WELCOME TO THE NFL®!

Madden NFL '94 features 80 teams, including 28 1993 NFL teams playing a full 16-game schedule. It also features 12 all-time great franchise teams, 38 Super Bowl teams since 1966 and two "All-Madden" teams. These are the greatest teams ever assembled! If you've ever wondered how the rugged teams of old would match up against the flashy teams of today, this special edition will give you some insight. All we're missing is the grass stain on the uniforms.

STARTING THE GAME

1. Flip OFF the power switch on your Super Nintendo Entertainment System®.

WARNING: Never try to insert or remove a Game Pak when the power is ON.

2. Make sure a Controller is plugged into Port #1 on the Super NES.

3. Insert the Game Pak into the slot on the Super NES. Press firmly to lock the Game Pak in place.

4. Turn ON the power switch.

PLAYING A REGULAR GAME

THE SCOUTING REPORT

When you exit the *Player Select* screen, The Scouting Report appears. Here both teams are compared in nine major areas. The higher the yellow bar in a team's rating graph, the more talent the team has in that area.

Press **START** to exit.

COIN TOSS/WIND

Before the referee can start the game, the coin must be tossed. The winner must choose to kick or receive, and the loser must choose which goal his team will defend in the first half. Press the Control Pad **LEFT/RIGHT** to toggle between Heads and Tails before the coin hits the ground.

If you lose the toss, you must choose a goal to defend. Look at the wind sock to see which direction (if any) the wind is blowing. Make sure to note which goal the wind is blowing toward, and remember that the wind blows with the same force and in the same direction for the entire game. Press **Y** to defend the home team's goal or **B** to defend the visiting team's goal.

RECEIVING THE KICK

If you're receiving the kick, your return man automatically catches the ball. If the return man catches the ball in the end zone he will remain in place until you run him out. If you do not run him out, the referee will signal a touchback. If the return man catches the ball in front of the endzone he will automatically move up-field. You can take over any time you wish by pressing the Control Pad.

Press the Control Pad in the direction you want the player with the star to move.

KICKING

Power Meter

The following kicking instructions apply to kickoffs, punts, and field goals.

1. Press **B** to snap the ball and start the Power Meter moving upward.
2. To aim the kick, Control Pad **LEFT/RIGHT** after you press **B**.
3. Press **B** again to stop the meter and strike the ball. The higher the meter is at the time when you stop it, the farther the ball will travel.

Onside Kick

1. Press **A** to call an audible.
2. Press **A** again to set the onside kick formation.

(If you change your mind and want to return to the normal kickoff formation, press **A** and then **Y**.)

3. Press **B** to start the Power Meter.
4. Press **B** again immediately while pressing the Control Pad **RIGHT**.

OFFENSIVE COORDINATION

Madden NFL '94 allows you the choice to control a play from the moment the ball is snapped till the referees blow it dead, or to simply call a play and watch it unfold. But before you can call a play, you have to select a set and a formation.

Press the Control Pad **UP/DOWN** to toggle through sets, formations, and plays. Press **A**, **B** or **Y** to choose the set, formation or play in the corresponding box. (See **FORMATIONS** on page 27 for descriptions of each set and formation.)

*You can change your mind before you call a play by pressing the **LEFT** or **RIGHT** triggers. This takes you to the set or formation selections. To change a play after you have selected a play, you must burn a timeout or take a delay of game penalty.*

AUDIBLES

An audible changes the play at the line.

1. Press **A**. The Audible Indicator appears on the screen.
2. Press **A**, **B** or **Y** to select an audible.

You can program up to three offensive (and three defensive) audibles at any time between plays or whenever you're at the Game Paused screen

■ To Set Audibles:

- 1) From the Game Paused screen, Control Pad **UP/DOWN** to highlight **SET AUDIBLES**, then press any button.

The **PLAYCALLING** screen appears.

- 4) Control Pad **UP/DOWN** to highlight the play of your choice, then press the button corresponding to the play.

The **GAME PAUSED** screen appears. Press **START** to return to the action.

HINT: A fake snap might draw the defense offside.

Press **X**

RUNNING

The handoff on a running play is automatic. You take control after the handoff. The star symbol marks the ball carrier, and his jersey number appears so you know who he is. Use the Control Pad and the action buttons to move the ball carrier through the defense, or watch the computer execute the play you just called.

Dive	Press Y
"Umph"	Press B
Spin	Press A
Hurdle	Press X

PASSING

There are three receivers for every passing play, represented by the Y, B and A buttons. Pass to a receiver by pressing the corresponding button.

At the line of scrimmage you can send a receiver in motion by pressing the Control Pad LEFT/RIGHT.

