MOVEMENT

Whether you want to walk up to your opponent and smack the taste out of his mouth, slide out of the ring to settle things on the arena floor or climb up onto a turnbuckle to drop a flying elbow on a helpless victim, it all starts with knowing how to navigate.

Most of the time, moving around the environment is as simple as moving in the direction that you want to go and pressing the Z Button/ZL Button/Z Button if you need to climb over, under or onto something.

STRONG STRIKES AND STRIKE COMBINATIONS

Striking is the quickest way to show your opponent who's in charge. Pressing the A Button/ y Button/X Button performs a quick strike against your opponent. Holding the A Button/ y Button/X Button unleashes a powerful but slower (and easier to counter) heavy strike. Combining the A Button/ y Button/X Button while pushing the Control Stick/L Stick/ Control Stick in a direction gives you a variety of different strikes.

Pressing the A Button/y Button/X Button as each strike lands creates a strike combination that sends your opponent reeling and builds momentum in a hurry.

Gut Kick	A Button + Control Stick ↖/↗	y Button + L Stick ↖/↗	A Button + Control Stick ↖/↗

Note: A successful strike combination (all four strikes connect) leaves the opponent in a standing groggy state and vulnerable to groggy grapple moves, top rope diving attacks and other devastating attacks.

CHAIN GRAPPLES

All grapple attacks in *WWE '12* start from one of four chain grapple states. To enter a chain grapple state, approach a standing opponent, hold the B Button/b Button/B Button and push the Control Stick/L Stick/Control Stick in a direction.

GROGGY GRAPPLES

There's nothing better than catching an opponent when the lights are on but nobody's home. To perform a groggy grapple, approach an opponent from the front or behind while they're in a groggy state, hold the B Button/b button/B Button and push the Control Stick/L Stick/Control Stick in any direction to execute a strong grapple attack.

To make an opponent groggy, land all four strikes in a strike combination, lift up a downed opponent and reverse attacks from a heavily damaged opponent. The Limb Targeting System can also be utilised (read up on the all-new Limb Targeting System below).

Take control of the match by sending your opponent running out of control. Press the Z Button + C Button/ a Button/X Button to send your opponent running into the ropes with an Irish whip. Catch them on the rebound with a strike (A Button/y Button/A Button) or grapple (B Button/b Button/B Button).

REVERSALS

Just because some jobber throws a punch at you, that doesn't mean you have to stand there and take it! Press the B Button/R Button/R Button as soon as your opponent begins their strike or grapple attack to reverse it.

If you reverse a punch or a kick, you grab hold of your opponent's arm or leg and have a short window of opportunity to counterattack!

POSITIONING—NEW!

For the first time, **WWE '12** gives you the power to put your opponent exactly where you want him. Once you have him at your mercy—either in a grappled state, or down on the canvas or groggy—reposition them strategically and hit them with your most powerful attacks.

LOCATION-SPECIFIC ATTACKS

When your opponent is at your mercy in different places around the arena, you've got new attacks that you can hit him with. Generally speaking, the A Button/y Button/A Button is always a strike and the Control Stick + B Button/b Button/B Button is always a grapple, but be sure to check out some of these special situational attacks and add them to your arsenal.

RUNNING ATTACKS

What's better than walking up to an opponent and smacking them around? Running at them and ploughing straight into them! Run at your opponent by holding the C Button/L Button/L Button and pushing the Control Stick/L Stick/Control Stick toward him, and then use the A Button/y Button/A Button or the B Button/b Button/B Button to hit him with a strike or grapple attack.

DIVING ATTACKS

Ring posts aren't just there to hold the ropes up—you can also climb up onto them and unleash devastating aerial attacks against an unwary opponent. Use diving attacks against standing or downed opponents, but be careful not to let your foes turn them against you. It's a long way down!

FINISHERS AND SIGNATURE MOVES

The best way to pop the crowd and put your opponent down for the count is to hit him with a Signature move or Finishing move, like John Cena's Attitude Adjustment or CM Punk's GTS.

First, you need to completely fill your momentum meter by successfully landing attacks and taunting your opponent. Once it's full, you have 20 seconds to perform your Signature Move.

If you hit your opponent with your Signature Move, you get a Super Finishing Move icon. If you guessed that that lets you execute a Super Finishing Move, then congratulations—you're sharp. Use the Super Finishing Move quickly, or it will turn into a regular Finishing Move icon.

You can also choose not to perform a Signature Move and store a regular Finishing Move icon.

Note: View the wake-up taunts description on page 18.

You've also got to be in the right position to perform your Superstar's Signature Move or Finishing Move. Each Superstar has different conditions, and you can check them out by viewing them in the Superstar Select Menu, or by having a look at his move-set in the Create modes.

WAKE-UP TAUNTS—NEW!

What's worse than getting jaw-jacked by a devastating Finishing Move? Being humiliated by your opponent with a Wake-Up Taunt before he puts you away!

