Three years ago, James Sunderland’s wife became seriously ill and passed away. James tried to pull himself together and resume his life after the loss but struggled to get back on his feet. The emotional pain and emptiness left James in a constant state of mourning.

Then one day, a cryptic letter arrives signed by Mary, the same name as his late wife. In the letter, Mary writes “Silent Hill, our sanctuary of memories... I will be waiting for you there.” James is confused and disturbed by the letter. He questions if Mary is somehow really alive or if someone is playing a hoax on him.

“I still don’t believe it. The dead can’t send letters, yet I came here to see my Mary...”

“Our special place—What does that mean? This place is too full of memories...”

Shrouded in mystery and driven by the desire to uncover the truth, James sets off into the world of Silent Hill...

As the fog grows thicker, James realizes that the town is nearby.

“The only way to get to the center of town is through this tunnel, but there must have been an accident or something because the entrance is blocked.”

“But wait...”

“The map shows a single road through the forest that leads to the town. Looks like the only way to get to the town is to take this road on foot.”

“I can’t see anyone in this thick fog, or should I say I don’t feel anyone.”

“I see a run-down building nearby...”

“There’s no one inside. I am alone in the mirror’s reflection.”

“I look at the man in the mirror and mutter a question...”

“Mary... Could you really be in this town...”

PLAYING THE GAME

Objective

James has returned to Silent Hill to uncover the truth about his late wife Mary. As James ventures deeper into town, he must successfully overcome the challenges that await him. In some situations, defeating/avoiding monsters and solving puzzles will be necessary. If James can overcome the obstacles, information regarding the origins of the mysterious letter might be revealed and possibly even darker secrets.

How to use the map

If James has a map in his possession, press the button to view the map. Use the button to zoom in/out. When the map is zoomed in, use the directional buttons or left analog stick to view specific areas. If the map consists of multiple floors, press the Up/Down directional buttons to view the additional map pages. As James searches certain areas, he will automatically make notations on the map in red marker. The green pointer on the map represents James' current position.

Field

During the game, control James using the directional buttons or left analog stick. When James is near objects or items, press the button to search the immediate area. Important information or useful items may be discovered.

Game Over

The upper left corner of the Item Box (accessible by pressing the START button) will show James' current health status inside the Status Box. The current health status of James is determined by color, which will gradually turn red as health decreases. If the vibration function is enabled (accessible in the OPTIONS menu), the controller will begin to shake more violently as James receives more damage. This is an effective tool for gauging current health during normal gameplay. James will die when his health is completely depleted. Use items, such as the First aid kit and Energy drink to replenish James’ life gauge. For more information on items, see page 16.

Saving Progress

A game can be saved at any one of the various save points scattered throughout Silent Hill. The save points are easily identified as mysterious red objects. When James is facing a save point, press the button to access the Save Screen. Game progress can be saved any number of times at save point locations. Follow the on-screen instructions to save your current progress.
James Sunderland  
**Age:** Unknown  
**Occupation:** Protagonist

Three years ago, his beloved wife, Mary, became seriously ill and passed away. James was wasting away in empty, lifeless days of mourning, when a strange letter arrived. The name of the sender was Mary Shepherd-Sunderland, his late wife. The cryptic letter beckoned him to meet her in Silent Hill, a town that once held a great meaning for the couple. Although he firmly believes his wife is not alive, James questions the origins of the letter and is determined to find the truth by returning to Silent Hill.
Angela Orosco  Age: Unknown  Occupation: Unknown

James first meets her in a cemetery and from the beginning, there is something shadowy about her. Even since childhood, she was convinced that she would never be happy. She ran away from home shortly after graduating from high school, but her father found her and dragged her back home. She ran away from home again, this time to Silent Hill, but now she is lost.

Maria  Age: Unknown  Occupation: Unknown

On the surface, Maria looks exactly like James' late wife, however Maria's hairstyle and taste in clothing are completely different. Her personality, cheerful and energetic, is also the exact opposite of Mary's. When James first meets Maria, he is shocked by the resemblances as well as the intimacy of their conversation, as if they had known each other for years. After learning of his purpose in Silent Hill, Maria is interested in his search for Mary and decides to accompany him.
**Laura**
Age: Unknown  Occupation: Unknown

A stubborn, bratty little girl who does whatever she wants and suddenly goes on her way. She crosses James’ path throughout his search and seems to know more about Mary than what she reveals. Coincidentally, she was a patient in the same hospital as Mary and they became very close. Mary loved her as her own daughter. Perhaps she holds the truth that James is seeking.

