Managing your driver through 30 courses a season is not an easy job in banger racing. Also having to provide him with the best "BANGER" money can buy. Watch his car in the graphically represented races, of the complete banger racing season, where you must make all the decisions to guide him towards the championship.

During Race:

Lap = Number of Laps.
Position = Your Present Position.

Note: This may not necessarily be your Final Position.

To enter your first race press K to continue and press Y. After the first race you will be given the option at the end of each race. When you train, it improves your drivers skill.