When you've got a Finishing Move icon stored, you can force a downed opponent to his feet with a Wake-Up Taunt. The opponent stumbles to his feet—hit him with your Super Finishing Move quickly, or you'll lose it!

PINNING AN OPPONENT

Once you're sure that your opponent has had enough, it's time to hook the leg and go for the three-count.

When your opponent is down on the mat, approach him and hold the C Button/press the a Button/press the X Button to go for the pin. To kick out, the opponent must hold the B Button/b Button/B Button to fill the kick-out meter and release the button once the meter reaches the target zone.

If you are the pinning Superstar and want to toy with your opponent a little longer, you can cancel the pin at any time by pressing the C Button/L Button/L Button.

BREAKING POINT SUBMISSION

When your opponent is down, groggy or in a grappled state, hold the Control Stick + B Button/b Button/B Button to lock them in a Breaking Point Submission. Your opponent must quickly struggle free of the submission hold, or they will tap out and lose the match.

You and your opponent must mash the A Button/a Button/A Button to increase the pressure and escape, respectively. But watch out—you can exhaust yourself if you try to get a strong opponent to tap out! To break the submission hold before this happens, press the C Button/L Button/Z Button. However, be aware that doing so will cost you a sizable amount of momentum.

LIMB TARGET SYSTEM—NEW!

Any rookie can step between the ropes and throw wild punches and kicks, but the truly elite WWE Superstars come into every match with a game plan to pick their opponent apart and have him begging for mercy.

WWE '12's all-new Limb Target System gives you the power to zero in on specific body parts and work them over until your opponent can't do anything except watch the ref raise your arm in victory.

You can target the limbs of a standing groggy opponent, a grappled opponent or a downed opponent.

Action	Wii Remote + Nunchuk	Classic Controller	Nintendo GameCube Controller
Target Standing Groggy/Grappled Opponent's Head	Hold the Z Button + Control Stick ↑ + press the A Button	Hold the R Button + x Button	Hold the R Button + Y Button
Target Standing Groggy/Grappled Opponent's Arm	Hold the Z Button + Control Stick ←/→ + A Button	Hold the R Button + y Button/a Button	Hold the R Button + A Button/X Button

Target Downed Groggy/Grappled Opponent's Head	Hold the Z Button + Control Stick ↑ + press the A Button while standing near opponent's head	Hold the R Button + x Button while standing near opponent's head	Hold the R Button + Y Button while standing near opponent's head

You'll know that your attacks are taking their toll when your opponent holds that part of their body in agony. Once you see that, victory is close at hand!

Targeting different body parts has different effects on your opponent:

Head:

- Striking or grappling their head is more likely to force them into a standing groggy state.
- Attempting a submission against their head increases the odds that they'll tap out

Arm:

- Opponent's Breaking Point Submission strength is reduced
- Attempting a submission against their arms increases the odds that they'll tap out

Leg:

- Opponent's walking speed is reduced
- Running is impaired, and the opponent may randomly collapse while running
- Attempting a submission against their legs increases the odds that they'll tap out

Torso:

- Opponent's adrenaline meter is reduced
- Standing groggy grapples can now be executed following a Gut Kick (Control Stick  /  + A Button / L Stick  /  + y Button / Control Stick  /  + A Button). While the opponent is bent over from the kick, push the Control Stick + B Button / L Stick + b Button / Control Stick + B Button to perform one of four different groggy grapple moves.
- Attempting a submission against their torso increases the odds that they'll tap out

EXTREME RULES CONTROLS

In an Extreme Rules Match, the only rule is that there are no rules! Brawl outside the ring and smash your opponent with a steel chair.

All of these moves apply to any match where you can use objects against your opponent—though if you try to use them in non-Extreme Rules Matches, you might wind up disqualified.

To win a Ladder Match, TLC Match or Money In the Bank Match, you must climb a ladder to get within range of an object suspended over the ring (usually a Championship). Use the shadow under the suspended object to line up the ladder, and then climb all the way up the ladder.

When you reach the top, hold the Control Stick ↑/R Stick ↑/C Stick ↑ to grab the object. When the Superstar has grabbed hold of the object you will be prompted to PULL the item by moving the Control Stick ↓/R Stick ↓/C Stick ↓. Time it correctly to receive another opportunity to pull the item down. And time your move carefully—if your timing is off, you'll be forced to start over.

Note: When you want to knock over a ladder without picking it up, striking it (A Button/y Button/X Button) is the quickest way to do it. But if there are one or more Superstars on it, the fastest and most effective way to topple it (and the opponents on it) is to approach it and press the Control Stick + B Button/b Button/B Button.

Climb the ladder and push the Control Stick ↑/R Stick ↑/C Stick ↑ to grab the suspended object above the ring.

When the prompt to remove the object appears, push the Control Stick ↓/R Stick ↓/C Stick ↓ to pull it down.

STEEL CAGE MATCH CONTROLS

Steel Cage Matches are among the most brutal matches in *WWE '12*. Superstars are surrounded by four unforgiving walls of chain link fence. Not only does the cage keep the action in the ring, it can also be used to damage your opponent.

