The Nintendo® 64 Controller

Control Stick Function
The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding down the L and R Buttons.

The Control Stick is a precision instrument; make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center®.

Holding the Nintendo 64 Controller
While playing the Mario Party 3 game, we recommend you use the hand positions shown on the left. By holding the controller like this, you can operate the Control Stick freely with your left thumb. Using your right thumb, you can easily access the A, B or C Buttons.

Connecting the Nintendo 64 Controller
Up to four players can play this game. Connect each player's controller to the appropriate controller socket on the front of the control Deck. Beginning on the left, the sockets are for Player 1, Player 2, Player 3, and Player 4. You cannot start a game if the first controller socket is empty.

If you change the connection during the game, you will need to either press RESET or turn the power OFF to make the connection active.

You must use two, three or four controllers to play in the two-, three- or four-player game modes.

N64 Rumble Pak™
This game is compatible with the Rumble Pak accessory. Before using it, be sure to read the Rumble Pak accessory instruction booklet carefully. Make sure that the Control Deck is OFF when inserting or removing the Rumble Pak accessory.
A Star is Born...

In the center of the vast universe, a remarkably bright star was born. It was a star that is born only once in a thousand years, the Millennium Star. According to legend, whoever possessed this mystical star was destined to become the Superstar of the universe. However, since the Millennium Star was but a newborn, it fell from the starry sky.

Around that time, Mario and his friends were all happily relaxing when suddenly the Millennium Star came crashing down. Mario and his friends soon began arguing about who should keep the Millennium Star.

Suddenly, The Millennium Star gave off a brilliantly bright flash of light. And with that bright flash, Mario and his friends were transported inside a toy box!

“Greetings. I am the Millennium Star. You must pass my test to prove yourself worthy of possessing me. You must journey across many lands and collect the Star Stamps. If you can collect all seven, I shall accept you as the top Superstar in the universe.”

Who will collect the seven Star Stamps and become the universe's top Superstar?

Playing Mini-Games

A Mini-Game will begin at the end of each turn once all players have finished moving. The type of Mini-Game that starts depends on the colors of the spaces where the players have stopped. Before a Mini-Game begins, Green Spaces will randomly change to either Red or Blue Spaces.

4-Player Mini-Games (All players are on same-colored spaces.)

In these four-player free-for-alls, defeat your rivals or be the last player remaining to win.

1 Vs. 3 Mini-Games (One player is on a different-colored space.)

In these 1-on-3 Mini-Games, the single player must battle the other three.

2 Vs. 2 Mini-Games (Two players are on same-colored spaces.)

In these 2-on-2 Mini-Games, players must team up and work together to claim victory.

The Last Five Turns

When you reach the last five turns of a game, the current standings will be announced and the following rules will take effect:

1. The value of Blue and Red Spaces will double. Blue Spaces will give you six coins and Red Spaces will take away six coins.

2. When two or more players stop on the same space, they will set the number of coins they want to risk, then battle it out in a Duel Mini-Game.

With these changes, a comeback is always possible. Don’t give up!

Determining the Winner

Final Results

After the set number of turns has been completed, the game is over. If the BONUS setting has been selected, the winners of the three awards will be announced and each winner will receive a star.

- Millennium Star: Awarded to the player who wins the most coins in Mini-Games.
- Coin Star: Awarded to the player who has the highest overall coin total.
- Happening Star: Awarded to the player who lands on the most Spaces.

In the end, the player with the most stars will be named the Superstar! If two or more players have the same number of stars, then the player with the most coins will be the winner. If two or more players have an equal number of both stars and coins, the players must hit a Dice Block to determine the winner. The highest number will win!
**Chilly Waters**

Chilly Waters is set in a land of frigid snow. The frozen lake will crack if two players are on it at the same time, and there are patches of slippery ice that you sometimes can't cross.

This board is at the bottom of a deep, dark sea. You're sure to question your luck as Sushi and a giant squid appear and throw you off course.

You're bound for a land of scorching sunshine when you select Spiny Desert. Two Millennium Stars appear, but one is a mirage and will vanish as soon as you reach it.

Woody Woods is a magical forest with giant talking trees. You can move only in the direction of the arrow signs and may end up going in circles.

This board map is set in an enormous cave. A mining car travels across the board, but you must have good timing to jump on and take a ride.

---

**Duel Maps**

Duel Maps are one-on-one game boards where you use partners to attack your opponent. Instead of collecting stars, win these battles to claim victory.

