

## AIR RAID

=====

Protect yourself from an air raid with your own aircraft and land-to-air missiles. Your supplies of weapons and fuel are limited but you can refuel provided that the enemy has not destroyed your fuel storage tanks.

### LOAD""

The purpose of this game is to shoot down the largest number of aircraft thus scoring higher points. You have a limited amount of fuel, and when your fuel level is getting dangerously close to nothing you have an option to refuel, from one of the pumps. Just be careful not to have them all shot away.

You move using Z (left) and X (right), you can fire an anti aircraft missile by using key 0. You only have 60 anti aircraft shells, so make sure you use them to your best advantage.

You have a total of 19 anti aircraft tanks. If the one in action is blown up it will be replaced by another from your arsenal.

You may also fire a missile from the ramps with keys s and S. These keys can only fire at the aircraft when it is just a dot on the screen.

The flashing missiles can be directed using Z or X. If you miss the shot you lose the missile, but if you hit the plane you score 1000 points without losing the missile.

### THERE ARE FOUR LEVELS OF PLAY:

Level 1: Easy to hit the aircraft with the missiles.

Level 2: Now to hit the plane with missiles you need to hit the target exactly in the centre.

Level 3: The enemy starts to use his very powerful JETS.

Level 4: Jets are more effective. You are now weak so the enemy tries to land with his paratroopers.

GOOD LUCK.