After you snap the ball, wait for the passing windows to pop up before you press any buttons or the Control Pad. You can let the computer execute the play or you can press the button that matches the window of the intended receiver.

TAKING CONTROL OF THE QUARTERBACK

If you move the quarterback out of the pocket or off his designed roll-out by pressing the Control Pad in any direction, the computer will no longer execute the play. Then it's up to you to press B to bring up the passing windows, choose a receiver, and pass the ball.

Once the ball is in the air, the passing windows disappear. The target spot where the ball is headed appears on the field as a yellow, circled cross.

Yellow circled cross

Press B to switch control to the intended receiver, then use the Control Pad to guide the receiver to the spot if he's not already there. Also, you can press X to raise the receiver's hands. This increases the chance of catching the ball.

- Reach for the ball: Press X

NO HUDDLE OFFENSE

When the clock's running down at the end of a half or at the end of a game, most teams don't take the time to huddle. At the end of a play you can go straight to the line of scrimmage in one of two ways:

- Press A right after the whistle.
- or
- Select "No Huddle" from the Play Select screen. After the next play, the Play Select screen appears. It shows six plays, one of which is the play you just ran.

If you choose to run one of the the plays from the previously run formation, your team returns to the line of scrimmage without a huddle.

If you use the Control Pad to scroll through other plays, your team huddles up and, thus, takes more time off the clock.

You can also run a "Stop Clock" play where the quarterback throws the ball into the ground to stop the clock. This is useful when you're out of timeouts and you have an extra down to play with.

- Run a "Stop Clock" play: Press Y

SUBSTITUTIONS

When you're on offense, you can substitute your quarterback. If your backup signal caller is a better runner than the starting guy, you might want to put in the sub against a team that has given up zero yards passing.

You can only substitute before calling an offensive SET. You can't substitute if your quarterback has been injured earlier in the drive—because your substitute is already playing. Once you substitute for your quarterback, you can't bring the starter back until the half is over.

- To replace your quarterback:
 - 1) Press **START** to pause the game, then press the Control Pad **DOWN** to **SUBSTITUTE QB**.
 - 2) Press any button. Your quarterback is substituted, and you return to the playcalling screen.

DEFENSIVE COORDINATION

As with the offense, the computer will control the defense if you wish. In fact, you don't even have to call your own formations, sets and plays. If you don't choose a defense, your team runs the defense it ran the previous play. (See page 30 for a description of each set and formation.)

After calling a defensive play, you can select the man you want to control by pressing **B** or **X** until the star appears under that player.

The most important command to know on defense, after the ball is snapped, is the **B** button, which switches your control to the defensive player closest to the ball carrier. Move your defender with the Control Pad.

- Dive at ball carrier: Y
- Activate the defender closest to the ball: B
- Jump and raise hands to block a kick or intercept a pass: X

TWO PLAYER—TEAMMATES

When playing in the *Teammates* mode, the player with Controller 1 controls the man on the **YELLOW** star. The player with Controller 2 controls the player on the **BLUE** star. On offense, the player with Controller 1 "is" the quarterback and is responsible for calling the plays and snapping the ball.

The player with Controller 2 may use the **B** button to take control of any of the other players on the field. In most cases, the Control 2 player will choose to act as either a running back or a pass receiver, but some people might like to play on the line, as Madden himself once did.

On passing plays, the player with Controller 2 can press to become the intended receiver after the quarterback passes the ball. On running plays, the player with Controller 2 must move the blue star to the proper running back before the ball is snapped in order to control the ball carrier. Otherwise, Controller 1 automatically controls the ball carrier.

On defense, your team benefits most if you take control of a linebacker or blitzing lineman.

When playing with the Super Multitap:

<u>Player #</u>	<u>Color of Star</u>
Player 1	Yellow
Player 2	Blue
Player 3	White
Player 4	Green
Player 5	Gray

PAUSE/TIMEOUTS

Each team is allowed 3 timeouts per half.

- 1) Press **START** to pause the game.
- 2) Control Pad **DOWN** to CALL TIMEOUT, then press any button.

The Play Call screen appears, and the playclock is reset to 45 seconds. Notice that one of your team's Timeout indicator lights is now off.

or
Press **X**

Below is a list of the available formations.

SHOTGUN

This is primarily a passing formation because the quarterback receives the snap about five yards behind the line. He doesn't have to drop back to throw the ball, 'cause he's already there.

RUN & SHOOT

This formation has four quick receivers and a halfback. Guys with good hands who run forty yards in less than five seconds are the stuff defensive backs have nightmares about.