1. Set up Handicaps, the board map and the number of turns.
2. Determine turn order and pair up with partners.
3. Receive 10 coins and begin the game.
4. When both Player 1 and Player 2 have completed this cycle, a full turn is complete. In Lite Play, a game will last 20 turns.
5. Your partners will leave if you can't pay their salaries.
6. If no partners are able to attack, battle will not occur.
7. Meet your opponent and begin battle. (Partners will attack.)
8. Depending on the space where you stop, an event or Mini-Game will occur.
9. If one player has zero health at the end of battle, the game is over.
10. See Results

---

**One-Button Action**

Action Time is an event that occurs on Battle Royal Maps. For example, on Chilly Waters, a giant snowball will come rolling along to send you scampering. But if you press the A Button at just the right time, you can jump over it.

Duel Map Spaces

**Normal Space**

These spaces belong to the first character to stop on them. If you land on one of your own spaces, you will receive a set number of coins. But if you land on one of your opponent's spaces, you must pay. The number of coins you receive or pay will change depending on what number turn it is during the game.

**Number of Coins Earned or Paid**

- **Over 16 Turns:** 10 Coins

**Belltop**

Although he doesn't have his own space, he appears on all of the Duel Game Boards. Each time a player passes Belltop, the number on his bell will decrease. When the number reaches zero, the players will be called before Belltop and a Duel Mini-Game will begin. The number of coins a player can win will depend on the current turn number.

- **Turns 1-10:** 20 Coins
- **Turns 11-20:** 30 Coins
- **Over 20 Turns:** 40 Coins

Battling with Partners

**Battle Rules**

You can travel with one or two partners at a time, depending on how much you want to spend and how vulnerable you think you are. Deciding whether to place a partner in front of or behind you requires some strategic thinking.

**When Battles Happen**

If your partner is between you and your opponent when you meet on your turn, your partner will automatically attack. Likewise, if your opponent has a partner between you and him on his turn, that partner will attack. But if your- or your opponent's partner isn't in the right position, no battle will take place.

**Taking Damage**

If your partner isn't between you and your opponent's partner when you're attacked, you'll take the damage directly. And when your sidekick attacks your opponent when he's not protected by a partner, he'll take damage.

**For Example...**

Let's suppose Yoshi uses Boo to attack Luigi and Luigi defends with Goomba. Battle damage would be calculated like this: Boo's Attack Power is 2, and Goomba's Strength is 1. So Goomba takes 1 point of damage and disappears, leaving Luigi to also take 1 point of damage.

*For more on partners, see page 32.*
The Partners

**Koopala**
*Attack Power - 1*, *Strength - 2*, *Salary - 1*
Koopala's good strength and low salary make him quite a bargain. Mario always starts with Koopa at his side.

**Goomba**
*Attack Power - 2*, *Strength - 1*, *Salary - 2*
The offensive-minded Goomba joins Luigi on the Duel Maps. He has good attack power but low strength.

**Toad**
*Attack Power - 1*, *Strength - 1*, *Salary - 1*
Toad lets you land on enemy spaces without having to pay, but he has low overall stats. He and Peach are fast friends.

**Bob-omb**
*Attack Power - 1*, *Strength - 1*, *Salary - 3*
The explosive Bob-omb will pass by enemy henchmen in favor of a direct attack on your opponent. Wario trusts him more than anyone.

**Boo**
*Attack Power - 2*, *Strength - 1*, *Salary - 3*
When attacked, Boo can counterattack for equal damage before disappearing. Yoshi relies on Boo to back him up.

**Whomp**
*Attack Power - 0*, *Strength - 4*, *Salary - 3*
Together, Whomp and DK make a mighty duo. Although a defensive powerhouse, Whomp never attacks.

**Snifit**
*Attack Power - 2*, *Strength - 2*, *Salary - 5*
Daisy prefers to duel with Snifit by her side. He will sometimes give you up to four coins at the start of your turn.

**Piranha Plant**
*Attack Power - 3*, *Strength - 1*, *Salary - 5*
The Piranha Plant can sometimes find a special die that lets you move up to three extra spaces. It's Waluigi's favorite flower.

**Chain Chomp**
*Attack Power - 1*, *Strength - 2*, *Salary - 6*
Chain Chomp will damage all members of the opposing team in one vicious attack. He packs quite a bite.

**Thwomp**
*Attack Power - 2*, *Strength - 2*, *Salary - 4*
Thwomp is so powerful that he can flatten enemy henchmen with one blow, but he will never attack your opponent directly.

**Mr. Blizzard**
*Attack Power - 1*, *Strength - 3*, *Salary - 2*
A master of the long distance offensive, Mr. Blizzard will attack only the enemy that is farthest away from him.

