2. *How to Operate the Controller*

A Button & B Button: use to fire the fighter's missiles.

Start Button: use to start or stop the game.

Select Button: use to select either one or two players.

Control Pad: Use to move the fighter right or left.

When you press "*Select*" or "*Start*," you will move to the "*Select*" screen. Choose either one player or two players by using the "*Select*" button, and then press the "*Start*" button. The game will now begin.

Pause—If you wish to stop or interrupt play in the middle of a game, press the *Start* button. If you press it again, the game will continue.

Even when you press the "*Reset*" button, the highest score will not disappear from the screen.

3. *How to Play the Game*

Score—The player gets points by defeating the “Galaga.” Points scored vary depending on the type of attacks and the condition of the enemy. It may be in the waiting position, an offensive mode, or flying in formation.

Galaga—It takes two hits for the player to destroy the boss Galaga. Among the many other “Galagas” is one special hidden “Galaga” which changes shape and can split into many pieces. Destroy all of the transformed Galaga, and gain 1,000-3,000 additional bonus points!

Challenging Stage—The player has a chance to obtain bonus points every third stage. A total of nine different “Galaga” appear on the screen, and they all fly in unexpected directions. If you destroy all of them 10,000 perfect score bonus points will be added to your score.

Tractor-Beam—When the fighter is struck by the tractor-beam of the boss Galaga, the fighter will be captured. When the attacking boss “Galaga” is destroyed any captured fighter will be released and become a dual fighter—doubling your fire power. (When you are captured and there are no fighters left, the game is over.)

Hit Ratio—When the game ends, the score board indicates the number of missiles fired, the number of “Galaga” destroyed and the percentage number of targets hit.

The number of stages is indicated in the lower right hand corner of the screen. The number of remaining fighters is indicated on the right side of the screen.

At scores of 30,000, 70,000, and every 70,000 points thereafter, one additional fighter is added.

4. *Characters*

Fighters—Fighters are the spaceships operated by the player. They move to the right and left and can destroy “Galaga” by firing a series of missiles. “Dual fighters” can shoot the enemy with two parallel missiles.

Galaga—The “Galaga” are an unknown alien, which has an insect shape. They fly in formation and begin attacking. The boss “Galaga,” in the highest position, is the only one capable of shooting the tractor-beam. If the boss “Galaga” is destroyed, the remaining “Galagas” attack power is temporarily weakened.

5. *Winning Strategies*

Fire when "Galaga" is weakened (unable to fire missiles)—When the player destroys the boss "Galaga," the enemy is temporarily weakened. You should take advantage of this moment and attempt to destroy the remaining "Galaga." You need only to avoid the "Galaga" crashing into you.

Escape Plans—Attack the right and left sides of the enemy formation while they are trying to organize to create escape zones for your fighters. If not, you may be surrounded by the enemy and lose the opportunity to escape. (Caution: "Galaga" may still attack in the escape zones.)

“Dual fighters” are the key—If you attack with the “dual fighters,” your fire power doubles. When the enemy attack escalates, it will be very difficult to defend your position or obtain a perfect score—particularly during the “challenging stage”—without dual fighters.

The Blue Boss is your Best Chance—When you hit the boss “Galaga” with your missile and turn it blue, it will be easier for you to destroy it even if it has captured fighters.
