HEALTH AND EPILEPSY WARNING
Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure. If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using Dreamcast.

In all cases, parents should monitor the use of video games by their children. If anyone experiences dizziness, blurred vision, eye or muscle twitching, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

To reduce the possibility of such symptoms, the operator must follow these safety precautions at all times when using Dreamcast:

- Set a minimum of 6.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

- Store the disc in its original case and do not expose it to high temperature and humidity.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.

ADVENTURE FLOW

The central game of Sonic Adventure™ is called the "adventure mode." The adventure mode is comprised of two "areas." One area, called the "Adventure Field," contains a variety of "Events" that are encountered in the course of the overall adventure story. The other area is called an "Action Stage." In an action stage, each individual character must fulfill a unique "goal" in order to clear the stage successfully. The general flow of the game can be illustrated as follows:

...And so on until the "Final Stage" for each character is successfully cleared.

CHARACTER SELECTION

When you select a character, the items "Game," "Instruction" and "Cancel" are displayed. Select one of these items.

Sonic is the only character that can be selected at the start of a new game. The other characters will become available for play as you progress through the adventure story. For details, see p.8.

Basic control instructions for the selected character are displayed along with a brief summary of the particular "goal" that the character must meet to successfully complete the action stage. STORY SCREENS

These screens provide a short story summary about the selected character. Press  or  to return to the character selection screen.

ADVENTURE MODE

ADVENTURE FIELD

Because there are no time limits or goals to complete in the adventure field part of the game, feel free to investigate and explore the adventure field as much as you like. However, in order to continue the overall game, it is necessary to find the Level Up items that grant your character special powers as well as to locate the various action stage entrances whenever your character is in the adventure field.

Each of the three areas within the adventure field contains a "Chao Garden". A Chao garden is a special location designed for raising Chao creatures. For details about Chao creatures, see p. 15.

EVENTS

Whenever you discover a new action stage entrance or meet up with a new character while in the adventure field, an "event" in the form of an FMA (Full Motion Action) sequence is shown. Events occur automatically and while the event is "playing", you are unable to operate your character.

CHARACTERS

Sonic is the only character that can be selected at the start of a new game. You will be able to select other characters as you progress through the game.

The five additional characters in this game are Tails, Knuckles, Amy, Gamma and Big. Each character can be selected immediately following their respective introduction.

BATTLING THE BOSSES

Sometimes a "Boss" will appear in the adventure field after you have successfully cleared an action stage. It is necessary for you to locate and defeat the boss in battle to continue to the next stage. The battle starts as soon as the boss's name and life gauge appear on the screen. Remember, it is important to have at least one ring throughout the battle to prevent your character from dying when attacked. Once the boss's life gauge reaches zero, victory is yours and the battle ends.

CHAO CREATURES

A special feature of Sonic Adventure is the ability for you to raise a unique species of creatures called "Chao". A Chao creature is essentially a "virtual pet" that you first encounter in the form of an egg in the adventure field. If you discover an egg, take it to a Chao Garden, hatch the egg and raise your chao creature. You will find one "Chao Garden" in each area of the adventure field. A Chao Garden is a protected enemy-free location specifically designed for raising Chao. All prospective parents, be forewarned! How you raise and care for your Chao will determine not only its physical characteristics but also its behavior and personality. For more information about Chao creatures, see p. 15.

ACTION STAGES

Each character has a different goal that must be met in order to clear the action stages. This goal is displayed at the start of each action stage. The goal of each stage is broken into three levels (A, B, and C) so set your sights on clearing all three levels and good luck!

For details about action stage goals and a diagram of the action stage display for each individual character, see the character introductions on p. 18.

RINGS & BONUS LIVES

A number of rings can be found in each action stage. Your character can survive damage inflicted by an enemy attack as long as they are carrying at least one ring. However, when attacked, they will automatically lose all the rings they were carrying. If attacked when not carrying any rings, your character will lose a life.

Whenever your character collects 100 rings, they will receive an extra life. Item boxes containing an extra life can sometimes be found in the action stages as well.

POINT MARKERS

You will find a number of point markers throughout each action stage that you can use to save your character's time and position within the course. If your character loses a life, the next life will start from the location of the last point marker touched with the time that was logged when the marker was originally touched. The exact time at which the point marker was touched is displayed briefly at the bottom right of the action stage display whenever a point marker is touched.
ADVENTURE MODE

EMBLEM

Each time your character successfully clears an action stage you will receive a Sonic emblem. As the "goal" of each action stage is comprised of three levels, you can receive a total of 3 Sonic emblems per action stage. Additional Sonic emblems can also be found in both the mini-games and scattered about the adventure field. The total number of emblems you have collected is displayed in the file selection screen. For details, see p. 4.

