enemies in the world. And do try to bring the car back in one piece, will you, 007?

NOTE: You cannot configure the driving controls. There is only one set of controls for the driving missions.

DEFAULT DRIVING CONTROLS

- To view a full map for a driving mission, open the Pause screen. To open the Pause screen, press START/PAUSE. Then, highlight MAP by pressing Control Pad Left/Right.

VEHICLES

BMW 750iL
The height of elegance in the BMW line, the 750iL defines smooth driving and sleek performance. Powered by a panther of a 12-cylinder engine, the 750iL throttles evenly under any conditions.

BMW Z8
The latest in performance from BMW, this exquisite two-seater can run with any production sports car in the world. Its five-liter V8 engine powers this lightweight car to 60mph in less than 5 seconds. Top speed approaches 150mph.

ASTON MARTIN DB5
The Aston Martin DB5 has become increasingly hard to find. Only 1,021 cars were made between 1964 and 1965, and they are favorites among collectors. For more practical purposes, the DB5 is a fine performer on the European autobahns. Quick off the line, a DB5 can reach a top speed of 143mph.

DRIVING WEAPONS
The following are available weapons for the rail-shooting missions.

CH-6
This rocket launcher projects unguided missiles wherever you point it.

KA-57S
The S stands for "scope." With the scope attachment, this rifle becomes a fine weapon for accurate long-distance shooting.

SHOTGUN
This 12-gauge weapon features pump-action reloading. It can also operate as a long-distance weapon, but with greatly diminished effectiveness.

RCH-1
User-guided rockets. When launched, the view switches to that of the rocket until it impacts the target.

- To detonate a RCH-1 rocket before it impacts the target, press the R Button (the button in the default controller setup).

NOTE: Not all weapons are available in all rail-shooting missions.

The following are available when you are behind the wheel of MI6's finest vehicles.

MACHINE GUNS
All MI6 vehicles come equipped with standard, forward-mounted machine guns. These have unlimited ammunition, but are by no means the most accurate weapon in your arsenal.

ROCKETS
These forward-firing projectiles have no guidance systems, so use with caution.

MISSILES
Vehicle-mounted missiles that will lock onto the nearest target. Allow sufficient time for target lock before firing!
DRIVING GADGETS
R has prepared a set of gadgets for your use during driving assignments.

Q-PULSE
The Q-Pulse emits an electromagnetic shock wave that disables electronic devices within its radius. Since most vehicles operate with electronically controlled fuel injection systems, the Q-Pulse should stop them in their tracks.

Q-VISION
Q-Vision goggles reveal all sources of heat. They are a good means of detecting an enemy lying in wait in the dark.

Q-SMOKE
Use the Q-Smoke to throw up a smoke screen to disorient enemies in pursuit.

Q-SLICK
This oily concoction trips up pursuing vehicles and sends them sliding for a long way.

Q-BOOSTER
For a temporary burst of speed, use the Q-Booster to evade your pursuers.

MISSIONS
During a mission you may receive messages from M instructing you of a change of plans. The current mission objectives are always available through the Pause screen.

◆ To open the Pause screen, press START/PAUSE during gameplay. To see mission objectives from the Pause screen, press ◆ Control Pad Left/Right and highlight the Objectives option.

OBJECTIVES AND SCORING
The most important thing, 007, is to complete the objectives of the mission. Of course, a good spy overcomes his opposition with a minimum of gunfire. Should the use of weaponry become unavoidable, accuracy is an important factor. But remember, 007, we at MI6 teach our agents that less noise and fuss is always preferable. For more information, ▶ Score p. 13.

CHANGING OBJECTIVES
During a mission, 007, your objectives may change. When an objective changes, MI6 calls via radio link to inform you. The new objectives become available through the Pause screen. For more information, ▶ Pause Screen p. 14.
ALLIES AND ENEMIES

ALLIES

M

M is a stickler for detail and detests shoddy work among any of her agents. Before each mission, she informs you of the latest intelligence data.

Objectives may change during a mission. At any time, you can read the current objectives through the Pause screen. For more information, ➤ Pause Screen p. 14.

R

A master inventor, R delivers the gadgets that you need in order to complete your assignments. Some of his projects have taken years to complete, and he does get a bit testy when they are misused or destroyed. Do be careful with them, won't you?

ZOE NIGHTSHADE

One of the CIA's undercover agents, Zoe Nightshade is willing to assist you in your efforts to stop Adrian Malprave. Zoe is also skilled in a variety of firearms and is a world-class driver.

ENEMIES

An outfit calling itself Identicon Corporation has been cropping up frequently in reports from the field. MI6 has begun a full investigation of Identicon and will report its findings to you as they become available. At this point, details are sketchy, 007, but you should familiarize yourself with these individuals associated with Identicon.

ADRIAN MALPRAVE

It is only recently that Adrian Malprave has come to the attention of MI6. Starting with a small shipping concern twenty-five years ago, Malprave has developed Malprave Industries into one of the world's largest and broadest multi-national corporations. Malprave Industries is actively involved in oil, shipping and emerging fields such as bio-technology. Malprave has recently been photographed with known underworld figures such as Carla the Jackal, and an investigation has revealed that some connected subsidiaries have no apparent corporate function or income at all.

NIGEL BLOCH

Bloch is CEO of Identicon Corporation, a subsidiary of Malprave Industries that has come under suspicion during the MI6 inquiry. A brilliant engineer and shrewd businessman, Bloch has, until now, only a brief dossier in MI6 files. Twenty-one years ago, he was convicted of securities fraud and falsifying data related to a patent application. Since securing his release from Whitemoor Prison, he has apparently led a clean life with a number of professional successes and citations in the field of bio-technology research. However, his association with Malprave leads MI6 to believe that Bloch has returned to criminal activity.

CARLA THE JACKAL

No one knows the real name of Carla the Jackal—an encounter with her is usually the last. Drifting in and out of the shadows of international terrorism, Carla has been spotted in Paris, Jakarta, Lisbon, Tripoli and Miami and was recently photographed with Malprave in Hong Kong. She has made a name for herself as a thief with extraordinary abilities to escape capture. Always available for hire, Carla appears to have a growing relationship with Adrian Malprave. Their intentions are unknown.
MULTIPLAYER
