

Your Manta Class Fighter

Up/Down sets the position above the Super-Dreadnought, Left/Right controls acceleration and deceleration. If your velocity falls too low your fighter performs a half-loop followed by a half-roll so as to face in the opposite direction. This manoeuvre also temporarily increases your height above the surface and may be used to avoid incoming missiles and mines.

Your Manta performs a 90 degree roll if you press and hold fire whilst moving up or down. This will enable you to manoeuvre through restricted spaces.