GAME OVER & CONTINUE

Your character will lose one life if they sustain damage while not carrying any rings. Your character can also lose a life, even when carrying rings, if they fall off the action stage course or a cliff in the adventure field. The "Game Over" screen appears when the number of "extra lives" your character has reached zero and they lose their last life. Select and enter "Continue" to restart the game at the beginning of the same stage or "Quit" to return to the title screen.

*In action stages, boss battles or mini-games, your character will restart at the beginning of the stage.

*In the adventure field, your character will restart from the location where the character was when the game was last saved.

PAUSING THE GAME

When the game is paused, press the Start button and the pause window appears. Options available in the pause window vary according to the type of stage you are in when the game is paused. Refer to this diagram and select an option from the pause window.

PAUSING IN THE ADVENTURE FIELD
- Continue = Select to continue the game.
- Quit = Select to quit the game and return to the title screen.

CHAO CREATURES

RAISING CHAO CREATURES IN THE CHAO GARDENS

An added feature of Sonic Adventure™ is the "A-Life" system installed within protected environments called "Chao Gardens". This system enables you to hatch and interact with a unique species of virtual creatures called "Chao". Be sure to take your parental responsibilities seriously for how you care for your Chao creatures will determine not only their physical development but also their personality, behavior and quality of life.

NOTE: The time only flows in the Chao garden while a character is present. Whenever they leave the Chao garden, time stands still.

HOW TO RAISE CHAO CREATURES

Chao are hatched from eggs that can be found in Chao Gardens or the adventure field. The Chao life cycle spans three basic stages: Egg → Infancy → Maturity. To enhance its physical traits and abilities, your Chao creature can absorb the characteristics of the small animals rescued from the action stages. To do this, use the 0 button to pick up and hold a small animal in front of your Chao. As the absorption takes place, your Chao creature will visibly transform. Chao will also undergo physical and behavioral changes according to the food you provide and manner in which you treat it.

Once matured, your Chao can be bred with another mature Chao. This mating process will yield a new egg for you to hatch and raise. Such is the life span of a Chao.

RACING CHAO CREATURES AT CHAO STADIUM

Pit your Chao against seven other Chao in the Chao Stadium races. Select a level and style and watch 'em go! Don't forget to cheer your Chao on to victory!

ENTERING A CHAO RACE

PLAYING "CHAO ADVENTURE" USING YOUR VMU

TAKing YOUR CHAO FOR A WALK

Transfer your Chao to a Visual Memory Unit (VMU) to take them on an adventure. To do this, use a character to pick up your Chao and carry it over to the "Transporter Machine" located in the Chao garden. Jump on the red button and set the Chao down. Select a VMU and press the \ button. The Chao will automatically be transported to your VMU.

When multiple VMUs are connected, you will need to select which VMU to use to hold your Chao. One VMU can hold only one Chao and one egg at a time.

*CAUTION: To avoid inadvertently attacking your Chao, it is recommended that you only use the \ button when picking up Chao creatures.

PLAYING "CHAO ADVENTURE"

"Chao Adventure" is an independent mini-game that you can play using your VMU. After you have transported your Chao to the VMU, remove the VMU from the controller to start the game.

HOW TO PLAY

- Select the game mode and once the title screen appears, press the \ and \ buttons simultaneously to start the game. To quit the game, press the Sleep Button to turn OFF the VMU power.

- Helping a Chao in Need
Your Chao will likely have its share of "accidents," such as tripping and falling down, in the course of an adventure. When this happens, be sure to lend a helping hand by pressing the \ Button to help it up.

- Leading the Way
When your Chao reaches a crossroads, someone has to make a decision. Just who is in charge anyway?

RETURNING YOUR CHAO TO THE CHAO GARDEN

After reconnecting your VMU to the controller, take a character to the Chao garden and jump on the red button of the Transporter Machine. Select the Chao to return to the garden and press \ Your Chao will pop out of the machine. Pick it up and give it a snuggle. Love is a happy Chao!

*CAUTION: Set the VMU to the file or time mode before connecting it to the controller.

TIPS
- Socializing is healthy, so invite your friends' Chao to come over and play with your Chao in your Chao garden.
- There are magic portals the characters can use to warp between all three Chao Gardens... to find these, first discover the gardens. Good luck and happy parenting!