HELL IN A CELL MATCH CONTROLS

Steel Cage Matches are dangerous, but Hell In a Cell Matches are potential career enders! All of the Steel Cage Match controls apply to Hell In a Cell, but there are some particularly vicious moves that can only be executed in WWE's most dangerous match type.

Action	Wii Remote + Nunchuk	Classic Controller	Nintendo GameCube Controller

ELIMINATION CHAMBER CONTROLS

Six Superstars enter the Elimination Chamber, but only one will leave with the victory! Two Superstars begin the match, and additional Superstars enter, one at a time. When a Superstar is pinned, they're removed from the match, which continues until only one remains.

Use the Steel Cage Match controls in the Elimination Chamber, as well as these special actions:

TAG TEAM MATCH CONTROLS

Double the mayhem of a regular WWE match by teaming up with a partner and taking on a pair of opponents! In regular Tag Team matches and Tornado Tag Team matches, the objective is to win by either pinfall or submission.

In a regular match, each teammate must tag in and out of the match, and the legal member of one team must beat the legal member of the other team. In Tornado matches, all Superstars are in the ring simultaneously, and any member of one team can defeat any member of the other team.

INFERNO MATCH MOVES

In an Inferno Match, the ring is surrounded with searing flames, and the only way to win is to set your opponent on fire!

The temperature increases as successful attacks are performed. Once it reaches its maximum and the flames become a blazing inferno, drag the opponent toward the flames. If you have inflicted enough damage on them, they will not be able to resist your infernal efforts!

Note: Perform a finisher to increase the ring temperature to maximum instantly. For a brief time, you can try to throw the opponent through the fire and out of the ring for the victory!

SUPERSTAR ABILITIES

Dirty Pin

When your opponent is down near the ropes, stand next to the ropes and execute a pinfall with both of your legs propped up on the ropes, giving you unfair leverage to increase your chances of getting the three-count.

Move Thief

Steal your opponent's Finisher and use it against them by holding the Z Button/R Button/R Button and pressing the +Control Pad \blacktriangle to enter the Move Thief state. You have 20 seconds to execute the Finisher from the time you enter the Move Thief state.

Comeback

If you have this ability, you will be prompted to press the A Button + B Button/x Button/Y Button when your Superstar has sustained moderate limb damage. Pressing the A Button + B Button/x Button/Y Button at the correct time will let you perform a dramatic comeback. This cannot be used when you have a Finisher or Signature Move available.

Hammer Throw

When Irish whipping an opponent, hold the Z Button + hold the C Button/hold the a Button/hold the X Button to send an opponent smashing into and over a turnbuckle or flying over the ropes and down to the arena floor.

Resiliency

Superstars and Divas with this ability can use it once per match to dramatically improve the odds of kicking out of a pin attempt. While being pinned, press the C Button/L Button/Z Button to increase the target zone on the pin meter.

Outside Dives

Press the A Button/y Button/A Button while moving into the ropes, or run across the ring and press A Button/y Button/A Button near the ropes to execute a diving attack or running diving attack against an opponent outside of the ring.

Springboard Dives

While near the ropes or running toward the ropes, hold the Control Stick/L Stick/Control Stick toward the ropes and press the A Button/y Button/A Button to execute a springboard attack from the ring apron.

Leverage Pin

Superstars with this ability can counter running attacks and groggy grapple attempts from a heavily damaged opponent into pin attempts called "leverage pins." In a leverage pin, the defending Superstar can try to escape normally by reaching the blue target area of the kick-out meter, or they can reverse the leverage pin into a pin of their own by reaching the yellow area of the meter.

Ring Escape

When down near the ropes, press the C Button/L Button/L Button to slide under them to ringside and escape your opponent. You can use this ability up to three times per match.

DID YOU KNOW...?

... when your opponent attempts to grapple you, you can press the Control Stick + B Button/b Button/B Button to lock into a collar-and-elbow tie-up? Press the A Button/b Button/B Button repeatedly to win the battle and gain the advantage!

...that you can remove turnbuckle pads from the corners of the ring? Move toward the turnbuckle and press the Z Button/ZL Button/Z Button.

...that a damage multiplier is added to your strike and grapple attacks if you run off of the ropes before hitting the move?

...that you can choose which direction that you want to send an opponent running by pushing the Control Stick/L Stick/Control Stick in that direction as you're Irish whipping them?

...that you can recover from being groggy more quickly by hitting the A Button/b Button/B Button repeatedly?

...that there's only one way to escape the Hell in a Cell structure? You must destroy one of the wall panels on the same side of the structure as the announce tables by using a special move.

...that strong strikes can be performed from front-facing chain grapple holds (front facelock, side headlock and wrist lock) and after blocking a punch or catching a kick?

...that the announce table must be cleared before you can put an opponent through it? Approach the announce table, push the Control Stick/L Stick/Control Stick toward it and press the Z Button/ZL Button/Z Button to remove the cover. Once the cover has been removed, Irish whip the opponent toward the table, and then grapple them to place them on top of the table.