**Baby Bowser**
*Attack Power - 1*, *Strength - 1*, *Salary - 3*
Baby Bowser does triple damage if he can successfully transform into Bowser. But if he can't, his attack fails.

In the Mini-Game Room, you can play all of the Mini-Games you have unlocked during normal board map play.

**Getting to the Mini-Game Room**

You can get to the Mini-Game Room while in Party Mode, but if you haven't played any Mini-Games in regular board play, the way to the Mini-Game Room will be closed.

**Three Game Rooms**

**Free Play Room**

This is the first place you will stop when entering the Mini-Game Room. Here you can play all of the Mini-Games you've unlocked in board map play.

**Battle Room**

Enter the Battle Room to compete in a series of Mini-Games chosen randomly from the games you've unlocked during regular board play.

**Game Guy Room**

This is the place to play Game Guy Mini-Games. Receive 10 coins upon entering, then try to earn winnings of over 1,000 coins. You must satisfy certain conditions during Story Mode to gain entrance to this room.
**Star Lift**

Take the Yellow Star Lift to get to the Mini-Game Room. Complete the following setups before you arrive.

**Number of Players and Character Selection**

Select the number of players and the characters that the players will use. If there are not enough players, select the characters to be controlled by the computer, too.

**Computer Character Skill Level**

If there are any computer-controlled characters, set their skill levels to EASY, NORMAL or HARD. You can set all of the computer-controlled characters to the same skill level, or you can set them individually.

If you're all set, head for the Mini-Game Room!

**Free Play Information**

Toad will be your guide in this central area of the Mini-Game Room. He will let you play the Mini-Games you've unlocked and let you view game records.

**Free Play**

To play Mini-Games stored here, first select Toad, then press the A Button. Next, choose "Play Mini-Games" from the menu. All of the Mini-Games you've unlocked to this point will be stored as books and placed on the bookshelves in separate categories. You can view the rules for each Mini-Game before playing, and you can play the same game over and over. This is a really good way to practice.

**View Records**

You can view the high scores for all of the Mini-Games. The records you can view here are the same ones that appear on the Red Koopa Computer. (See page 16.)
**Battle Room**

Open the blue door to enter the Battle Room. Toad will be your guide here.

**Random Battle**

This is the place to test your Mini-Game mastery. Toad will push you to the limit in a series of randomly selected Mini-Games.

**Set Number of Wins**

First, select the number of games you must win for Random Battle victory. You can choose 3, 5 or 7 games.

**Mini-Game Type**

Next, select the type of Mini-Game to be played. Use the Control Stick to set teams according to the type of Mini-Game selected. Play will continue until a player wins the number of games determined for victory.

**Random Battle Mini-Games**

To get into the Battle Room, you must unlock three or more games in one of these categories during board map play.

- 4-Player Mini-Games
- 1 Vs. 3 Mini-Games
- 2 Vs. 2 Mini-Games
- Duel Mini-Games
- Battle Mini-Games

---

**Game Guy Room**

Open the red door to enter the Game Guy Room. You must meet certain conditions in Story Mode before you can enter this room. Game Guy will be your guide here.

**Game Guy Battle**

Feeling lucky? If so, head for the Game Guy Room! In the single-player Game Guy Battle, you'll play only Game Guy Mini-Games. The only thing you'll need here is luck!

**Rules**

First, you receive 10 coins. If you can earn over 1,000 coins, you win. If your coin total reaches zero, you lose. Once the Game Guy Mini-Game to be played has been determined, select the number of coins you want to play with.
Your Mario Party 3 Game Pak has a data back-up feature. The following are types of information that you can save.

**Saving During Board Game Play in Party Mode**
You can save at any point during a game. All Battle Royal Map and Duel Map games can be saved individually.
- For more on saving, see Pause Menu information on page 34.

**After Finishing a Board Map in Party Mode**
When you return to the Castle Grounds after finishing a board map game, the following items will be saved automatically.

1. **Unlocked Mini-Games** *(All related Mini-Game records will also be saved.)*

2. **The number of times each board map has been played and the win/loss records of the individual characters.**

3. **Sound Settings**

**Story Mode**
You can choose whether or not to save upon completion of an individual board map game. You can set the save options during game play via the Pause Menu. Story Mode data and Party Mode data will be saved separately.

**Mini-Games**
If any new Mini-Game records are set during play in the Mini-Game Room, those records will automatically be saved when the player changes rooms or returns to the Castle Grounds.