**Eddie Dombrowski**
Age: Unknown  Occupation: Unknown

Eddie is a simple-minded, clumsy and useless man who is deeply terrified of getting hurt. He has a gentle, quiet personality, but also possesses another side that he cannot control when angered.

What is his purpose in Silent Hill?
1 Wooden Plank: A large wooden stick with a few nails on the tip. The length is between 32-40 inches. The wood is thick enough to hold in one hand and swing it easily. The style of this wooden plank is very similar to wood used at construction sites.

2 Handgun: Ordinary handgun that loads ammunition from magazines. Use the handgun for long distance attacks, but be resourceful with the ammunition. Let the monsters get closer to maximize the damage of each shot.

3 Handgun bullets: Boxes of ammunition.

4 First aid kit: Replenishes a lot of stamina. Try to use these only when you are seriously injured or out of health drinks.

5 Health drink: Replenishes a little stamina.

6 Mary's Letter: The letter from Mary inside a plain white envelope. The back of the envelope says "Mary."

7 Radio: It may be broken or just not receiving any broadcasts. All you hear is white noise. However, for some reason, it becomes louder when there are monsters nearby. A very important item.

8 Flashlight: Can be used to light up dark areas. Can be turned on and off. An essential item for fighting and searching; however, it will also attract monsters to your position.

NOTE: James can discover additional weapons and items that are hidden throughout Silent Hill.
Using Items
Select desired items using the Left/Right directional buttons or left analog stick. The commands available for each item will be displayed in the Command box in the upper right corner. Select an item by pressing the(X) button, then select a command from the Command box. Press the(C) button to cancel an item selection.

Combine
Sometimes the solution to a puzzle will require you to use several items at once. In these cases, the Combine command will appear. Select the necessary items needed to solve the puzzle and combine them into one item. Once the items are combined, use the item to solve the puzzle.

Status Box
As James' health decreases, this box will gradually turn red. For more information on the Status Box, see Game Over page 9.

Memo
Hints on how to solve puzzles and important game messages are displayed here. Newer messages are displayed first.

Map
Refer to the map. For more information on maps, see How to use the map page 8.
The following settings can be adjusted in the OPTIONS menu.

**Brightness Level:** Adjust the brightness of the game screen.

**Screen Position:** Adjust the position of the game screen.

**Button Config:** Customize control settings.

**Control Type:**
- **3D Type:** Press up/down on the left analog stick to move forward/backward and press left/right to turn around.
- **2D Type:** Press the left analog stick in any direction to move in that direction.

**Vibration:** Select between Off, Soft, Normal, Hard vibration functions.

**Auto Load:** When this option is set to On, saved data will be loaded automatically upon startup. The game will be continued from the last save point.

**Language:** Select between English or Japanese language.

**Subtitles:** Turn in-game dialog subtitles On/Off.

**Sound:** Toggle the sound between Stereo/Monaural.

**BGM Volume:** Adjust the volume of the background music.

**SE Volume:** Adjust the volume of the sound effects.
Search View
While pressing the L2 button, the camera angle changes to the Search View mode. This mode changes the focus of the camera to where James is looking. In this view mode, the player can look further forward and around corners. Move the right analog stick to look around while in Search View mode. Utilize the Search View to your advantage, however some areas cannot use the Search View mode.

Light and Sound
The monsters have eyes and ears and use these to locate James. If they are not alerted to James' presence, they may not attack. Turn off the flashlight and carefully bypass unnecessary confrontations. However, with the flashlight off, James cannot search or look at the map and his accuracy with projectile weapons will greatly decrease.
Pay close attention to the sounds in the game, such as echoes and noises to gauge the approximate positioning and location of the sounds. James can stay fully prepared for the worst by listening closely to the atmosphere and environment around him.

Radio
The radio will alert the player to a monster's presence with white noise. The white noise will change depending on the number and distance of the monsters. Learn how to interpret the pitch of the white noise to identify danger that you cannot see. The monsters cannot hear the radio noise, so turning it off would be foolish.

Weapons
Since James is an ordinary man with no special weapons training, his skill is marginal. Even in daylight or with the flashlight on, his accuracy with weapons is questionable, especially with long-distance attacks. In addition, depending on the amount of pressure applied to the attack button, some weapons will be used with less/more force. Try to let monsters close in to insure a better hit.

Silent Hill 2 incorporates "S-FORCE", a new state-of-the-art 3D sound technology. This technology emulates a fully 3D surround sound environment through standard two-channel audio output. No special equipment is required to enjoy this technology during gameplay.