PRO-FORM

This is a version of the pro-set, where a fullback and a halfback line up beside one another and behind the quarterback.

FAR and NEAR

These terms simply describe where the halfback lines up. He's either far from or near to the strong side of the offensive line, that's the side where the tight end lines up.

I FORMATION

Two backs line up directly behind the quarterback. A great formation from which to run dives, sweeps and screens.

SINGLE BACK "JUMBO"

Two tight ends and one halfback make this a good rushing formation.

OFFENSIVE PLAYS

FLOOD

One of the most effective ways for a quarterback to beat zone coverage is to flood, or overload the zone with multiple receivers. A defender has to think twice about leaving his own zone to follow a receiver into another guy's zone.

CUT

You've heard of turning on a dime. That's sportswriter talk. I never really understood why you'd want to do that, even if it was possible. I guess it means turning fast. I think cutting is a more accurate description of the ability to change direction. A guy's going one way and boom, he cuts and is going another way.

PULL

In a pull play the guard runs parallel to the line of scrimmage and turns up field when he clears the tight end. The running back follows right behind, a smile on his face.

TRAP

Like all good offensive plays, the Trap depends on deception to work. The idea is you "trap" a defensive guy into thinking one thing is happening, when really something totally different is going on. For example, you let a defensive end just walk into the backfield. You put up only token resistance. He's saying "Man, this is a piece of cake, I'm going to stuff this play and maybe get a sack." Suddenly an earth mover disguised as an offensive guard comes from an unexpected direction and the defensive guy is on his backside

wondering what happened. The runner jets through the area where the defensive guy was, when he was standing up.

COUNTER

A Counter play relies on misdirection. You try to sell the defense on the idea that the play is going right, for example, when in fact you want to go left. It's a tough sell. You send everybody but the water boy and the guy who's going to carry the ball in one direction. When you have them moving the "wrong" way, give the ball to the running back and he runs to daylight in the opposite direction.

SCREEN

A screen is a short pass caught behind the line of scrimmage. Usually the quarterback lures rushing defenders toward him and then loops a soft pass over their outstretched hands to a moving running back/receiver who follows a screen of blockers downfield.

PLAYACTION

Playaction (also called play fake) refers to a pass thrown after the quarterback has faked a handoff to a running back. The back tries to add to the deception by pretending to take the ball and follow blockers. The idea is that the fake delays the pass rushers, and makes the defensive backs run toward the line to help tackle the guy they think has the ball.

DRAW

The opposite of a play action pass. The QB drops back as if to pass and hands off to the running back who charges up the middle of the formation. By the time the rushing defenders realize the deception, their momentum may have taken them beyond the ball carrier.

QUICKOUTS

Sometimes called a square out. In this pass pattern the receiver takes a few steps upfield and makes a quick 90 degree cut to the nearest sideline. If he doesn't want to sit next to the water cooler for the rest of the game, he tries to stay in bounds.

CROSS

Most crossing patterns are the opposite of quickouts—the receiver turns toward the middle of the field. Some guys call them slants, but it just depends on the angle that the receiver runs.

POST UP

Post patterns are for fast guys. The receiver runs downfield and angles in toward the goal post. If the quarterback can really air out the ball, and the receiver can run like the wind, this bomb can score.

STOP CLOCK

Here the quarterback simply kneels or spikes the ball.

OFFENSIVE ALIGNMENTS

The sets and formations show how your offensive team lines up when you call certain plays (see OFFENSE, above). Remember: Not all formations are appropriate with every set. We're showing you the most common ones here. You'll be more competitive if you use these alignments in combination with the PLAYER RATINGS on the enclosed poster.

DEFENSIVE PLAYS

FORMATIONS

GOAL LINE

A good line up for stuffing the short run and goal line defense.

3-4

Featuring three down linemen with four linebackers, this defense is now the most popular in professional football. Used for short and medium zone pass coverage and containment against the run.

4-3

Standard four down linemen (two tackles and two ends) with three linebackers. It's most effective against short passes and the run.

NICKEL

Gets its name from the addition of a fifth defensive back (nickel back). When a pass is expected, many teams add a defensive back to their sets, and take out a down lineman or linebacker. Cover and Read sets are available.

DIME

When the defense is willing to mortgage the farm that the next play is going to be a pass, they might put in a sixth defensive back. This is the Dime defense or Dime package. Cover and Read sets are available.

DEFENSIVE ALIGNMENTS

The alignments show how your defensive team lines up when you call certain formations and sets (see DEFENSE, above). You'll be more competitive if you use these alignments in combination with the PLAYER RATINGS on the enclosed poster.
