

BEDLAM

BEDLAM is a totally new, 100% machine code arcade game, featuring super-smooth graphics and synthesized sound effects. You are trapped on tile asylum planet 'Bovryll', your only weapon a twin firing photon bolt. Wave after wave of loathsome creatures will assail you, each more vicious than the last -- your only hope of survival is to kill them all! As the game progresses you will encounter the saucerous guards: kill ten of these and you will be given another life.
